Railroads in Mexico.

The Mexican treasury has paid, thus far, in subventions to railroads for sections recently completed, a little over $1,200,000.

The statutes formed by the Central Railroad company have been approved by the executive, and work goes on with the accustomed activity.

The National Mexican Construction company also continues its work between this capital and Toluca, with the greatest energy. Gen. Diaz, the secretary of public works, accompanied by other distinguished persons made a trip to inspect the road, finding it satisfactory.

The Sonora railroad company has delivered up to the federal agent the second section, comprising ten kilometres of track; and according to the last intelligence forty more kilometres were to be received, lacking only the completion of a few small bridges. The company is already in possession of six American eight-wheeled locomotives, which afford the advantage of facilitating the passage through the curves on the road. Materials are being periodically received, and it is believed that before the next rainy season sets in the track will reach Hermosillo, one of the most important points on the line.

In the first days of the present month the work of construction on the Jalapa and Vera Cruz railroad, which we have spoken of in our former reviews, has been inaugurated. The works on the line between Jalapa and Chalchicomula have also been inaugurated.

The work on the Puebla and Izucar de Matamoras railroad is going on with the greatest activity; on the section between Puebla and Cholula, already in operation, there was a movement, during the months of January and February, of over 13,000 passengers.

The work of the branch which is to connect the Morelos and Vera Cruz trunk lines, as well as those of another branch which is to connect this capital with the town of Texcoco, having its junction at the Los Reyes station, on the Morelos railway, has already begun.

The twenty-seventh kilometre of the line from Pachuca to Tulancingo is now completed; trains are running through the sections already completed.

The reconnoissances for the railroad from Tampico to San Luis Potosi, to be constructed by the Mexican Central company (the buyers of the concession), are being continued.

The work on the San Martin Texmelucan line is being pushed on.

The concession made by the federal government to the state of Chihuahua for the construction of a railroad has been transferred by the latter to the Mexican Central Railroad company.

Mr. Walthem, the chief engineer of the surveying party sent to Mexico by the International and Great Northern Railroad company of Texas, has arrived at Monterey with his party of engineers, with the purpose of surveying the places where that railroad is to connect with the great lines here projected.

The ship Silver Wing has brought to Minatitlan 7,964 packages for the Tehauntepec railroad.

The cars for the Tepic city railway, manufactured in the United States, have been received in that city.

Large cargoes of rails for the San Luis and Tampico railroad have left England.

Six wagons loaded with tools for the Sullivan Palmer railroad works at Marelia, have recently been dispatched to that place.

It is reported that the Tehauntepec Railroad company having raised the necessary funds a great impulse shall be given to the works on that line.

The railroad movement which has recently taken place in our country is so remarkable, that, according to the returns received at the department of public works, 1,097½ kilometres of railroad have been already built, and in every one of the different lines work is being carried on with the utmost activity.

The Mexican railroad, which runs between this capital and the Port of Vera Cruz, with branches to Pueblo and Jalapa, carried during the year 1879, 287,826 passengers, and 177,834½ tons of freight. During the year 1880, there has been a larger traffic, and the number of passengers amounted to 313 348, while the freight transported reached the amount of 223,859 tons and 315 kilogrammes [—City of Mexico, two Republics, April 8.

Grand Trunk, Georgian Bay and Lake Erie Railway.

A meeting of the bondholders of the Stratford and Huron Railway Company was held at Stratford, Ontario, on the 16th inst., to confirm the act of amalgamation with the Port Dover and Lake Huron Railway and the Georgian Bay and Wellington Railway, which was unanimously passed. The name of these roads is now changed to the Grand Trunk, Georgian Bay and Lake Erie Railway. The Directors of the Stratford and Huron Railway are taking active steps to complete their railway to Wiarton this fall. Over 200 cars of steel rails have already arrived, and track laying has been commenced. They expect to have the road through to Wiarton by the 1st of November next, in time for the fall trade.

The new short line railroad, extending from Savannah, Ga., to Jacksonville, Florida, known as the "cut-off," will be opened to the public on the 1st of May. It runs from Way Cross, Ga., a station on the Savannah, Florida and Western Railway, to Jacksonville, making a saving of time of eight hours compared with the old route. Passengers can go through from Savannah in six hours, the rails and rolling stock being of the best quality. The steamers of the Merchants and Miners' Transportation Company connect with this new line at Savannah.

The New York and Freehold Railroad Company has in course of completion a spur from the depot of the New Jersey Central branch of the Long Branch Railroad at Matawan, to Matawan Junction, and after May 10, all trains from New York will run through without change of cars to Freehold and Keyport.

The Soyran & Orenberg Railway bridge across the river Volga in Russia, just finished, cost $8,000,000. Where the bridge is built the river is more than a mile wide. The fourteen piers which support the girders are 100 feet above the mean level of the water, and the girders 364 feet long and 30 feet wide.

The track has been laid on the Richmond and Allegheny Railroad to Tye river, a distance of 107 miles from Richmond, which, together with 56 miles laid on the western division, makes a total of 163 miles of road completed within 12 months.

The construction of the Fort Scott and Wichita Railroad was commenced on the 26th inst. at Fort Scott, Kansas.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, April 28, 1881.

Money on call is 3@4½ per cent; on time 3@4 per cent; and on prime mercantile paper 4½@5 per cent.

The posted rates of the leading drawers of sterling are 4.84@4.86; the actual rates are 4.83@½ and 4.85@½. Cables are 4.85½@4.86.

The following is the text of the circular of the Treasury Department, relative to the modification of Circular No. 42 in reference to the extension of 6 per cent bonds at 3½ per cent per annum:

So much of Circular No. 42, dated April 11, 1881, as requires the bonds to be sent to the Secretary of the Treasury, in case they are to be continued, is hereby so modified that foreign holders of any of the 6 per cent bonds described therein may have them continued as therein provided, upon the receipt of the bonds at the government agency established for that purpose at the banking house of Messrs. Morton, Rose & Co., Bartholomew Lane, London, E. C., England, and the time during which the bonds may be received at that agency for continuance is hereby extended to May 20, 1881. In case the bonds are presented at the London agency the forms of request for their continuance must be executed in duplicate.

The chief of the bureau of statistics reports that the total values of the exports of domestic provisions, tallow and dairy products during the month of March, 1881, were $14,325,889, and during March, 1880, $12,530,260; for the three months ended March, 1881, $44,272,192, and for the same period in 1880 $31,321,090; the total values of the exports of provisions and tallow

during the five months ended March, 1881, $65,819,269, and during the five months ended March, 1880, $46,200,106; the total values of dairy products for eleven months ended March, 1881, $22,894,066, and for the eleven months ended March, 1880, $15,926,186.

The receivers of the Philadelphia and Reading Companies announce that, on May 2, they will pay six months' interest, to March 1st, on the receivers' certificates, for materials and supplies issued last September. They also announce that on May 1st, they will buy, at the rate of five per cent per annum, the May interest of the Schuylkill Navigation Boat and Improvement Loans then due.

The Governing Committee of the Stock Exchange have placed the stock of the reorganized Indiana, Bloomington and Western Railway, $8,500,000, on the regular list. The committee also listed the first mortgage bonds of the Gulf, Colorado and Santa Fe Railway Company, amounting to $2,712,000.

The statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie for March, 1881, as compared with the same month in 1880, shows an increase in gross earnings of $566,118, an increase in expenses of $278,140, an increase in net earnings of $287,978. The three months of 1881, as compared with the same period in 1880, show an increase in gross earnings of $822,820, an increase in expenses of $768,357, increase in net earnings of $54,463. All lines west of Pittsburg and Erie for the three months of 1881 show a surplus over liabilities of $966,927, being a decrease as compared with the same period in 1880 of $82,192.

The closing quotations on Thursday were: Adams Express, 129½@130; American Express, 78@78¾; American District Telegraph, 60¼@60¾; Atlantic and Pacific Telegraph, 46@48; Chicago, Burlington and Quincy, 161@164½; Canada Southern, 74⅞@75¼; Chicago and Northwestern, 122@122¼; do. pref., 133@136; Central Pacific, 86⅝@86¾; Chicago, Milwaukee and St. Paul, 112⅛@112¼; do. pref., 124½@125; Chicago, Rock Island and Pacific, 135½@136; Cleveland, Columbus, Cincinnati and Indianapolis, 87@88; Columbus, Chicago and Indiana Central, 24⅞@25; Delaware and Hudson Canal, —@108⅝; Delaware, Lackawanna and Western, 117⅜@117½; Hannibal and St. Joseph, 58⅜@58⅝; do. pref., 104⅜@104½; Illinois Central, 136⅛@136½; Lake Erie and Western, 50@52; Lake Shore and Michigan Southern, 125@125⅛; Metropolitan Elevated, 83½@83¾; Manhattan Elevated, 23¼@23½; Michigan Central, 107⅝@107¾; New York Elevated, 107½@108; New York, Lake Erie and Western, 46¾@46⅞; do. pref., 87⅝@88; New York Central and Hudson River, 144¼@144½; Ohio and Mississippi 43⅝@43¾; Ohio Central, 29¼@29⅜; Pacific Mail, 51⅞@52; St. Louis, Alton and Terre Haute, 55½@56; do. pref, 128@129; Texas and Pacific, 60⅛@60¾; Union Pacific, 117@117½; United States Express, 61¾@62½; Wells Fargo Express, 117½@118½; Western Union Telegraph, 116⅛@116⅝; do. ex. div., 81⅛@81⅝; Wabash, St. Louis and Pacific, 47⅜@47½; do. pref., 87⅞@88.

Philadelphia and Reading "Blanket" Mortgage.

In the United States Circuit Court, Philadelphia, on the 27th inst., Judges McKennan and Butler made the following decree restraining the issue of the "blanket" mortgage bonds by the Philadelphia and Reading Railroad Company :

"And now, on this 27th day of April, 1881, it is ordered and decreed that until the final hearing of this case, or until further order of this court, the defendant corporation and the other defendants, and each of them, are, and they hereby are, enjoined from executing this mortgage upon the property of the company for $150,000,000, as mentioned in the bill, and from executing any bonds or obligations secured by such mortgage upon the property of the company, and from doing any act toward the carrying out of the scheme of an issue of bonds or obligations as a part of an issue or issues, amounting in the aggregating to $150,000,000, to be secured as set forth in the bill and the exhibits thereto attached."

Judge McKennan informed counsel for F. B. Gowen that the decree did not deprive him of the right to present any new plan to the court for the financial reorganization of the company.

The certain success of the Treasury policy of refunding is shown by the fact that it has become necessary to send two loan experts to Europe to take charge of the exchange of six per cents for the stamped three and a half per cents. It was thought that although the plan might be successful in this country, the foreign holders would prefer have their bonds redeemed, but the advices at the Treasury from Europe show that the holders of our bonds there cannot find any European investments which offer the same security at any better rate of interest than three and a half per cent.

The Elevated Railway which has been built by the Pennsylvania Railroad Company from its Depot in West Philadelphia to New Depot at Fifteenth and Filbert streets, Philadelphia, will be opened for freight traffic on the 2d of May.

The stockholders of the Connecticut Valley Railroad Company, at a meeting held in Hartford on the 23d inst., voted to accept their amended charter, and to extend their road northward to Springfield and Holyoke. The work upon the extension will be begun about the middle of May. The newly organized company which represents $750,000 of the original $1,000,000 first mortgage bonds, has taken a legal assignment of these bonds, and holds them subject to all rights under the mortgage.

Judge Gresham, of the United District Court, Indianapolis, Ind., has ordered the sale of the Fort Wayne, Muncie and Cincinnati railway to satisfy the first mortgage bonds, etc., concerned in the suit brought by Thomas for Taylor, the sale to be made within sixty days after notice by the commissioner.

The deed of transfer of the Cairo and Vincennes Railroad Company from Joseph W. Drexel and E. E. Tracey, of New York, has been filed in the office of the County Recorder at Vincennes, Ind. The deed is a quit claim in consideration of the sum of $1 and was executed December 24, 1880.

The officers of the St. Louis and San Francisco Railroad have organized the Rogers and Eureka Springs Railway Company, to build a road from Rogers to Eureka Springs, twenty-five miles. The road will be built as soon as possible.

A telegraph cable, one and a half mile in length, was successfully laid on the 20th inst. between Brockville, Canada, and Morristown, N. Y., for the use of the Canada Pacific and Utica and Black River Railroad Companies.

It is expected that the New York Canals will be opened by the 5th of May, though possibly the opening may be deferred until the 10th.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN,
General Superintendent.

JNO. N. ABBOTT,
General Passenger Agent.

ABOUT COAL AND THE FIRST GEOLOGICAL STATE SURVEYS.

"Johnny Boquet" in his last Sunday's chat in the Tribune says: "It was a Connecticut Yankee, of course, who first put Pennsylvania's anthracite coal in his fire and used it: Obadiah Gore, in 1768, many years before it could be given away. But as long ago as 1830 bricks were burnt by refuse from coal yards on the North River. That refuse 50,000,000 tons in extent, is now subject to the operation of Mr. Wootten's patent, igniting it by an air blast, propelled by a jet of steam.

"It was in 1832, the year of the opening of railroads, that geological societies were established in France and Pennsylvania, but the first States to be surveyed geologically were Tennessee, South Carolina and Massachusetts. Had the New York geologists who bestowed names on the rock systems in 1836 lived today, and belonged to some of the political appointment machines, we might have had not only Mount Dix and Mount Colfax, but the Morgan sandstone, the Conkling Old Red, and the Tilden sub-carboniferous.

"'Pennsylvania in combination with Western Maryland,' wrote Rogers in 1838, 'holds the key to American geology, the entire series of formations, 40,000 feet of depth of strata, coming several times in succession to the surface.' This makes more than seven miles of bread-crust to our pie. The learned and industrious Dane, Martin H. Boye, who originally inspected the country between the Delaware and Schuylkill, long afterward taught ungrateful pupils in the High School at Philadelphia.

"James D. Whelpley was the Bonemian genius of the survey, the first perfect topographical geologist of America. Dr. R. M. S. Jackson, afterward Surgeon-in-Chief of the Army of the Cumberland, where he died,—also of a Bohemian turn,—discovered in 1838 that the brown hematite ore beds belonged to the stratified limestone and had been set free by decomposition. Rogers kicked at this assertion; everybody turned up his scientific nose. But it was found years afterward, that Jackson was correct; that the magnetic ore was sediment, not lava. In 1839 ores began to be smelted by a Boston man at Pottsville and a Welshman at Allentown, with anthracite coal—a great feat in that day. It killed the Bostonian, Lyman, with anxiety, but Thomas of Wales, survived, and after eighty years of age remained an anthracite iron patriarch. In 1840 the American geologists made a society, Massachusetts, Vermont, New York, Pennsylvania, Delaware and Michigan being represented."

CASTING A HUGE CYLINDER.

The cylinder which was recently cast at the Morgan Iron Works of John Roach and Son, in this city, and which is said to be the largest steamship cylinder in the world is described as follows by the Times:

What is declared to be the largest steam-engine cylinder in the world was cast yesterday afternoon in the Morgan Iron Works of John Roach & Son, at the foot of East Ninth street. It is 18 feet long, 9 feet 2 inches in diameter, and required for its casting 45 tons, or 90,000 pounds, of gun metal. It is intended to accommodate a piston stroke of 14 feet. The metal in the thinnest part is 1¾ inches thick, and the flanges at the top and bottom are 2⅝ in. thick by 5¾ in. wide. Under the top flange, the cylinder has a belt 16 inches wide, another 6 inches wide above the bottom flange, and between these two three more belts, each 6 inches in width. The thickness of the metal at the belts is 2⅛ inches. A nozzle for the upper steam-chest is cast on the cylinder, with an opening 14½ by 63 inches, the metal on the top of this nozzle being 1¾ inches in thickness, and on the sides and bottom 1½ inches. The casting of this massive piece of work was done in a mould constructed of brick, and lined with loam, the outside being covered with heavy iron plates to prevent the matrix from bursting when the molten metal was poured in. The mold is constructed of one cylinder of brick and loam within another, the space between them being the required thickness of the casting, the flanges, belts, and other parts of the work being accurately delineated in the matrix. Over half the mold was sunk in the solid earth which forms the flooring of the iron works. It required the metal three hours and twenty minutes to melt, and the 90,000 pounds were then transferred by the labor of 100 men to two huge tank-ladles, each having a capacity of about 15 tons, and two large crane ladles. The tanks were connected with the mold by pipes, and the crane ladles were attached to huge cranes.

At one o'clock, John Roach, who personally supervised the casting, gave the order to begin the pouring. The molten metal was turned into the mold from the two tanks on either side, and at the same time the two crane-ladles were swung over, and from all four a red stream of liquid metal began to flow into the matrix. The air in the room became so heated that it was with great discomfort that the few gentlemen invited to witness the casting were able to remain. Among the guests was Mr. Borden, the agent of the Old Colony Steam-boat Company, and according to his timing it took precisely two and half minutes to complete the pouring and fill the mold. The operation was watched attentively by Mr. Roach and his foreman, and when it was completed, both pronounced the casting to have been successful. It will require about ten days for the metal thoroughly to cool, and for several days it will remain red hot. When perfectly solidified, the upper part of the mold will be demolished, and the cylinder will then be dug from its resting place in the ground. It is intended for the engine of a new iron side wheel steamer.

THIS week the mile and a quarter of railroad, extending from the 155th Street station of the Sixth Avenue Elevated Railroad to High Bridge was opened for traffic for the first time. It is really the opening of the portion of the new route between New York and Boston via Brewsters, over the New York and New England line. The Tribune gives the following account of the city approaches of the route: "Starting from One Hundred and Fifty-fifth street, the trains proceed on an elevated track for a short distance, and after

crossing a drawbridge over the Harlem River, strike the surface tracks of the New York City and Northern Railroad. The drawbridge is a very tasteful structure, and unlocked, swung and locked by steam. It is said that the bridge can be swung in ten seconds, but half a minute will be allowed for swinging it each way. The large steamboats up the river will have hinged smoke pipes, so that with the quickness of the draw but little delay in the traffic by rail is anticipated. On Sunday trains were run to High Bridge every twenty minutes during the morning, and every six minutes from 1 o'clock to 1.30. The cars and engines used were a part of the Second Avenue Elevated Railway equipment, and were hired by the New York City and Northern Railroad for the occasion, and to run to Brewster's, a distance of 51 miles. Passengers going north do not need to leave the platform at One Hundred and Fifty-fifth street, but those going south are compelled to descend the stairs on one side and ascend them on the other to reach the trains on the elevated road. A bridge is soon to be built to remedy this inconvenience."

Mexican Railway.

A dispatch dated Mexico, April 29, says it is understood there that the Mexican Government has sold to an American Company its interest in the railway from Vera Cruz to the capital.

The affairs of this road are administered by the Mexican Railway Company incorporated in England under the Limited Liabilities Act in 1862. It was commenced under concessions to Don Manuel Escandon and his associates in 1857 and 1861, and by the eighth clause of the articles of association 4 per cent of the net profits of the company are secured in perpetuity to Mr. Escandon and his assigns in each year after the payment of a dividend of 8 per cent to the shareholders. Mr. Escandon is no longer living, but his heirs are represented on the direction of the company by William Barron, Esq. The authorized capital of the company on the 31st December, 1877, was as follows :

Shares	£6 266,060
Bonds and loans	4,184,069
Total	£10,450,129

Of this amount had been received and expended £6,080,594, or in round numbers $10,000,000. The length of road operated is—

	Miles
Main line	293
Jalapa line	70¼
Total	363¼

The gross receipts and expenses were as follows :

	Receipts.	Expenses.	Balance.
Main line	£305,480	£151 591	£153,880
Jalapa line	7,851	7,831	52

The Government interest in this railway appears in all the statements of the company in the following form :

£800,000 "Inalienable shares," being 40,000 of £20 (or $100 each), representing the Government "subscriptions, and untransferable in perpetuity." How the transfer of these "untransferable" shares can have been effected, remains to be seen. It will be observed, however, that the lines of the company are working at a profit, though the lines were constructed at an expense of more than $100,000 a mile.

Philadelphia and Reading Companies.

The following is the monthly comparative statement of gross receipts, tonnage and passengers of the Philadelphia and Reading Railroad Company for the month of March, 1881 and 1880 :

	1881. Month.	1881. Years to date.
Gross receipts :		
Railroad traffic	$1,526,268 30	$5,362,417 50
Canal traffic	15,380 09	21,520 01
Steam colliers	51,435 62	204,051 02
Richmond coal barges	7,484 40	22,170 85
Total Railroad Co.	$1,600,568 41	$5,610,159 38
Reading Coal & Iron Co	924,539 49	3,445,425 53
Total of all	$2,525,107 90	$9,055,584 81
Tonnage and passengers :		
Tons of coal on railroad	604,799.12	2,183,549.13
Tons of merchandise	533,921.15	1,823,412.05
Passengers carried	759,748	2,904,883
Coal transp. by steam colliers	48,194.00	157,871.00
Tons of coal mined :		
By Coal and Iron Co	283,874 05	950,493.06
By tenants	107,604.15	419,529 16

Shenandoah Valley Railroad.

Contracts have been let by the Shenandoah Valley Railroad Company for the construction of 65 miles of the 95 mile extension southward from Waynesboro to the Norfolk and Western Railroad. The contractors will begin at the ends and work toward the middle. The parts covered by the new contracts are from Waynesboro' 40 miles south, and from the Norfolk and Western, at or near Roanoke Station, 25 miles north. Mills & Rowland, McMahon & Green, Griffith & Purcell, Fairfax & Diffendal, Reynolds & Angel, Newcomb & Goodloe, Best & Munchler, Walton & Smith, Patrick Cogan and John Rawlings are among the contractors receiving awards. The work is to be finished in October. It is quite possible that it will be all the construction necessary for the main line of the Shenandoah Valley road. Forty miles from Waynesboro' the road can strike the Richmond and Alleghany's Lexington branch, and by a trackage arrangement with the company use its rails to its junction with the main line at Balcony Falls, and from there follow the main line of the Richmond and Alleghany up James river as far as it is in the same line, which will bring it near to Buchanan. The contracts for building north from the Norfolk and Western cover all the ground necessary to meet the Richmond and Alleghany at Buchanan.

Norfolk and Western Railroad.

In the United States Circuit Court, Norfolk, Va., on the 3d inst., Judges Bond and Hughes presiding, M. F. Pleasants, Master, submitted his report to the effect that he had received the purchase money of the Atlantic, Mississippi and Ohio Railroad from Clarence H. Clark and others amounting to $8,505,000, certificates of deposits for which he turned over to the Court as follows: Union Trust Company of New York, $5,000 000 ; Fidelity Trust Company of Philadelphia, $3,200,000 ; Exchange National Bank of Norfolk, $305,000. He reported also, that he had delivered a deed to the said Clarence H. Clark and others, conveying to them all the property of the Atlantic, Mississippi and Ohio Railroad. The Court confirmed the report of the master.

The purchasers held a stockholders' meeting on the same day, and reorganized the company under the name of the Norfolk and Western Railroad Company, with the following Board of Directors : George F. Tyler, Clarence H. Clark, F. J. Kimball, Edward A. Rollins, George C. Clark, Robert Minturn, Philadelphia ; C. C. Baldwin, H. Victor Newcomb, W. B. Isham, C. D. Wrod, New York ; U. L. Boyce, Boyceville, Va. ; John B. Whitehead, Norfolk, Va. ; J. Arthur Johnson, Petersburg, Va., and Charles W. Strahan, Lynchburg, Va. The officers are : George F. Tyler, president ; F. J. Kimball, first vice president ; Henry Fink, second vice president, and general manager ; G. R. W. Armes, secretary ; W. G. MacDowell, Treasurer, and E. E. Portlock, auditor.

Wm. Friedlander brought an action in the Court of Common Pleas against the New York Central and Hudson River Railroad Company for $20,000 for injuries claimed to have been received by falling from the platform of the railroad station at Morrisania. It was shown on the part of the defence that Friedlander was walking on the platform two hours after the last train had left New York. The Judge dismissed the complaint, holding that the company owed Friedlander no special duty in the premises, and that it was not negligent to have no lights burning on the platform after the last train had passed.

The surveys for the new route of the Baltimore and Ohio Railroad between Baltimore and Philadelphia are expected to be completed by June 1. Three parties are at work—one surveying from Havre de Grace south, one from Port Deposit north, and the other from Wilmington north.

New York, Saturday, May 7, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

OVER sixty thousand immigrants arrived at this port in April, and the arrivals so far this year amount to about 105,000, an excess of 25,000 over the same period last year.

THE daily average of transactions in the New York Petroleum Exchange is 700,000 barrels; on April 9th of last year the day's transactions reached the enormous amount of 4,000,000 barrels. It is estimated that the world's consumption is not less than 45,000 barrels of crude oil per day.

FOR the convenience of foreign holders of United States six per cent bonds desiring them continued at three and one-half per cent. Secretary Windom has established an agency in London, at the banking-house of Morton, Ross & Co., Bartholomew Lane. The time during which the bonds may be received at that agency is extended to May 20 and the forms of reqnest for continuance must be executed in duplicate.

IT is estimated that under favorable circumstances more than one thousand miles of railroad will be built in Iowa this year, and the scarcity of help which was complained of in that State last year, is said by the local press to exist this season. It is only just, however, to the thousands of emigrants who are landing here weekly as well as to Eastern laborers seeking the West, that reports concerning a scarcity of labor or a probability of it in one quarter or another should be made with the utmost caution. In the past much suffering has been occasioned by unwarranted reports that laber was in great demand in certain localities. There promises to be offered a generous amount of employment to honest industry in many parts of the West this summer by both the railroads and the farms, and a wise direction of labor to the localities needing it is of the greatest importance.

THE tide of immigration that is pouring into Texas is unparalleled in the history of immigration in the States of the Southwest; it being estimated by railroad officials that an average of 1,000 immigrants daily are passing through the cities of Texarkana and Dennison intending to locate in that State. Information is sought from many sources concerning the inducements offered by Texas for investment and settlement. To such an extent has this information been sought of late that one of the leading publishing houses of this city, A. S. Barnes & Co., have been warranted in issuing four important books on Texas, one of which, "The Texas Scrap Book," gives many facts and statistics of general interest concerning Texas and its people, while another the "Two Thousand Miles on Horseback in Texas," contains a description of the natural resources and attractions of the country. Two other books, "A brief History of Texas" and the "Flora of Texas" while being primarily text books are of special value to settlers and land owners. These books are indications of the importance which Texas immigration is assuming not only from a business standpoint, but from a literary and educational as well, and their publication now is peculiarly significant and timely.

AN important work was commenced over in Ravenswood, L. I., opposite the upper part of New York, this week with very little ado, though if carried out its completion is destined to have a strong influence upon the locating on Long Island of New Yorkers seeking homes over there; it was the commencement of work upon the bridge to be built across the East River from the vicinity of Seventy-sixth street to Ravenswood. The building of this bridge has been considered for a long time but only until recently has there seemed a strong probability of the idea being carried out in the near future. On Monday workmen began sinking a coffer dam at Ravenswood preparatory to building the piers. The bridge is to be 2,052 feet long and will have one pier on the New York side, two on Blackwell's Island and one on the Ravenswood side. The longest span will be that between Seventy-sixth street and Blackwell's Island, 734 feet; the span over the island will be 700 feet long, and the span from the Island to the Long Island shore 618 feet. The piers are each to be 180 feet high. The contracts require that the bridge shall be completed within three years, and the cost is placed at $5,000,000. It is said that one-half of the stock has been subscribed for in this country, the remainder to be offered in London.

The Pardee Car Works.

Extensive additions have recently been made to the buildings and machinery of the Pardee Car Works, Watsontown, Pa., and a still further enlargement of capacity is now underway. The works of this rapidly growing enterprise are said now to cover about ten acres of land in which are situated a foundry, machine shop and several other shops for both iron and wood working; for the company in addition to turning out almost every description of railroad car (other than passenger coaches) from a mail car to a hand car also manufactures Kelley's patent turn-tables, centers for wooden turn-tables and a great variety of railroad forgings and rolling-mill castings. The firm name of the proprietors of these extensive works is Pardee, Snyder & Co. Limited. Ario Pardee, Sr., is chairman of the association; Oliver Leiser, Secretary; Henry F. Snyder, Treasurer and General Manager; T. W. Frederick, Superintendent of the car department, and Harry D. Heiser, Superintendent of the machinery department.

The company gives employment to nearly two hundred men. The works can turn out six or eight box cars daily in addition to the large amount of other work done. An important department of the works is that in which an extensive business is done in general machinery, outside of the specialty of rolling stock for railroads. The Williamsport Gazette and Bulletin in a recent article describing the works says:

They are shipping machinery of various kinds to all parts of the United States. On Friday last they shipped two turn-tables to the Kentucky Central railroad company; and they are about shipping to Minneapolis a patent gang lath machine; to Spartanburg, South Carolina, a patent shingle machine; and one also to Montpelier, Vermont. They have just made a shipment of saw mill machinery to Orange, Texas. In brief, in relation to the future prospects of this fine industrial establishment, it is a very easy matter for those acquainted with the abilities of Messrs. Pardee, Snyder & Co., to predict that in a few years, their works, large as they are, will be increased to at least three times greater than is their present capacity.

Railroad Companies' Expresses.

Judge BAXTER, of the U. S. Circuit Court, Cincinnati, in rendering his decision on the 28th ult. in a case in which the plaintiff sought to recover from the Ohio and Mississippi Railroad the value of a package intrusted to its express department and lost in transit, questioned the right of a railroad company to engage in express business. He said substantially that the express business embraced manifold functions, with the collection and delivery of freight, the collection of notes and drafts, and the transmission of the proceeds, the conveyance of money and bullion, &c., which

are beyond the charter privileges of a railroad. The Ohio and Mississippi Railroad Company was conducting an express business without legal authority and without the consent of the court, and could properly be restrained, he believed, from further continuance therein. He intimated that if a case were properly brought before him he would restrain the Ohio and Mississippi Railroad from doing an express business, and upon being told by counsel for the receiver of the road that the express business had been authorized by an order of the Court issued long ago, said he would grant counsel a week, or until the return of Mr. King, the receiver, to find such order. If it was found he would revoke it. The road was in the hands of the Court. Its charter does not authorize it to do an express business, and the receiver, who was a mere agent of the Court, could not exceed the power granted in charters.

Organization.

Matthew Bolles and L. S. Judd have been elected directors of the Boston, Revere Beach and Lynn Railroad Company via C. W Slack and T. B. Dix.

The Secretary of State of Illinois has licensed L. Ferre, J. L. White, T. F. Harwood, Asa H. Moore, W. W. Tuttle and William S. Brownell, to organize the Blue Monday Mining Company of Chicago, with a capital of $2,000,000.

The officers of the Pemberton and Hightstown Railroad Company, elected on the 28th ult., are: President, Col. Nathaniel S. Rue; Vice President, Col. James W. Allen; Secretary, James L. Rue; Treasurer, Collen B. Meirs.

Articles of incorporation have been filed in the office of the County Clerk of the "Eureka Mining Company of Montana;" capital stock, $400,000, divided into 200,000 shares; trustees, James G. Godfrey, Seth D. Godfrey, Edward A. Wood, Maddens Firth, Jr., and John Henry Hull.

At the annual meeting of the Little Rock and Fort Smith Railroad Company, at Little Rock, Ark., on the 28th ult., all the old board of directors was re-elected except T. H. Perkins, of Boston, who is succeeded by F. Gordon Dexter. J H. Converse was re-elected President, and Jesse Turner Vice-President.

The Little Rock, Mississippi River and Texas Railway Company, at its annual meeting on the 28th ult., elected Elisha Atkins of Boston, President, and G. S. Daniels Treasurer. Messrs. Redfield, Winchester, Atkins, Dexter, Penzel, Griffith, Wilkins, Tillor and Pendell were elected directors J. A. Woodson was reappointed Superintendent.

The officers of the Allegheny Valley Railroad Company elected on the 27th ult., are: President, John Scott; Secretary and Treasurer, T. F. Robinson; Auditor, T. F. Brown, General Superintendent, David McCargo; Superintendent of River Division, Thomas M. King; Superintendent of Low Grade Division, C. A. Jackson; General Freight Agent, E. H. Utley.

The Austin and Northwestern Railroad Company filed its charter in the office of the Secretary of State of Texas on the 29th ult. The road is to run from Austin through the counties of Travis, Williamson, Burnet, Lampasas, San Saba, McCulloch, Coleman, Runnels and Taylor, with a branch to Rio Grande. The organization of this company was given in our last issue.

At a meeting of the directors of the Pittsburg and Connellsville Railroad Co., held in Pittsburg on the 25th ult., J. B. Washington was elected Treasurer and George A. Borry, Director in place of C. Donnelly, resigned. J. B. Washington was elected President of the Mount Pleasant and Broad Ford Railroad, in Mr. Donnelly's place. John King Jr., and Robert Garrett were present at the meeting.

At the recent annual meeting of the Sibley Manufacturing Company, held in Augusta, Ga., the capital stock was increased from $600,000 to $1,000,000. The following directors were elected: W. C. Sibley, J. Sibley, H. H. Steiner and C. Estes, of Augusta; M. F. Foster, of Langley, S. C.; Samuel Keyser, of New York, and W. Smith, of Cincinnati. W. C. Sibley was elected President of the company.

The Illiana Coal Company has been organized with a capital of $50,000, all subscribed for by parties interested in the Indianapolis, Decatur and Springfield Railway Company, to work the extensive coal lands contiguous to that line. W. R. Sands is the President, A. Duprat, Treasurer, and Charles E. Billin, General Manager. The company owns and controls bituminous coal lands, and the work of shafting is now being pushed.

Articles incorporating the New York and Western Telegraph Company, with a capital of $1,500,000, was filed with the Secretary of State at Albany on the 29th ult. by David B. Maxwell, Edmond F. Oldham and John H. Miller. The line will run from New York to New Jersey, Pennsylvania, Ohio, Indiana, Michigan and Illinois, with a branch from Buffalo. Articles incorporating the Gramme Electrical Company with a capital of $1,500,000 have also been filed.

T. S. Sprague, of Detroit; A. Dowen, of Plainfield; J. W. Spray, of Jefferson, Ill.; R. S. Mallory and Wm. B. Thompson, of Chicago, have been licensed by the Secretary of State of Illinois to organize a Trans-Continental Railroad of Illinois, with a capital of $1,680,000. The object is to build a railroad from a point on the Wabash River in Crawford County, Ill., through Crawford, Jasper, Effingham, Fayette, Bond, Madison and St. Clair counties, to or near the City of East St. Louis.

Articles of incorporation were filed in the office of the County Clerk on the 29th ult., for the following named companies: The Louisiana Mining Company; capital stock, $1,000,000, divided into 200,000 shares; trustees, Julius Levy and eight others. The North American Silver Mining Company; capital stock, $500,000, divided into 500,000 shares of $1 each; trustees, Abel D. Breed and ten others. The Cincinnati Silver Mining Company; capital stock, $500,060, divided into 500,000 shares of $1 each; trustees, Abel D. Breed and ten others.

At a meeting of the stockholders of the Ohio Southern Railroad Company, held at Springfield, Ohio, on the 2d inst., the following Board of Directors were elected: B. S. Henning, Austin Corbin, J. R. Maxwell, Henry Graves, Dumont Clark, Alfred Sully, of New York; D. S. Kelly, Amos Whitley, George H. Frey, J. H. Downey, Ford Woods, of Springfield, Ohio, H. L. Chapman, of Jackson, Ohio. At a subsequent meeting Major Henning was elected president. This will be the connecting link in the Indiana, Bloomington and Western system with the Chesapeake and Ohio Railway.

The Texas Western Railway Company have filed articles of incorporation with the Secretary of State of Texas. The incorporators are: A. M. Gentry, W. D. Cleveland, B. A. Botts, W. R. Baker, F. A. Rice, E. Pillot, H. S. Fox, T. H. Scanlon, J. G. Tracy, F. W. House and S. K. McIlhenny, of Houston. The road is to commence at Houston and run westerly to a point on the Rio Grande at or near Presidio del Norte and from a point on the main line in Blanco County in a northwesterly direction to the north line of Sherman County; from the main line in Fayette County to the town of Badrox; from a point on the main line in Caldwell County to San Antonio and from Houston in an eastern direction to Sabine Pass. The capital stock is $30,000,000, in $100 shares.

At the annual meeting of the stockholders of the Texas and St. Louis Railway Co., held at Tyler, Texas, on the 27th ult., the following board of directors was elected: J. W. Paramore, Wm. Senter, J. L. Sloss of St. Louis; Logan H. Roots, Little Rock; L. C. Demoss, C. M. Seeley, T. J. Lowe, T. R. Bonner and Wm. A. Gavitt of Tyler. The board re-elected John W. Paramore, President; W. M. Senter, Vice-President; G. W. Brown, General Superintendent; Charles T. Brown, Secretary; H. G. Askew, Auditor; C. F. Stephens, Chief Engineer; William A. Gavett, General Freight and Passenger Agent, and R. B. Hubbard, General-Attorney. The board authorized the extension from Waco to the Rio Grande and Texarkana to Cairo.

The directors of the Chicago, Texas and Mexican Railroad Company are: Daniel H. Hale, Amos T. Hall, Ferdinand W. Peck, John T. McAuley, Chicago; Jules Schneider, S. J. Adams, Col. L. H. Fitzhugh, Dallas; Thos. P. Robb, Chicago; Jas. B. Simpson. The officers are: Daniel H. Hale, President; Amos T. Hall, Vice-President; Arahel F. Bennett, Secretary; C. B. Hale, Treasurer; J. Duncan Smith, Financial Director and Agent for the bond-holders, Edinburgh, Scotland; George W. Waite, Chief Engineer; D. K. Tripp, Solicitor; J. B. Simpson, Resident Attorney at Dallas; T. P. Robb, Superintendent of right of way and donations of lands and money; Wm. H. Hale, Local Treasurer at Dallas. Work on the 27 miles of this road southwest of Dallas, recently contracted for, has been commenced.

The Secretary of State of West Virginia has issued a certificate of incorporation to the West Virginia and Ohio Mineral Railway Company, formed for the purpose of operating a railroad in Maryland, from a point on the boundary line between Virginia and West Virginia, near Sweet Springs, Marion county, through the counties of Monroe, Summers, Mercer, McDowell, Wyoming, Logan, Lincoln, Wayne, and Cabell, to the Ohio river, at or near the mouth of the Big Sandy river or Guyandotte river. The amount of capital is placed at $10,000, with a privilege of increasing the same to $5,000,000; the shares are 100 in number, and the par value is $100. The following gentlemen are the corporators: A. C. Houston, M. J. Kester, J. D. Logan, J. H. Leach, and M. P. Diddle, all of Union; W. W. Pence, Indian Creek; S. Y. Lynns, of Linside; C. F. Neel, of Gap Mill; S. A. Houston, of Pickaway, and R. T. McNeer, of Salt Sulphur Springs, all of Monroe county.

Appointments on the Pennsylvania Line.

General Passenger Agent Ford of the Pennsylvania Company has announced the following appointments: Robert Emmett, District Cc., Terre Haute and Indianapolis Railroad Co., and Passenger Agent for the P. C. and St. Louis railway, the Jeffersonville, Madison and Indianapolis railroad. His office will be at Indianapolis, Ind., and his district will include all territory within the following described circle of cities and towns: Logansport, Frankfort, Colfax, Crawfordsville, Union, Terre Haute, Vincennes, Evansville, New Albany, Jeffersonville, Madison, Lawrenceburg, Hamilton, Richmond, Winchester, Ridgeville, Portland, Decatur (Ind.), Bluffton, Wabash, North Manchester, Denver and Peru.

Frank M. Caldwell is appointed District Passenger Agent of the Pittsburg, Cincinnati and St. Louis Railway Company, with his office at Columbus, Ohio. His district will include all territory within the following described circles of cities and towns; Richmond, Hamilton, Morrow, Batavia, Newport, Portsmouth, Gallipolis, Pomeroy, Parkersburg, Marietta, Cambridge, Newcomerstown, Mt. Vernon, Galion, Marion, Bellefontaine, Sidney, St. Marys, Mercer, Decatur, Portland, Riageville and Winchester.

Personal.

Mr. and Mrs. Cyrus W. Field are on their homeward voyage from Europe.

George Arens, of this city, has been elected President of the Vicksburg and Meridian Railroad Company.

George B. Markle, for several years an active director in the Lehigh Valley Railroad Company, has gone to Europe to spend the summer.

J. S. Oliver, late of the Chicago and Northwestern railroad has accepted the position of General Manager of the Wheeling and Lake Erie railroad.

J. C. Gault, has returned from Florida and resumed his duties as General Manager of the Wabash, St. Louis and Pacific Railway, much benefitted by his winter in the South.

George Dexter of Albany is said to be the only survivor of the party of 40 that went down the Hudson River in September, 1807, on the trial of Robert Fulton's Clermont, the first steam vessel on the Hudson.

The Cincinnati Commercial is quoted as saying that Stanley Matthews never earned a dollar in any corporation controlled by Jay Gould and never received a dollar of fees from any Pacific Railroad Company.

Andrew Crumlish, recently deceased at Wilmington, Del, was an extensive contractor for railroads during the war of the rebellion. He built the Chester branch of the Philadelphia, Wilmington and Baltimore Railroad, and was also the contractor for the Delaware Western Railroad.

Commissioner Fink has published an able argument, showing the benefits which are derived by the public as well as by the railroads from the pooling system. Mr. Fink, in this and in other articles on railroad management, has given much valuable information to the public on the railroad question.

The Tribune gives expression to the universal American sentiment concerning an eminent statesman and diplomatist in speaking editorially as follows of Sir Edward Thornton: A great many people in Washington and New York will hear with mingled feelings of regret and gratification that it is possible that Sir Edward Thornton is to be promoted to the British Embassy at St. Petersburg. No one will grudge to this eminent diplomatist and accomplished gentleman an honor which he has so fairly won; but his departure will deprive the Diplomatic Body at Washington of a Dean whose wisdom and tact have gained their fullest confidence and esteem, and will take from the society of the Capital a family which is regarded with as much affection as respect. In a dozen years of service he has made no mistakes, and has merited the highest approbation of his own Government by his zeal and fidelity, while gaining the regard of three successive Administrations in this country by his unfailing candor and loyalty. Happily for both nations, our relations with England are now so friendly that they cannot suffer by the transfer of Sir Edward Thornton to a post of more immediate and special importance, and his well known diplomatic abilities will find in the troubled capital of Russia a field for their fullest exercise. He will be succeeded here, according to the reports which reach us from London, by Sir Austin Henry Layard, whose fame, not only as a diplomatist but as the profound scholar and energetic explorer who brought to the light the long-buried remains of Ninevah, will insure for him a cordial welcome, and whose many admirable social qualities make him the legitimate heir of the popularity of Sir Edward Thornton.

Interest and Dividends.

At a meeting of the Board of Directors of the Pennsylvania Railroad Company, held at their office in Philadelphia on the 2d inst., a semi-annual dividend of four per cent was declared payable on and after the 28th of May to stockholders of record on the 30th of April. The following resolutions relating to the allotment of new stock were passed:

Resolved, That the treasurer be and he is hereby instructed to give notice that the stockholders will have the privilege of subscribing at par to the stock of this company in the proportion of 12½ per cent of the number of shares registered in their names April 30, 1881, and those entitled to a fraction of a share can subscribe to a full share. All subscriptions must be made and paid for in full prior to June 15, 1881, and no subscription will be received after that date. The privilege of taking new stock may be sold by any shareholder, and a blank form of allotment will be furnished upon application.

Resolved, That the officers of the company be and they are hereby authorized to issue certificates for the shares of stock subscribed and paid for in accordance with the foregoing resolution.

The Pullman Palace Car Company has declared its fifty-fifth quarterly dividend of 2 per cent, payable May 16th at the Farmers' Loan and Trust Company, New York; New England Trust Company, Boston; Company's office, Chicago.

The New York, Providence and Boston (Stonington Line) Railroad Company has declared a quarterly dividend of 2 per cent, payable May 10 at the office of Messrs. M. Morgan's Sons, No. 39 William street.

The Belleville and Southern Illinois Railroad Company has declared a dividend of $2 75 per share on the preferred stock, payable May 6.

The Nashua and Lowell Railroad has declared a dividend of $4 per share, payable May 2.

The Boston Equipment Company has declared a semi-annual dividend of 5 per cent, payable May 2.

Removals.

Cammann & Co., bankers and brokers, have removed from their old location 8 Wall street to 9 Pine street.

W. W. Sharpe & Co., advertising agents, have removed from 25 Park Row to 21 Park Row.

E. N. Erickson, advertising agent, successor of Peaslee & Co., has removed his offices from 5 Beekman street to 231 Broadway.

The gross earnings of the Philadelphia and Erie Railroad for the month of March, 1881, were $285,572 84, the gross expenses $177,676 41, and the net earnings $107,896 43. For the three months of 1881 the net earnings were $233,569 79 against $296,146 26 for the first three months of 1880, a decrease of $32,576 47.

The Baltimore and Ohio Railroad Company will build a short two mile road from the Morrell coke works of the Cambria Iron Company, in Fayette county, Pa., to the Pittsburg Division, at a point near Gibsonville, above Connellsville, to enable the Cambria Iron Company to get their coke from their furnaces. The right of way has been secured, and the line will cost $10,000, as a new bridge will have to be built over the Youghiogheny.

Midland Railway.

At the annual meeting of the stockholders of this company, held at Port Hope, Canada, on the 19th ult., the report was presented showing the receipts for the past year to have been $338,-084, or $74,857 more than during the preceding year, while the working expenses were $186,580, or $35,155 less. $262,235 had been expended on capital account during the year in the purchase of steel rails, new rolling stock and improvements upon permanent way, but the consolidated and preference bonds in possession of the company will not only provide for the orders which have been given for additional rolling stock, but leave a considerable sum for capital expenditures. The President, in moving the adoption of the report, stated that he had every confidence the revenue for 1881 would fully meet the entire interest and obligations of the company. Large expenditures had been made in erection of elevators and other works at Port Hope and Midland, but the nature and extent of these works were such that they could not be fully completed before August or September; too late for this season's business. Efforts would have been made to complete them earlier in the season, but it was already quite apparent that the largely increased local business on the line would tax the rolling stock to its utmost capacity, and would, without any through trade, show a large increase over the very extraordinary business of 1880, while the importance of the through trade is daily increasing, and will, in future years, add largely to the revenue and importance of the line.

It was decided in the United States Supreme Court on the 2d inst., in the case of John S. Williams et al. vs. the State of Louisiana et al., and in the case of Harrison Durkee et al. vs. the Board of Liquidation of the State of Louisiana, that the bonds issued by the State of Louisiana under the act of April 20, 1871, to the New Orleans, Mobile and Texas Railroad Company were void, because they were in excess of the indebtedness to which the State was limited by the constitutional amendment of 1870.

At Wheeling, West Virginia, on the 2d inst, in the case of the Chesapeake and Ohio Railway Company vs. J. S. Miller, Auditor of West Virginia, Judge Melvin delivered an opinion refusing to dissolve the injunction heretofore granted restraining the assessment and collection of taxes on the property of the road. The effect of this decision is to sustain the position of the company that its property is exempt from taxation under the original act of incorporation.

Messrs. Fowler & Lummis, of Philadelphia and Camden have been appointed chief engineers of the Philadelphia, Marlton and Medford Railroad. This is an important branch of the Camden and Atlantic Railroad, commencing at Haddonfield. Two miles of rails are laid, and the road will be pushed to completion as soon as possible.

Navigation was resumed on the Rideau Canal on the 2d inst.

Mutual Union Telegraph.

At a meeting of the Mutual Union Telegraph Company, of which Henry O. Evans is President, held in this city on the 22d ult., it was resolved to increase the capital stock to $10,000,000, and to extend their lines to most of the great cities in the North and West. The company's wires now extend from Boston to Washington, touching New York, Philadelphia and intermediate cities. The present capital consists of the money invested in those existing lines. With the increase of capital now resolved on, the company proposes to extend its wires to Albany, Rochester, Buffalo, Cleveland, Toledo, Chicago, Milwaukee, St. Paul, Minneapolis, Kansas City, St. Louis, Indianapolis, Cincinnati, Columbus, Pittsburg, and Louisville, and other cities in the circuit embracing those centres. The managers of the scheme claim that the extensions they are to make will cover about nine-tenths of the paying district or territory covered by the wires of the Western Union Company.

Great Western Railway of Canada.

DIRECTOR'S REPORT.

The usual statements of account for the half year ended Jan. 31, 1881, are herewith submitted to the Proprietors.

The receipts and expenditure on revenue account compare with those of the corresponding half year ended January 31, 1880, as follows.

	Jan. 31, 1880.	Jan. 31. 1881.
Gross receipts	£461,140	£513,042
Working expenses, including the usual transfers to reserve funds	283,740	315,536
	£177,400	£197,506
Interest on bonds and debenture stock, leased lines, revenue balances, and all net revenue charges	98,190	98,734
	£79,210	£98,772
Balance from the previous half year	*6,260	†847
Surplus	£72,950	£99,619

*Dr. †Cr.

This surplus of £99,619 is further increased by a sum of £9,246, being the amount of dividend declared out of the profits for the year 1880 on the Detroit, Grand Haven, and Milwaukee shares held by this company, making a total balance available for dividend of £108,865.

The directors recommend the payment on May 7 of the half year's dividend on the 5 per cent preference stock, amounting to £12,644, and a dividend on the ordinary shares of 6s. per share free of income tax (being at the rate of 8 per cent per annum), which will require a sum of £91,547, leaving to be carried forward to the next half year's account a balance of £4,674.

The total gross receipts of the main line and branches, exclusive of leased lines, exhibit an increase over the corresponding six months of last year of £51,902 or 11¼ per cent.

The freight and live stock tonnage carried during the past half year amounted to 1,185,096 tons against 1,041,532 tons in the corresponding half year, an increase of 143,564 tons, or 12¾ per cent. The receipts from this traffic amounted to £386,659 and £291,524 respectively, an increase of £45,135, or 15½ per cent.

The revenue expenditure has exceeded that of the corresponding half year by £41,680, but this amount includes a comparative outlay for renewals of £9,884 in excess of the estimated average amount required, which has therefore been charged against the renewal funds, reducing the net increase on the half year to £31,797, or 11¼ per cent.

The result of the half year's working on the whole system, after providing for interest on bonds and debenture stock, shows a net balance of £98,772, as compared with £79,210 in the corresponding half year, an improvement of £19,562, or nearly 25 per cent.

The following statement gives a comparison of the operations of the company for the years ending January 31, 1880 and 1881, which cannot fail to be interesting to the shareholders, as it shows at a glance the material progress made during the past 12 months.

	Year ended Jan. 31, 1880.	Year ended Jan. 31, 1881.
Gross earnings per 12 months	£826,911	£950,476
Working expenses, including transfers to funds	560,710	616,765
	£266,201	£333,711
Interest on bonds and debenture stock, loss on leased lines, and all net revenue charges	197,162	201,879
	£69,039	£131,832
Add dividend on Detroit, Grand Haven and Milwaukee shares	.....	18,493
Balance for dividend on preference stock and ordinary shares	£69,039	£150,325

Hence with an increase in gross traffic of £123,565 the working expenses show an excess of £56,054, and the net revenue charges of £4,717, while the net balance for dividend has increased from £69,039 for the year 1879 to £131,832 for the year 1880, an improvement of £62,793, or 91 per cent. Including the dividend received on the shares of the Detroit, Grand Haven and Milwaukee Company, the surplus revenue was £150,325 for the year ended January 31, 1881, showing an increase over the previous 12 months of £81,286, or 118 per cent. The following table shows a comparison by the earnings and working expenses per train mile for the last six corresponding half years:

Half years ended Jan. 31,	Earnings per train mile.	Working expenses, excluding reserve and other funds. Per train mile.	Per cent. of gross receipts.
	s. p.	s. p.	
1876	5 7	3 11¼	70.99
1877	4 9	3 8¼	78.14
1878	5 2¼	3 3¾	68.19
1879	4 11¼	3 2¼	64.88
1880	5 5¼	3 4¼	61.77
1881	5 5¾	3 5¾	63.49

The alterations in the several reserve funds during the half year have been as follows:

	Balance July 31, 1880.	Debit or credit during the half year.	Balance Jan. 31, 1881.
Ferry steamers renewal fund	£25,568	Cr. £1,587	£27,155
Locomotive renewal fund.	118,029	Dr. 2,763	115,266
Car renewal fund	25,763	Dr. 7,336	18,426
Rail & bridge renewal fund	32,577	Dr. 14,299	18,278
Insurance fund	2,055	.....	2,065
Leased lines suspense account	Dr. 42,739	Cr. 1,761	Dr. 40,978
	£161,253	£21 050	£140,208

The total charges to capital account amount, less credits, to £7,775. Terminal bonds amounting to £67,400, of which £58,900 bearing 7 per cent and £8,500 6 per cent interest have been redeemed. On the other hand, 5 per cent perpetual debenture stock amounting to £61,500 has been issued during the half year. By this operation a sensible saving in interest has been effected.

The working of the leased lines for the half year, including interest on the bonds of the London, Huron and Bruce and the Brantford, Norfolk and Port Burwell railways, has resulted in a loss of £14,196, an increase of £2,364 over that of the corresponding half year. It will be observed that this increase is in a great degree attributable to the large expenditure for maintenance of way still found to be necessary on the Wellington, Grey and Bruce line. The additional traffic interchanged with the Wellington, Grey and Bruce Company has amounted during the half year to £23,108. A sum equal to 20 per cent thereof, or £4,622, has under traffic agreements to be invested in the bonds of that company at par on July 1, next.

WABASH, ST. LOUIS AND PACIFIC RAILWAY.

In the Directors' report accompanying the accounts for the previous half year it was announced that a working agreement had been made with the above Company, which was to be substituted for that then in force upon the completion of the branch railway between Butler and Detroit. This agreement practically gives running powers to the Wabash Company over the Great Western main line and to the Great Western over the Butler road and a portion of the Wabash system, each Company providing the motive power on its own road at a fixed charge, based upon a liberal estimate of the cost, any balance remaining from the mileage proportion of the through rates to be divided, after certain other specified deductions, between the two Companies. The agreement will be submitted to the Shareholders for ratification at the special meeting advertised to be held on the termination of the business of the ordinary meeting. It has already been ratified by the Proprietors of the Wabash, St. Louis, and Pacific railway. The Directors are informed by the President of the Wabash Company that this new line, the completion of which has been retarded by an early and extremely severe winter, will be opened in May next, and they confidently anticipate that important benefits will result from this powerful south-western connection.

GRAND TRUNK RAILWAY.

If the relations between the Grand Trunk and this Company had undergone no change for the better they have not altered for the worse; and there would appear no adequate reason why they should. The geographical position, the policy, the business, of the respective Companies are, in the main, so widely dissimilar that any grave difference between the Companies would be most irrational. Notwithstanding this, however, an agitation for a so-called amalgamation has been again revived; it is understood to have originated with certain speculators deeply interested in Grand Trunk stocks, who have been canvassing for votes, not only in London, but in Liverpool, Manchester, and Glasgow. Yet, so far as your Directors know, they have advocated no special course which they would recommend the Great Western Shareholders to follow. Neither they nor the Grand Trunk Board have approached the Board of the Great Western with any proposal whatever, or with the faintest suggestion for improving the relations between the two Companies. It is impossible, therefore, to resist the conclusion that, whatever the plan, it has not been projected in the interests of the Great Western Shareholders. The idea that the Proprietors would give their vote to people who hesitated openly to declare themselves and their plans seemed impossible to the Directors. Nevertheless, at the request of many who thought otherwise, the Directors issued a short circular on the 9th March. The language of this document, as applied to the Board of the Grand Trunk, might perhaps have seemed strong-

er than was necessary, but it should be remembered that it was not possible to dissociate them from the agitation, inasmuch as, without their co operation, it could have had no existence. A short correspondence has taken place between the two Boards relative to this circular, which will be found in the appendix. Sir Henry Tyler, the President of the Grand Trunk Company, has also indited a memorandum, dated 22nd March, which he is reported to have read to some gentlemen of the Stock Exchange whom he had invited to the Grand Trunk Offices for the purpose, in which he affects to answer your Directors' Circular. It is impossible, however, to regard this pamphlet as a serious expression of the views of the Grand Trunk Board, inasmuch as it credits them with ignorance of a former breach of faith, the details of which were before them at the time the memorandum was penned; and with having "no object in endeavoring to convince the Great Western Shareholders" of the accuracy of the estimated "saving of upwards of £200,000 per annum," although such had been directly challenged. And even the meeting appears to have generally entertained a doubt whether the terms of fusion suggested by that document had been seriously considered. But supposing the Great Western Shareholders desired a fusion, it would be a suicidal act on their part to make any such arrangement at present, for the following reasons. In a short time the connection with the South-west, hitherto inaccessible to the Great Western, will, by means of the Wabash, which operates 2,500 miles of road in that direction, be complete. The Detroit, Grand Haven, and Milwaukee, which connects the Great Western with the Chicago, Milwaukee and St. Paul, operating nearly 4,000 miles in the North West, is by no means as yet fully developed. And it is only within the last month that the Ontario and Quebec Railway Bill has become Law, the effect of which will be the construction of a road in direct competition with the Grank Trunk, over a district in which they have hitherto had a monopoly, while it will open the whole length of the Dominion east of Toronto to the Great Western, giving them access, independent of the Grand Trunk, to the Ports of Montréal, Quebec, St. John, and Halifax. It is to be observed with reference to this latter connection that, while the revenue of the Great Western may be considerably increased thereby, that of the Grand Trunk must be very seriously reduced. With this general expression of opinion, that grave disaster would result to this Company, were the present agitation to prove successful, the Directors leave the matter to the judgment of the Proprietors.

DETROIT, GRAND HAVEN AND MILWAUKEE RAILWAY.

The Directors have much pleasure in reporting that the revenue of the Detroit, Grand Haven, and Milwaukee continues to improve satisfactorily. The accounts of that Company for the half year ended 31st December, 1880, after crediting the usual amounts to the various reserve funds, and making provision for the interest on the whole of the bonds, guaranteed by this Company, show a net revenue surplus of $127,371. From this amount the Detroit, Grand Haven and Milwaukee Company have carried $71,966 to a revenue suspense account, to be applied as may hereafter be determined, and have declared a dividend of 3 per cent on the share capital, amounting to $45,000, leaving a balance of $10,405 to be carried forward to the next year's accounts. The Directors mentioned in their last half year's report that the capital provided under the reorganization of the Company would probably be sufficient to meet the ordinary requirements, and the experience derived from the subsequent working of the line confirms the correctness of this statement. In order, however, fully to develop the traffic, further capital will be required to meet the cost of improving the boat service across Lake Michigan, and to provide facilities at Detroit for the traffic of the Wabash Company on the completion of the Detroit and Butler line. With a view of enabling the Detroit, Grand Haven, and Milwaukee Company to raise funds for these purposes on the most economical terms, and to make provision for increased rolling stock as required, a resolution will be submitted at the special meeting empowering the Directors to make such advances as they may deem expedient to that company, by way of temporary loans or by the guarantee of loans otherwise obtained, to an amount not exceeding £150,000. The Great Western Company will derive, both directly and indirectly, considerable advantage from this arrangement.

On behalf of the Board of Directors.

FRANCIS G. GRAY, President.

London, 8th April, 1881.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending April 23, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad...	124,289	2,545,858	2,559 983
Schuylkill Canal....	8,015	31,345	89,546
Lehigh Valley.....	91,299	1,950,529	1,600,549
Del., Lack. & Western.	59,838	1.164,648	1,018,332
Shamokin Valley....	20,708	298,307	245,577
Central New Jersey.	53,138	1,109,911	961,262
United R. R. of New Jersey.....	26,069	455,170	317,329
Pennsylvania Coal ..	21,928	815,545	265,479
Delaware and Hudson	45,670	1,006,195	968,150
Huntingdon & Broad Top Mt.....	4,951	138,854	145,568
Penn. and New York.	23,733	500,853	439,464
Clearfield, Pa.....	56,926	689,173	870,118

The total tonnage of anthracite coal from all the regions for the week ending April 23, as reported by the several carrying companies, amounted to 421,913 tons, against 394,029 tons in the corresponding week last year, an increase of 27,884 tons. The total amount of anthracite mined for the year is 7,808,807 tons, against 6,467,355 tons for the same period last year, an increase of 840,952 tons. The quantity of bituminous coal sent to market for the week amounted to 107,562 tons, against 82,003 tons in corresponding week last year, an increase of 25,559 tons. The total amount of bituminous mined for the year is 1,396,410 tons, against 1,102,659 tons for the corresponding period last year an increase of 293,751 tons. The total tonnage of all kinds of coal for the week is 529,475 tons, against 476,032 tons in corresponding week last year, an increase of 53,443 tons, and the total tonnage for the coal year is 8,704,717 tons, against 7,570,014 tons to same date last year, an increase of 1,134,703 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending April 23 was 174 267 tons, of which 122,214 tons were coal and 52,053 tons coke. The total tonnage for the year thus far has been 2,755,289 tons, of which 1,977,438 tons were coal and 777,851 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended April 23 were 42,756 tons, and for the year to that date 516,991 tons, a decrease of 19,553 tons as compared with the corresponding period last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 32,142 tons; year, 430,080 tons; decrease as compared with 1880, 186 tons. Chesapeake and Ohio Canal—week, 9,516 tons; year, 34,233 tons; decrease as compared with 1880, 8,137 tons. Pennsylvania Railroad—week, 918 tons; year, 52,678 tons; decrease as compared with 1880, 11,229 tons. The Reading Railroad coal shipments for last week, ending April 30, were 213,500 tons, of which 39,000 tons were sent to Port Richmond and 37,000 tons shipped thence, and 19,800 tons were sent to Elizabethport and 10,500 tons shipped thence.—[Phila. Ledger, May 2.

The Cambria Iron Company, of Johnstown, Pa., has taken $400,000 of the traffic bonds of the Somerset and Cambria Railroad Company, for which they furnish steel rails.

At a meeting held at Parkersburg, W. Va., on the 28th ult., the legal formalities for effecting an organization of the Wheeling, Parkersburg and Charleston Railroad Company were complied with; books were opened, a certain amount of stock was subscribed, a board of directors, president, secretary and treasurer were elected, and the first annual meeting of the company appointed for the 19th of May, 1881. Mr. D. R. Neal was elected president of the board of directors, and the survey of the road will be commenced at once.

The new Delaware State Loan was awarded on the 3d inst. to T. A. Biddle & Co., of Philadelphia at 103.90. The bonds aggregate $715,000, bearing 4 per cent interest and are for the purpose of refunding the outstanding bonded debt of the State, with the exception of $156,750 which was funded at 6 per cent for the benefit of the free school fund.

The blast furnaces along the line of the Chesapeake and Ohio Railway in the Virginias are in blast and working satisfactorily as to quantity and quality of yield. Quinnemont averages 28 tons daily, Low Moor 2,600 tons per month, Callie furnace 18 tons daily, Longdale (two furnaces) 80 tons daily.

Both branches of the Baltimore City Council have passed the ordinance to suspend the further increase of the sinking fund of the ten million or Baltimore and Ohio Railroad loan of 1853-4, which will mature in 1890.

The stockholders of the Lynn and Boston Horse Railroad Company have voted to increase the capital stock of the company $100,000 in order to cover the cost of new extensions and equipment.

Contracts have been made for the extension of the New Castle and Franklin Railroad from Buffalo to Brocton, and from Irvington to Salamanca. The road was purchased by Thomas P. Simpson on the 13th of April for $775,000.

The Umatilla, an iron freight and passenger steamer built for the Oregon Steamship Company, was successfully launched at Chester, Penn., on the 30th ult. She is 331 feet long, 40½ feet beam and 25 feet depth of hold.

The Southern Branch of the Central Railroad of New Jersey, between Sandy Hook and Long Branch which has been closed since November last, was re-opened for travel on the 2d inst.

A railroad between Florence and Burgettstown, in Washington county, Pa., is projected, which will give an outlet to the coal fields in that section.

The Mason Machine Works of Taunton, Mass., shipped two handsome locomotives to Wheeling, W. Va., on the 29th ult.

Trains are now running on the new double track of the West Jersey Railroad between Camden and Gloucester.

The Toronto and Nipissing Railway is about to lay down another rail and adopt the standard gauge of 4 feet 8½ inches.

Northern Central.

The following is a comparative statement of the earnings of the Northern Central Railway Company for the periods mentioned :

Month of March.	1881.	1880.
Gross earnings	$452,906	$415,325
Operating expenses	257,214	275,270
Net earnings	$195,692	$140,055
Three months ended Mar. 31.	1881.	1880.
Gross earnings	$1,221,719	$1,080,679
Operating expenses	751,015	702,425
Net earnings	$470,704	$378,254

Statement of the Public Debt of the United States, May 1, 1881.

DEBT BEARING INTEREST.

	Amount Outstanding.	Accrued Interest.
6 per cent. bonds, 1881 (Oregon,) 1861	$868,200 00	$13,764 00
6 per cent. 1881 bonds, 1861	140,544,650 00	2,810,893 00
6 per cent. 1881 bonds, 1863	55,145,750 00	1,102,915 00
5 per cent. funded loan of 1881	458,022,950 00	5,700,286 87
4½ per ct. funded loan of 1891	250,000,000 00	1,875,000 00
4 per ct. funded loan of 1907	738,622,700 00	2,462,075 67
Refunding Certificates	725,100 00	2,417 00
3 per cent. navy pension fund, 1868	14,000,000 00	140,000 00
Aggregate of debt bearing interest	$1,655,749,350 00	$14,107,351 54
Interest due and unpaid		2,710,492 76

DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.

	Amount Outstanding.	Interest due and unpaid.
4 to 6 per cent. old debt, 1837	$57,665 00	$64,174 51
6 per cent. Mexican indemnity stock, 1846	1,104 91	85 74

Totals	$64,623,512 00	$1,292,470 24

Interest paid by United States, $49,528,566 66; interest repaid by transportation of mails, &c., $14,247,370 02; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $34,625,997 77.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, April 30, 1881.

WILLIAM WINDOM,
Secretary of the Treasury.

According to the statement of the Comptroller, the debt of the city of New York on the 1st inst. amounted to $133,918,919 87, not including $1,046,414 79 for revenue bonds issued in anticipation of taxes. The amount in the sinking fund for the redemption of the City debt was $39,978,518 20. The bonded debt of the annexed district, not included in the above figures, was $918,500. The total amount of warrants drawn against the City Treasury from Jan. 1 to May 1 was $11,489,984 21. During the same period $5,966,170 21 of stocks and bonds were issued including $207,500 for docks and slips, $116,000 for the Brooklyn bridge, $115,000 for public works and $4,454,100 for current expenses.

The Atchison, Topeka and Santa Fe Railroad Co. is now running trains to Las Cruces, N. M. Las Cruces is 1500 miles from St. Louis, and fifty miles from El Paso. It expects to reach the latter place about June 15.

The Peninsula (Md.) Railroad Company are prepared to start at once in the construction of a continuation of the road from Pocomoke to Pungoteague.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, May 5, 1881.

The quotation for call loans this morning was 3@4½ per cent, and 3@4 per cent on time. Prime mercantile paper, 4@4½ per cent. Later in the day the quotation for call loans was 4 per cent, and at the close 3@3½ per cent.

The posted rates for prime bankers' sterling were 4.85@4.87. The actual rates 4.84¼@¼, and 4.86¼@½. Cable transfers, 4.86¾@4.87; and prime commercial bills, 4.83@¼.

The following circular relative to the payment of bonds included in the one hundred and first call was issued by the Treasury Department on the 30th ult:

"Notice is hereby given that on and after Wednesday, May 4, 1881, the five per cent funded loan bonds of 1881 included in the 101st call will be paid at the Treasury of the United States, in the city of Washington, with interest from May 1 to May 21, the date of the maturity of the call. The interest due May 1, 1881, on such registered bonds embraced in the 101st call as have not been redeemed will be paid as usual by checks drawn to the order of the payees of the bonds. All bonds forwarded for redemption should be addressed to the 'Secretary of the Treasury, Loan Division, Washington, D. C.,' and all registered bonds should be assigned to 'The Secretary of the Treasury, for redemption.' Where parties desire checks in payment for registered bonds drawn to the order of any one but the payee they should assign them to 'The Secretary of the Treasury, for redemption, for the account of ——' (here insert name of person or persons to whose order the check should be made payable)."

The following circular, approved by the President, has been issued by the Treasury Depart-

ment to collectors and other officers of the customs:

In pursuance of section 2,866 of the revised Statutes of the United States, the port of Richford, in the State of Vermont, is hereby designated as a port from which imported merchandise may be shipped in bond in transit through the United States, to and from the Dominion of Canada, by such routes and under such regulations as the Secretary of the Treasury may prescribe.

The preferred shares of the Norfolk and Western Railroad Company have been admitted to dealings at the Philadelphia Stock Exchange This is the stock of the reorganized Atlantic, Mississippi and Ohio Railroad.

The Pennsylvania Railroad Company has declared a semi annual dividend of four per cent, payable in cash on and after May 28. The shareholders will also have the privilege of subscribing at par to the stock of the company in the proportion of 12½ per cent of the number of shares registered in their names April 30, 1881, and those entitled to a fraction of a share can subscribe for a full share. All subscriptions must be made and paid for in full prior to June 15 next, and no subscriptions will be received after that date. The privilege of taking new stock may be sold by any stockholder, and blank forms of allotment will be furnished upon application at the company's office.

The statement of the public debt of the United States, given in another column, shows a decrease during April of $9,690,900 25, and a decrease since June 30, 1880, of $78,099,601 96. The interest bearing debt amounts to $1,655,749,350; debt on which interest ceased since maturity, $5,701,865 26; debt bearing no interest, $418,794,432 92; total debt, $2,080,248,648 18; interest, $17,555,241 01; gold and silver certificates, $56,642,740; United States notes held for redemption of certificates of deposit $8,295,000; cash balance available May 2, 1881, $159,647,357 59; total cash in the Treasury May 2, 1881, $233,731,195 81. The total debt less cash in the Treasury is $1,864,072,663 38.

A special cablegram to the Toronto Globe, dated London, April 28, says: "A Grand Trunk meeting was held to-day. Sir Henry Tyler, Chairman, considered that the carefully prepared statistics of the Company showed conclusively its satisfactory position. The report was unanimously adopted. The Board of Directors, supported by the proprietors, came to the conclusion that so long as the Great Western is bound by the agreement which it proposes to make with the Wabash and St. Louis and Pacific, it is better for the Grand Trunk in its own interest to decline to consider any arrangement for fusion with the Great Western."

A special dispatch from London, Eng., to the Toronto Globe, dated April 26, says: "A meeting of the Great Western Railway Company was held to-day. Col. Grey, the Chairman, speaking of the fusion, said the estimated saving of £200,000 yearly was greatly exaggerated, and that fusion, except that of the capital of the two companies, would be illegal. The saving by the absence of competition would be very slight, as there was very little competition. It was unadvisable that any terms of fusion should be entered into between the two companies at the present time. The meeting was unanimous against fusion."

The Fourth Street Extension of the Wilmington (Del.) City Passenger Railway has been completed from Market Street to the Philadelphia, Wilmington and Baltimore Railroad.

☞ PENNSYLVANIA RAILROAD COMPANY,
TREASURER'S DEPARTMENT.

PHILADELPHIA, May 2, 1881.

The Board of Directors have this day declared a Semi-Annual Dividend of FOUR PER CENT. on the Capital Stock of the Company, clear of all taxes, payable in cash on and after May 28 to stockholders as registered on the books at 3 P. M., April 30, 1881.

On May 28, dividends will be paid to women only; after that date, they must await their turn with other stockholders.

The Board have also instructed the Treasurer to give public notice that the stockholders will have the privilege of subscribing at par to the stock of the Company in the proportion of TWELVE AND ONE-HALF PER CENT. of the number of shares registered in their names April 30, 1881, and those entitled to a fraction of a share can subscribe for a full share. All subscriptions must be made and paid for in full prior to June 15, 1881, and no subscriptions will be received after that date. The privilege of taking new stock may be sold by any stockholder, and blank forms of allotment will be furnished upon application.

JOHN D. TAYLOR,
Treasurer.

OFFICE OF THE ONTARIO SILVER MINING CO., No. 18 WALL ST., NEW YORK, May 5, 1881.

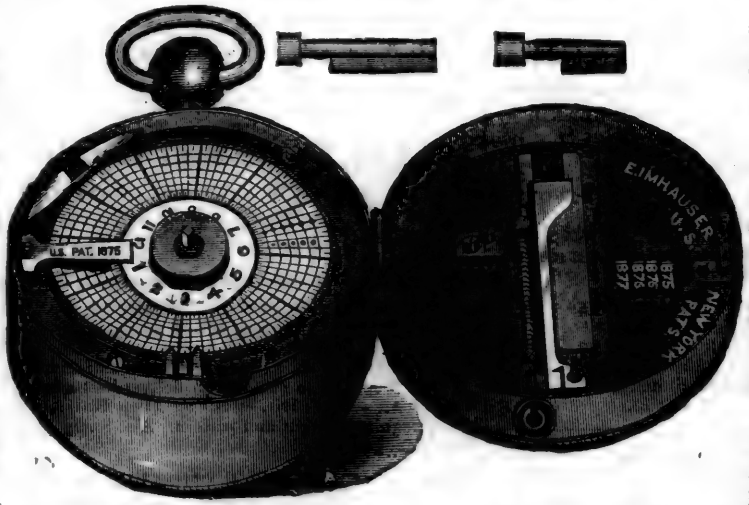
PEERLESS MANUFACTURING CO

108 LIBERTY ST., NEW YORK.

PATENTED FEBRUARY 18, 1879.

Manufacturers of all kinds of Rubber Goods for Railways and Steamships.

WIRE-COVERED SUCTION HOSE,
WIRE-COVERED AIR-BRAKE HOSE,
DIAPHRAGMS FOR AIR-BRAKES,
RUBBER-MATS AND STAIR-PLATES.



☞ SEE METROPOLITAN ELEVATED RAILWAY.

NOTE.—The Wire-Covered Suction Hose has been adopted by the N. Y. City Fire Dept., and the Wire-Covered Brake by the N. Y. & N. H. R. R. and others. Mention this paper.

WATCHMAN'S

NEW IMPROVED TIME DETECTOR

NEW SAFETY LOCK ATTACHMENT.

Important and invaluable for all concerns employing watchmen. Send for circular.

Beware of Infringement.

Patented 1875, 1876 1878 and 1880.

This instrument is supplied with 12 different keys for 12 stations in or outside of the buildings. Invaluable for all concerns employing night watchmen.

SPECIAL NOTICE.—The "Imhaeuser" referred to by Buerk is the late firm of Imhaeuser & Co., consisting of three persons, and has nothing whatever to do with this firm of E. Imhauser.

Send for circulars to **E. IMHAUSER, 212 Broadway, New York.** P. O. Box, 2875.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (CONN.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

HON. LEVI P. MORTON.

An interesting sketch of Mr. Morton, and an attractive picture of his home life is given as follows by the Washington Republic:

"Mr. Morton is now nearly fifty-seven years old, and no man in Congress has had a busier life. Mr. Morton is a lineal descendant of George Morton, one of the Pilgrim fathers who came to these shores in the ship Ann in 1623. His father was a clergyman in New Hampshire, a frugal, careful, pious man, who saved souls and brought up a large family in the best style on a salary no larger than his son now pays his coachman or butler. Six hundred dollars a year fifty years ago in New Hampshire was more, dear reader, than you or I will ever get out of as many thousands; but on six hundred a year this hardy old clergyman brought up a family of six children and gave every one of them an academic or classical education. The subject of this sketch was named for his mother's brother, Levi Parsons, the first American missionary to Palestine. His early life was that of many an American boy who has, like him, achieved a name in the world. He had to look after himself, and even as a boy he set his standard before him and decided to be something more (or less) than a professional man. He decided that he would devote his life to business, and at twenty years of age he found himself in a New Hampshire country store. Here he remained five years, when he extended his field to Boston, where he was very prosperous. Then he went to New York, where he started in the banking business. Here he laid the foundation of the great firms of Morton, Bliss & Co., of New York, and Morton, Rose, & Co., of London, whose ramifications are world-wide.

Mr. Morton came to Congress as a diversion, but he has found that the office, if conscientiously administered, is full of hard work and responsibility. Personally, he is one of the most popular man in Congress on both sides of the chamber. He is tall and thin, with an immense head that falls forward from the shoulders like a full head of wheat. His forehead is high, his expression thoughtful. He wears mustache and side whiskers, brown, like his hair, and slightly sprinkled with gray. He dresses in extreme good taste, and is beyond question a distinguished-looking man. He is the smoker of good cigars, the cater of good dinners, and the driver and rider of the best horses that money can buy. His wife's equipages are the handsomest at the Capital.

The house of Mr. Morton in this city has long been famed for its hospitality. It was occupied for some time by President Andrew Johnson after Mr. Lincoln's assassination, and for many years it was the property of Samuel Hooper, of Boston, while that gentleman was in Congress. His breakfasts and dinners were the talk of the town. After Mr. Hooper died the house was occupied by one of the Adams family of Massachusetts. It was purchased by Mr. Morton when he became a member of the House. It is a square, double house of brick, with stuccoed front and sides and outside blinds. Marble steps and a fine portico lead into an ample hall, on the right of which are as handsome parlors as the city affords. They are furnished with taste and richness, with pretty ornaments and works of art from every quarter of the globe. On the left of the hall is the private work-room and library of Mr. Morton—leather chairs, copying presses, books on finance, records of debates, and tables and desks filled with papers, and cases filled with books, and clerks and secretaries hard at work, much like the office of any high public officer with independent means. Back of this is the spacious dining-room, under whose carved table have reposed the boots of Presidents, princes, foreign Ministers, statesmen, poets, jurists, artists, authors and politicians, and the delicate slippers of most of the famous ladies in the land. On the floor above is a most important room—the nursery, with four of the prettiest little girls, blonde hair, rosy cheeks and sparkling eyes, that ever shamed a bachelor. People turn to look at them in the street, they are so conspicuously beautiful. They are from two to seven years of age. Mr. Morton has no sons.

"Fair Lawn," the villa of the Mortons at Newport, is one of the most beautiful on Bellevue-ave. In syle it is strictly Tudor, the same so frequent in those choice localities among the lakes and mountain districts of England. The variety of its sky-lines, obtained by a careful composition of clustered chimneys, gabled roofs and pointed finials, is in harmony with the landscape around it, while broad verandahs, bay windows and greenhouses serve to assist its irregularity of outline on the ground and to relieve the monotony of formal and unsympathizing walls. The lawn is one of the loveliest in the world, and the grounds are well laid out. From the upper windows of the villa is a beautiful view of the ocean. "Fair Lawn" is admirably arranged for entertaining a large company.

Mr. Morton is an admirable French scholar, and takes with him to his new office every qualification to make his mission a most successful and popular one. He also takes with him, for himself and family, the best wishes of the people of Washington."

THE IRON CENTER OF THE UNITED STATES.

In speaking of the iron center of our country and the production of iron and steel last year the Iron Age says: "This center is the point at which equilibrium would be reached were the country taken as a plane surface, itself without weight, but capable of sustaining weight, and loaded with its production of iron and steel, each ton exerting pressure on the pivotal point directly proportioned to its distance therefrom.

"The center of production of iron and steel in the United States in the census year 1880, was found to be at 40° 43′ north latitude and 79° 20′ longitude west from Greenwich. This point is in the State of Pennsylvania, on the boundary line between Armstrong and Indiana counties, 12 miles northeast of Apollo, 12 miles west of the town of Indiana, and about 40 miles northeast of Pittsburgh, Laufman & Co.'s rolling mill at Apollo being the nearest iron works. At the center of production thus ascertained iron has never been manufactured in any form. It is interesting to note, however, as showing the changes that have taken

place in ironmaking localities, that some years since considerable iron was made in Armstrong county in the neighborhood of Kittanning. The county now has three rolling mills.

"It will be noted for the locality named that Pittsburgh was very near the center of the iron manufacture of the United States in the census year. It is more than probable that the improvements in progress in the West and at Pittsburg will move this center the present year very near the Smoky City. As it is, Allegheny county produced more tons of iron, &c., in the census year, than any State in the Union, with the exception of Pennsylvania and Ohio, and was less than 100,000 tons behind the latter. It produced a little less than 13 per cent of all the iron made in the country, and a little less than 24 per cent of the iron made in Pennsylvania.

"At no place in the country has there been so much activity in increasing the capacity of iron works since the census year closed as at Pittsburgh. Several rolling mills largely increased their puddling capacity. The Isabella and Lucy furnaces have added fire-brick stoves to their plant, one of the Edgar Thomson large furnaces has blown in, and the construction of two new furnaces has been begun. In Bessemer, the works of the Pittsburgh Bessemer Steel Company, Limited, have started, and a new plant has been begun by the Pittsburgh Steel Casting Company, while the Edgar Thomson Steel Company are adding a 15 ton converter."

Gigantic Locomotives.

The Philadelphia Times says that ten giants for the Pennsylvania Railroad Company will be built at Altoona this summer, and then addds:

They will be much larger and more powerful than ordinary passenger engines, and are to be built for the particular purpose of making up time on portions of the road where there are long stops On the fast run between New York and Philadelphia, for instance, the time allowed is so short that when there are unusual stops letting off and getting on passengers the ordinary engine cannot make it up. Hence a monster locomotive, known on the road as "No. 10," has been built as an experiment and tried on different trains to see what can be done. The result has been satisfactory, but there are many improvements that suggest themselves which will be carried out in the construction of the other heavy engines that are to follow. In the slang of the railroad yard, No. 10 is known as "Long-legged loco." This comes from the big driving wheels she rides upon, which stand six feet and six inches above the rails, or higher than a tall man with a silk hat on. She has two pairs of drivers forged for her by Herr Krupp, the famous cannon maker. In this is supposed to have been solved the highest aim that can be sought in a locomotive—to pull the heaviest trains over all grades against stiff winds and with the least possible liability toward hot boxes or low steam on the quickest schedule time. Her engineer says "she goes like a bird and rides like a rocking-chair." Ever since it has been running this engine has been making a mile in fifty-seven seconds on up grade, with a long train in tow, without getting heated. She makes more than a mile a minute and "keeps cool." Of course there is a great consumption of fuel. In 180 miles 12,000 pounds of coal are used up. The water-tank contains 3,000 gallons—400 more than is usually carried. Everything also is on a proportionately large scale. Only the delay in getting boilers sufficiently large has prevented the completion of two others of nearly the same pattern.

A large bed of kaolin of the best quality has been discovered on the Richmond and Danville Railroad, near Bon Air, Va. Already the fire brick manufacturers in Philadelphia have ordered three vessel loads of two hundred tons each of the newly discovered kaolin.

Iron and Steel Rails.

The Secretary of the American Iron and Steel Association has succeeded in obtaining from the manufacturers complete returns of the production of iron and steel rails in the United States for the year 1880. This, according to his report, far surpassed the production of any previous year. It reached the enormous quantity of 1,461,837 net tons, or 1,305,212 gross tons, which is 31 per cent more than the production of 1879, in which year 1,113,278 net tons, or 993,993 gross tons, of iron and steel rails were made. The rail product of 1880 was composed of 954,460 net tons of Bessemer steel rails, 493,762 tons of iron rails, and 13,615 tons of open hearth steel rails. The total production of Bessemer steel rails was 270,496 net tons or 40 per cent more than that of 1879; the production of iron rails was 78,602 tons, or 18 per cent more; and the production of open-hearth steel rails was 4,466 tons, or 49 per cent more. The Bessemer steel rail production includes 36,868 net tons of rails rolled by iron rolling mills, mainly from imported blooms. The production of steel rails in 1880 is included in the total production for the year, and amounted to 16,894 net tons, of which 8,055 tons were Bessemer and open hearth steel rails, and the remainder iron rails. Of the total production of rails in 1880, Pennsylvania contributed 46 per cent, or 670,198 tons; Illinois, 22 per cent, or 322,883 tons; Ohio, 9 per cent, or 133,487 tons; New York, 7 per cent, or 109,921 tons; Indiana, 3 per cent, or 41,523 tons; Missouri, Wisconsin and Kansas, each 2 per cent; Vermont and Tennessee each 1 per cent, and the others less than 1 per cent.

Wilmington and Northern Railroad.

From the report of the directors of this company for the year ending December 31, 1880, we learn that the gross earnings were $231,627 46, and the expenses (including $3,662 66 for taxes) $202,301 10—leaving the receipts over expenses $29,326 36; from which deduct interest on Branch bonds, $1,827 27, and redemption of Branch bonds, $1,400, leaving a net surplus of $26,098 59. In 1879 the gross earnings were $154,204 82, the expenses, taxes, etc., $148,280 25, and the net surplus $5,824 57, showing an increase in gross earnings of $77,422 64, in expenses, etc., of $57,148 62, and in net surplus of $31,050 03.

During the year the French Creek branch has been completed, at a cost of $44,352 01, and the Rockland branch at a cost of $20,820 47. The latter branch extends from DuPont station to the Jessup & Moore Company's Rockland mills.

The report recommends the early replacing of the present iron rails by steel rails and a number of minor improvements to the road bed.

The Supreme Court of Ohio has decided that the laws passed by the Legislature of that State, during its recent session, to authorize a certain township to build railroads and lease and operate the same, are in conflict with Section 6 of Article 8 of the State Constitution, and are therefore void.

New York, Saturday, May 14, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THE recent modifications of tolls on the Welland and St. Lawrence Canals and the reduction of harbor dues at Montreal are among the important measures that Canada is adopting for securing a larger share of Western traffic.

THE Senate Judiciary Committee this week decided to report favorably, the Morgan concurrent resolution declaring that the consent of the United States Government is a necessary condition to the construction of a ship canal across the Isthmus of Panama.

AMERICAN machinery has been placed on a tariff footing with English machinery in France, according to a dispatch from Paris announcing that American machinery, which has heretofore paid from eighteen to thirty-six francs duty will in the future pay six francs, the same as English machinery.

SUPERINTENDENT DUTCHER believes that he will be able to move boats on the middle division of the Erie Canal before May 17, the day announced for the opening of that portion of the canal. More than two hundred boats bound for the West, on Monday last, were awaiting the opening of canal navigation at Troy. Water was let into the canal early in the week.

THE fastest "long distance" time for a locomotive was placed on record last week by the celebrated Fontaine engine, a description of which we recently gave. The locomotive with two cars containing officers of the Michigan Central Railroad, is credited with having made the trip over the Canada Southern Railway from Amherstburg to Victoria, a distance of 229 miles, in 211 minutes including five stops amounting to 16 minutes.

CONCERNING Texas and its popularity with Italian emigrants a recent number of The Piecolo, one of the leading papers of Naples, says: "The railroad interests of the United States are at this time tending toward Texas, a State larger than France with an extensive coast on the Gulf of Mexico, where the climate is not different from that of Naples. The cotton, grain and fruit crops are extraordinary, marvellous, and the shipping from the port of Galveston is taking wider proportions every month. In Texas are raised the best cattle of the United States; and the Italian emigrants are delighted with that beautiful country. Mr. C. H. Harding, of the AMERICAN RAILROAD JOURNAL, of New York, is at present in Naples studying our economical situation for the purpose of presenting an accurate account of the same in the paper with which he is connected."

A number of railroad companies forming an important part of the great Southwestern railroad system have adopted a practical and what promises to be to immigrants, as well as to others, a beneficial plan for promoting immigration to the Southwest, especially to Texas, Arkansas and Western Louisiana. The Southwestern Immigration Co. has been organized under the general laws of Texas and with the encouragement of prominent railroad and State officials of that and neighboring States for the purpose of giving to the settlers authentic information concerning the different sections of the southwestern territory. The headquarters are at Austin, Texas, and its officers are: Wm. W. Lang, President (late Master Texas State Grange); B. G. Duval, Secretary; Jas. H. Raymond, Treasurer and the following executive committee H. M. Hoxie, George Noble, A. A. Talmadge and A. N. Soper. An eastern office has just been opened in this city, under the direction of J. N. Victor, Eastern Manager, at 243 Broadway. Commodious rooms have been arranged here which will be used as a bureau of information, where it is proposed to furnish the most complete information possible concerning all portions of the Southwest, the company disclaiming any intention of working in other than the broadest ways for the development of that section of our country; relying upon a general rather than sectional development for ultimate returns, which will come through the growth and utilization of manufacturing, commercial and agricultural resources. One of the features of the office in this city will be an exhibition of the mineral and agricultural products of the Southwest.

A HEALTHY feature which the financial market is exhibiting after a slight touch of spring fever, experienced earlier in the season, is seen in the increasing popularity of first-class railroad securities. The demand for railroad bonds of the substantial investment class has been much greater since the opening of May than at any time for several months past. The great railroad systems of the country participate fully in the prevailing prosperity and foreign as well as home investors look upon this investment field with a confidence stronger than ever before. This confidence seems well warranted when some of the leading railroads are reporting such a remarkable increase in earnings for the early months of the year over the corresponding months of the unusually active year of 1880; and this while the severity of the weather much of the time has seriously impeded transportation. An illustration of the increasing volume of transcontinental traffic is given in the reported earnings of the Central Pacific Railroad for the first four months of the year, showing an increase of over a million and a half dollars as compared with the corresponding months of last year, the increase for the month of April over April of last year being more than half a million.

Summer Travel.

While the cabins of the great ocean steamers are crowded with Americans seeking summer pleasures and alleged rest on the other side of the water, the railroads here are providing unusually pleasant accommodations for carrying the vast number who will seek a summering in the unnumbered and widely varying attractive resorts of our own country. Not only are railroad managers offering to their patrons the best that can be devised for their comfort and safety in the luxurious cars that are coming out of the crowded shops for their summer work, but their thoughtfulness extends to beautifying the pathway of the tourists and catering to their aesthetic tastes. A simple though a significant illustration of this is seen in the recent purchase in this city by the Pennsylvania Railroad Company of 50,000 plants of various kinds, the purpose being to have beds of flowers at every station along the route. So in many ways of greater and minor importance the railroad managers are aiming to make everything inside and outside the cars as attractive as possible to their patrons. They are also doing much to benefit the localities through which their lines pass as well as to assist the public generally in select-

ing summer resting places, by making better known the attractions offered in the various parts of the country. Plans for excursions and the chartering of cars have been so well and economically systematized that the idea of excursion parties across the continent will be more popular this summer than ever before.

But to the many in the Metropolis who are looking forward eagerly in this midsummer weather of May to the days when their families shall be located by the sea shore or among the hills at easily accesible distances from the city, the near by attractions are of most direct interest, and information concerning them is most acceptable. The New England resorts are exceedingly popular with New Yorkers, and are becoming more and more so yearly as their attractions are becoming better appreciated, especially is this true of those designated by the breezy title of "Berkshire Hills." Improved railroad facilities have made them easily accessible to New Yorkers, conspicuously such facilities as are now being furnished by the Housatonic Railroad, which sends through cars direct from New York in six hours to Pittsfield, Mass., the very heart of Berkshire. And by the way, referring again to the means employed for placing information concerning summer resorts before the public, a model publication of the kind and one which illustrates what the railroads are doing in this worthily enterprising direction is a pocket volume which Mr. Clark W. Bryan, a well known Massachusetts journalist and publisher, of Great Barrington, has prepared for the Housatonic Railroad Company, entitled "The Hills and Homes of Berkshire." It contains illustrated descriptions of the numerous attractions and advantages of the Housatonic Valley and Berkshire County; its beauty recalls the flowers of the valleys and its spirit the breezes from the hills of "Dear Old Berkshire."

Organization:

The officers of the American Cable Company, elected on the 6th inst., are: Dennis Doren, President; A. H Calef, Secretary; G. P. Morosini, Treasurer.

At the annual meeting of the Pittsburgh, Oakland and East Liberty Railroad Company on the 4th inst. Mr. D. W. C. Bidwell was re-elected President and Treasurer and Harvey N. Rowe Secretary.

At a meeting of the stockholders of the Seaboard and Roanoke Railroad Company held at Portsmouth, Va., on the 3d inst. all the old officers and directors were re-elected.

A certificate of incorporation has been filed with the Secretary of State of Ohio of the Youngstown and Salineville Railroad Company; capital stock $500,000.

The stockholders of the Pittsburg Southern met in Pittsburg on the 2d inst., and elected at President James H. Hopkins, and as Directors J. W. Kuntz, J. Wright, J. W. Rowland, F. B. Laughlin, John L. George and J. P. Beal.

The Baltimore Steam Packet Company have re-elected the following directors: John M. Robinson, Enoch Pratt, S. M. Shoemaker, Charles F. Mayer, of Baltimore; Mancure Robinson, Nalbro Frazier Elihu Chancey and William L. Savage, Philadelphia, who re-elected Col. John M. Robinson president.

The officers of the West End, Angora and Park Passenger Railway Company, elected on the 2d inst., are: President, William Wharton, Jr.; Directors, William Rotch Wister, John Samuel, Louis J. Ladner, William C. Hannis, Alfred Horner, Jr., and Howard A. Stevenson.

The directors of the Wilmington and Northern Railroad Company, elected on the 2d inst., are: George Brooke, A. L. Foster, Richard E. Ely, Charles Huston, Charles Wheeler, John S. Gerhard. The officers are: President, Henry A. Dupont; Secretary and Treasurer, P. J. Ermold; General Superintendent, J. H. Thompson.

The Philadelphia and Darby Railroad Company has been reorganized with the following officers: President, Charles S. Borie; Directors, M. Hall Stanton, W. W. Colket, C. W. Walton, Richard L. Ashhurst, Thomas L. Lawson and George S. Fox. The capital stock has been fixed at $200,000, consisting of 4000 shares at a par value of $50.

At a meeting of the Delaware River Railroad Company at Woodbury, N. J., on the 2d inst., all the retiring directors were re-elected, with the exception that William Du Pont of Wilmington, Del., was substituted for Mr. Richardson of Philadelphia. The new board organized by electing William S. Conner president; Dr. Samuel T. Miller secretary, and Edward H. Green superintendent.

The directors of the Pittsburg, Virginia and Charleston Railroad Company, elected on the 3d inst., are: J. N. DuBarry, Geo. B. Roberts, Edmund Smith, Wister Morris, John P. Green, Strickland Kneass, D. A. Stewart, Chas. E. Speer, W. J. Howard, Geo. V. Lawrence, John Scott, Thomas L. Daly and Joseph Walton. President, J. N. Du Barry; Secretary and Treasurer, D. P. Corwin.

The stockholders of the Wilmington and Northern Railroad Company, at their meeting at Coatesville, Penn., on the 3d inst., elected the following board of directors: H. A. Dupont, George Brooke, A. L. Foster, Richard Ely, Dr. Charles Huston, Charles Wheeler and John S. Gerhard. President, H. A. Dupont; Secretary and Treasurer, P. S. Ermold; Engineer and General Superintendent, J. H. Thompson.

The directors of the Louisiana and Missouri River Railroad Co., elected on the 4th inst. are: J. P. Sebree, William King, J. J. Mitchell, George Straut, C. Beckwith, C. H. Fostor, R. P. Tansey, H. V. P. Block, W. H. Mitchell. The officers are: R. P. Tansey, President; Wm. King, Vice-President; W. W. Pope, Secretary and Treasurer; C. H. Foster, Assistant Secretary and Treasurer. Executive Committee: George Straut, C. Beckwith, W. H. Mitchell and C. H. Foster.

At the annual meeting of the stockholders of the Houston and Texas Central Railway Company, held in Houston, Texas, on the 2d inst., the following Board of Directors was re-elected: Chas. A. Whitney and A. C. Hutchinson, of New Orleans; R. J. Morgan and John J. Cisco, of New York; Charles Fowler, of Galveston, and G. Jordan, E. W. Cave, A. Graesbeck and A. Richardson, of Houston. No quorum of directors being present, the election of officers was deferred.

At the meeting of the bondholders of the Oregon and California Railroad, held at Frankfort, Germany, on the 5th inst., President Villard's plan for a reorganization of the road was adopted by a vote of 5,828 to 19. Messrs. Villard, Bretherton and R. D. Peebles were appointed trustees. Messrs. Villard, Endicott R. B. Pullman, Horace White, W. H. Starbuck, Bretherton and T. F. Oakes were appointed directors, with power to nominate four others. The next general meeting will be held in October.

At the annual meeting of the Eastern Railroad of New Hampshire, held at Portsmouth on the 3d inst., the following gentlemen were chosen Directors: Moody Currier, Manchester; Dexter Richards, Newport; Francis Thompson, Boston; Edward L. Giddings, Boston; Edward A. Abbot, Boston; William H. Goodwin, Boston; Frank A. Philbrick, Rye. The Treasurer, Edward A. Abbot, made his report, showing a balance on hand of $3,480 47. At a subsequent meeting of the Directors Moody Currier was chosen President and William H. Hackett, Clerk.

The Northern, Northwestern and Sault Ste. Marie Railway Company has been organized at Toronto Ont., and the following gentlemen have been elected directors, viz: Adam Brown, William Ince, Noah Barnhart, W. B. Scarth, the Hon. A. Morrice, A. McInlis, William Hendrie, John Proctor, D. McCarthy, William O'Brien, A. R. Boswell and John Fisken. Adam Brown is the President and William Ince the Vice President. The plans, &c., have, we understand, been filed for the greater portion of the right of way, and the construction of the road will be proceeded with at an early day.

At the annual meeting of the Union Investment and Promoting Company, of this city, held on the 4th instant, the following gentlemen were elected directors for the ensuing year: A. F. Willmarth, Geo. P. Bissell, John G. Webster, Joseph S. Stout, D. B. Barnum, Geo. W. Warren, John H. Mortimer, Monroe E. Babcock, Henry R. Pierson, John R. Hall, James Bolter, A. McKinney, John L. Stewart, Henry L. Daniels, Alden P. Jacques, Hiram W. Hunt, Henry E. Russell, D. W. Gooch. Subsequently the following officers were elected: President, A. F. Willmarth; Vice Presidents, A. McKinney, Henry E. Russell. Geo. P. Bissell; Treasurer, Geo. W. Warren; Secretary, Monroe E. Babcock.

The annual meeting of the stockholders of the St. Croix and Northwestern Railway Co., was held at St. Croix Falls, Minn., on the 4th inst., and the following board of directors was elected: George P. Anderson, M. C. Pederson, M. Young, Jens Welling, Robert Downcent, C. E. Mears, F. A. Dresser, William J. Vincent, William M. Blanding, Joel F. Mason, Thomas H. Thompson, J. S. Baker, James Thompson. At the meeting of the directors the following officers were elected: President, William M. Blanding; Vice-President, Charles E. Mears; Secretary, A. C. Henerson; Treasurer, Joel F. Mason; Executive Committee: William M. Blanding, Thomas H. Thompson and M. C. Pederson. The prospects are said to be favorable for the early commencement of work on the road.

At the annual meeting of the Cedar Rapids, Iowa Falls and Northwestern Railway Co., held at Cedar Rapids, Iowa on the 4th inst., the following directors were elected: A. A. Robertson, J. J. Balthoff, J. E. Carlton, Iowa Falls; D. Close, J. N. Dewey, Iowa City; E. Bailey, Clinton; J. S. Peasley, A. J. Adams, Lyman Cook, Burlington. The officers elected for the ensuing year are as follows: President, Geo. J. Bool, Iowa City; Vice-President, J. N. Dewey, Iowa City; Secretary, W. P. Brady, Cedar Rapids; Treasurer, Theo. Stickney, Cedar Rtpids. The Iowa City and Western Railway Company also held its annual meeting at the same time and place, and the following directors were chosen: Lyman Cook, J. C. Peasely, A. A. Robertson, E. S. Bailey, C. D. Close, J. N. Dewey and J. J. Balthoff. The officers elected are: President, Lyman Cook; Vice-President, J. N.

Dewey, Secretary, Theo. Stickney; Treasurer C. Stickney.

At an election held at the office of the West Jersey Railroad Company, in Camden, N. J., on the 4th inst., the following directors were chosen: Philadelphia and Long Branch—W. L. Dennis, Warren E. Dennis, T. W. Jackson, C. B. Thurston, James McCrea, W. J. Sewell, I. S. Buckelew, G. B. Roberts, W. M. Fox, Edmund Smith, S. Kneass, H. D. Welsh and G. M. Dorrance. Pemberton and Seashore—Strickland Kneass, G. M. Dorrance, W. L. Elkins, Edmund Smith, A. M. Fox, J. N. DuBarry, H. H. Houston, Wistar Morris, N. P. Shortridge, H. M. Phillips, H. D. Welsh, J. P. Wetherill and E. T. Green. Freehold and Jamesburg—H. Allaire, I. S. Buckelew, Alex. M. Fox, Strickland Kneass, James R. McClure, S. B. Oviatt, Lewis Perine, Jacob B. Rue, Clifford S. Sims, Edmund Smith and Henry D. Welsh.

The stockholders of the following railroads under control of the Baltimore and Ohio Railroad Company held their annual meetings in Pittsburg on the 2d inst., and elected the appended lst of officers and directors: Somerset and Cambria Railroad Company—President, J. B. Washington. Directors, W. H. Koontz, Somerset, Pa.; C. C. Mussellman, Somerset, Pa.; Welty McCullogh, Greensburg, Pa.; J. G. Harvey, Baltimore, Md.; Robert Garrett, Baltimore, Md.; D. J. Morrell, Johnstown, Pa. Berlin Railroad Company—President, J. B. Washington. Directors, Welty McCullough, Greensburgh, Pa.; Robert Garrett, and Joshua G. Harvey, Baltimore, Md.; W. H. Koontz, Somerset, Pa.; S. A. Philson, Berlin, Pa.; S. Philson, Berlin, Pa. Brownsville and New Haven Railway Company—President, J. B. Washington. Directors—A. L. McFarlane, Irwin Station, Pa.; W. J. H. Kline, Greensburg, Pa.; Geo. W. Wilson, Pittsburgh, Pa.; W. H. Markle, Greensburg, Pa.; Welty McCullough, Greensburg, Pa.; A. O. Tintsman, Pittsburg, Pa.

Personal.

Rufus Hatch and his son arrived in the city Monday from their trip to the Bermudas,

J. A. Gladfeiter, of Seven Valley, York county, Pa, has been appointed railroad surgeon of the Northern Central Railway Company.

B. W. Wren has been elected Chief of the Transportation Bureau of the International Cotton Exposition at Atlanta, Ga.

Judge Robert Ould it is announced, will resign his position as president of the Richmond, Fredericksburg and Potomac Railroad Co., June 1st.

Telegrams from Mexico state that Capt. Eads' ship railroad project has been approved unanimously by the Mexican Chamber of Deputies.

C. M. Rutter and Walter N. Walker, of this city, have formed a co-partnership for the purpose of doing a general banking and brokerage business, under the firm name of Rutter & Walker, at 80 Broadway.

E. A. Maurie, Sydney Bishop and M. M. Howland, under the firm name of E. A. Maurie & Co., have formed a copartnership in banking and brokerage at 7 Wall street.

Capt. Boycott of Ireland, whose siege by the Land Leaguers originated the name "Boycotting," arrived last week at Manitoba, Canada, where he thinks of locating.

W. H. Barnum has been re-elected president, David S. Draper vice-president, and H. A. Kerkham secretary of the Little Pittsburg Consolidated Mining Company.

James Bartol, of Baltimore succeeds S. M. Woodward, Jr., as superintendent of the Valley Railroad and agent of the Baltimore and Ohio Railroad at Staunton, Va.

Gen. Pas. Agent Ford, of the Pennsylvania Company has appointed C. W. Adams assistant general passenger agent of the Pennsylvania Company; C. C. Cobb, of the Pittsburgh, Cincinnati and St. Louis Railway, and J. M. Chesbrough, of the Vandalia Line.

Col. W. O. Osgood, of Chicago, a heavy land owner in Texas and much interested in railroad construction in the Southwest, says that more than half of the sugar stubble in Texas was killed by the severe weather of early Spring.

George W. Field, superintendent of the Third Avenue Railroad of New York, died at the residence of his son-in-law, Dr. J. H. Thurston, in Jamestown, N. Y., on the 7th inst., after an illness of several months.

Capt. A. A. Folsom, superintendent of the Boston and Providence Railroad, sailed for Europe last Saturday from Boston. He was accompanied to the steamer by a large number of friends, and received a handsome floral testimonial from the conductors of his road.

George H. Holt has retired from the banking house of George William Ballou & Co., New York and Boston. The firm name remains unchanged and the general partners are George William Ballou, William H. Bingham, David H. Darling and Allen S. Weeks.

The sixtieth birthday of William H. Vanderbilt was celebrated in Nashville, Tenn., last Sunday at the dedication of the Theological Hall of the Vanderbilt University, by placing in the Hall a full length portrait of the donor. The building, the gift of Mr. Vanderbilt, is said to have cost over $100,000.

A. A. Bean, formerly superintendent of the San Francisco and North Pacific Railroad, appointed assistant superintendent of the Southern Pacific of Arizona, has assumed charge at Tucson, vice W. G. Curtis, who has been appointed superintendent of track of the Central Pacific and leased lines, vice L. M. Clement.

John H. Starin, whose transportation line for a number of years has carried freight by water between the general steamer lines and the New York Central and Hudson River Railroad, has sold this lighterage business to William H. Vanderbilt. It is said to have been appraised at $1,000,000.

The fifty-third annual meeting of the American Seamen's Friend Society was held in this city on the 9th inst and the following trustees were elected for the next three years: Rev. John Spaulding, D. D., Capt. Daniel Gillespie, and Messrs. John Dwight, Henry A. Hurlburt, Fredk. Sturges, Wm. C. Sturges and Geo. J. Seney.

The Petersburg Railroad Company was reorganized on the 6th inst. by the election of the following officers: President, E. T. D. Meyers, superintendent of the Richmond and Fredericksburg Railroad; directors, W. H. Palmer, F. R. Scott, T. M. Logan and Joseph Bryan, of Richmond, and R. G. Pegram, of Petersburg.

C. B. Peck, general manager of the Chicago and Grand Trunk Railway, has been promoted to the office of general traffic manager of all the Grand Trunk lines in the West. He was recently appointed government director of the Union Pacific Railway Co, S. R. Calloway has been appointed general superintendent of the Chicago and Grand Trunk Railway, and Wm. Wainwright assistant general manager.

C. P. Huntington, vice-president of the Central Pacific Railroad Company, and president of the Chesapeake and Ohio Railway Co., having had his attention called to efforts being made for the erection of a church lecture room or chapel in his native town of Harwinton, Conn., has offered to have the building erected at his own expense if after consulting an architect an acceptable plan is found.

Ex-Congressman Chas. Hudson, who recently died at his home in Lexington, Mass., at the age of eighty-six years, was among the earliest advocates of railroads in this country. The familiar legend over railroad crossings "Look out for the Locomotive" is said to have been suggested by him. He served eight years in Congress, and was afterwards appointed to a Boston custom-house office by President Taylor.

The New York Exchange on Monday elected the following officers: President, Donald Mackay, chairman, James Mitchell; vice-chairman, Alexander Henriques; treasurer, D. C. Hays; secretary, B.O. White, trustee of gratuity fund, William Alexander Smith; governing committee to serve four years, S. T. Russell, G. L. Haight, E. Brandon, F. K. Sturgis, W. L. Bull, F. N. Lawrence, Simeon J. Drake, R. L. Anderton, Jr., J. S. Decker, J. D. Probst; to serve one year, D. A. Boody.

Removals.

Cantoni & Co., bankers, have removed to 25 Wall street.

Shearman and Sterling have removed their law offices from 20 Nassau street to 45 William strset and 41 Pine street.

D. N. Beardsley & Co., contractors and wholesale dealers, in railroad ties, have removed from 21 Park Row to 9 Murray street. To meet the demand for ties created by the activity in railroad construction work, they have recently increased their already large facilities for filling orders.

Manufacturing.

The Lobdell Car Wheel Co. has recently purchased over 200 acres of land for extending its works at Wilmington, Del.

Riehle Bros., Philadelphia, manufacturers of scales and testing machines have opened a store in this city at 115 Liberty street.

It is said that New York parties have leased for a term of thirty years, the old Camden and Amboy Railroad shops at Bordentown, N. J., for the purpose of manufacturing locomotives.

Two locomotives, both standard gauge and of the Baldwin Locomotive Work's make, are offered for sale by R. Frazer, agent for J. H. Brakeley, Bordentown, N. J., a description of the locomotives is given in another column.

Buildings with a frontage of over 500 feet are being erected at Muskegon, Mich., for the company recently organized there for the manufacture of railroad cars and locomotives. The officers of the company are: George C. Kimball, president; Robert Caithness, vice president; F. A. Nims, secretary; Hugh Park, treasurer.

The Charleston News says that the Spartanburg and Union Railroad has been leased by the Richmond and Danville Railroad Company at a reported yearly rental of $50,000, and that the Spartanburg and Asheville, with the Knoxville and Cincinnati connections, will naturally go next.

The two working parties on the Norfolk and Elizabeth City (N. C.) Railroad were, at last accounts, rapidly approaching each other, and it is probable that the last spike was driven on Friday.

The Right to Redeem Cut-off--A Statute Repealed by Implication.

The New York Court of Appeals, in its recent decision in the case of Daniel Pratt et al. vs. Edgar Munson, holds that the second section of the Act of 1853 (ch. 502) allowing stockholders to redeem in proportion to their stock within six months after title acquired by the purchaser at foreclosure sales of railroad mortgages, has been repealed by implication.

The Sodus Bay and Corning Railroad Company on the day of its organization in March, 1873, executed to the Farmers' Loan and Trust Company a mortgage upon all its property to secure the payment of certain bonds. Default was made, and the mortgaged property was disposed of at foreclosure sale in June, 1876, to the defendant Munson. The plaintiffs, who owned only one share of the capital stock, brought this action because the purchaser, Mr. Munson, had refused to accede to their demands and allow them to redeem under the Act of 1853. The second section of this act declares that any stockholder of a railroad company shall for six months after foreclosure sale have the right, on paying to the purchaser under such sale a sum equal to such proportion of the price paid on such sale as such stockholders' stock shall bear to the whole capital stock of the company, be entitled to have the same relative amount of stock or interest in the railroad company, its road, franchises and other property. This provision has worked very serious annoyance and difficulty in many such foreclosure sales, and it is said that recently large sums of money have been paid, under the supposition that the statute was still in force, to quiet the apparent title arising under it.

In giving the opinion of the Court, Judge Danforth comments upon the language of the statute, and says that—

If its object was to enable each stockholder to continue his interest in the corporate property, contributing to the purchaser a certain proportion of the sum paid, and so becoming with him tenant in common of the estate, that the directions of the section are very inadequate and could hardly afford to anyone indemnity for the loss sustained by the extinction of the corporation of which he has been a member. But in 1854 a law was passed amending the General Railroad Act of 1850, declaring that whenever the purchaser of real estate, track or fixtures of any railroad corporation, which might be sold by virtue of any mortgage executed by such corporation, should acquire title to the same in the manner prescribed by law, such purchaser might associate with him any number of persons, and make and file articles of association as prescribed by the Act of 1850, and such purchaser or purchasers and their associates should thereupon be a corporation "with all the powers, privileges and franchises and be subject to all the provisions of this act." If the Court went no further, Judge Danforth says, it would seem that this statute was entirely repugnant to that of 1853. But the Act of 1874, designed, as its title says, to "facilitate the reorganization of railroads sold under mortgage, and providing for the formation of new companies in such cases," while substantially like the Act of 1854, makes its additional provisions in such form that it cannot be construed so as to be consistent with the continuance of the right claimed under the Act of 1853. This Act of 1874 declares that the "new company" formed by the purchaser and his associates shall become and be a body politic and corporate, and be invested with all the rights, privileges and franchises "which at the time of such sale belonged to or were vested in the corporation formerly owning the property so sold."

After discussing the statute at some length, Judge Danforth says:

"The statute of 1853 does not contemplate the formation of a new company. No obligation is imposed on the purchaser to assist in forming one. No provision is made for it. Upon the foreclosure sale the purchaser takes the property to do with it as he choses, as he might deal with lands or chattels, subject only to the right given to the stockholders by section 2 of the Act of 1853 to participate in the purchase upon the terms and within the time therein mentioned. That right must be deemed taken away by the power of disposition conferred upon the purchaser by the above acts; for the liability to convey to the stockholders of the company an interest in the property purchased cannot coexist with the power to convert the whole for other purposes and to other persons. Again, the Act of 1874 secures to the stockholders in the old company a right to participate in the benefits of reorganization in one event only—when the title is acquired to the railroad property and franchises pursuant to some plan or agreement for the readjustment of the respective interests therein of mortgage creditors and stockholders in the old company. This provision also is inconsistent with the right embraced in the second section of the Act of 1853. It seems to us that these acts were intended by the Legislature to prescribe the rule applicable to the stockholder in a railroad company, and the purchase upon foreclosure of its property and franchies; that they are repugnant to the provisions of the Act of 1853 upon the same subject, and therefore repeal them, according to the maxim that 'every affirmative statute is a repeal by implication of a precedent affirmative statute so far as it is contrary thereto.' We think, therefore, the provisions of the Act of 1853 on which the plaintiffs rely were not in force at the time of the sale under the foreclosure, and that the plaintiffs acquired no cause of action against the defendants."

Railroad Law.

Some recent decisions on this subject deserve remark. In Pullman Palace Car Co. vs. Barker, 4 Col. 344; S. C. 34 Am. Rep. 89, owing to the defendants' negligence, their sleeping car, on which a woman was a passenger, caught fire, and she was compelled to leave the car, half clad, and took cold, which resulted in suppression of her menses and a long illness. It being shown that she was menstruating at the time of the accident, and that the illness was traceable to that condition, held, that the defendants were not liable in damages therefor. The court adopted the rule enunciated in Milwaukee, etc., Ry. Co. Kellogg, 4 Otto, 475, that "the question always is, was there an unbroken connection between the wrongful act and the injury—a continuous operation? Did the fact constitute a continuous succession of events so linked together as to make a natural whole, or was there some new and independent cause intervening between the wrong and the injury?" They continue: "Independent of the fact that she was 'unwell' at the time, it cannot be said that the negligence of the appellant resulted in her long illness or any illness Conceding that the appellee was compelled on account of the smoke and flames to leave the car in the half-clad condition she did, the exposure to the cold was the direct and necessary result of the appellant's negligence. Her subsequent illness, however, was not the result of the exposure, but the result of the exposure in her then condition. Here, then, intervenes an independent cause of her illness, a cause resting in her physical condition, appertaining exclusively to herself, with which the appellant had no concern, and to which it sustained no relation either by contract or by the general duty imposed by law upon carriers of passengers. Where physical weakness or disability is apparent to, or is brought to the attention of the carrier, undoubtedly that high degree of care which the law imposes upon him, would, under certain circumstances, involve duties in reference thereto. As that he shall allow an aged, infirm, or crippled person, a reasonable time in which to get on or off the coach or car, having reference to their crippled or infirm condition. Colt vs. Sixth Ave. R. R. Co., 33 N. Y. Sup. Court, 190. While this is the case it cannot be said that the law imposes any duty respecting the possible secret complaints and diseases of passengers affecting their fitness to travel. Where no duty is imposed no liability can attach. Another passenger might have suffered equally serious consequences from the effect of the cold upon a wound in the foot, superinducing inflammation, and possibly necessitating amputation. Can it be said that the law imposed upon the carrier an enlarged duty having reference to the wound, and that the added risk of travelling in this condition must be assumed by him and not by the passenger from whose personal condition it springs? We think not. While it is true that menstruation is a law of health, it is also true that it is a condition requiring greater care and prudence to avoid exposure."

The court cited Hobbs vs. London, etc, Ry. Co., L. R. 10 Q. B. 111. In that case the plaintiff, with his wife and two children, took tickets to H. on the defendant's railway. They were set down at E. It being late at night, the plaintiff could not get a wagon or accommodation at an inn. They had therefore to walk five or six miles on a rainy night, and the wife took cold, was laid up in bed for some time and was unable to assist her husband. The jury found £8 for inconvenience in having to walk home, and £20 for the wife's illness and its consequences. The court held the £8 recoverable, but not the £20.

The circumstances in Indianapolis, etc., Ry. Co. vs. Birney, 71, I l. 391, were very similar in the Hobbs case, except that in the former the plaintiff "had the option to remain five or six hours and take the next train, or procure a horse or a horse and carriage," and the opinion is based on the ground that his exposure was voluntary and unnecessary.

See 1 Sedgw. on Meas. of Dam. (7th ed.) 218, note a; Wood's Mayne on Dam. 67, note 2; Thomp. Carriers of Passengers, 565.

Mr. Thompson (Carriers of Passengers, 566), says of the Hobbs case: "The rule seems to have been applied with unnecessary vigor." He also cites Francis v. St. Louis Transfer Co., 5 Mo. App. 7, where a passenger carrier contracted to carry a young lady from a railway station to her house, but set her down in the city, a mile from her residence, on the sidewalk of a frequented street, along which ran a line of street cars passing within a square of her house. The day was very cold but dry; the young lady was delicate but not ill. Being warmly clad, she walked home with a friend, and in so doing took a cold which

permanently impaired her health. It was held that this injury was too remote to warrant a recovery against the defendant.

But where the defendant contracted to carry the plaintiff from New York to San Francisco via Nicaragua, but in consequence of the wreck of the connecting vessel on the Pacific coast he was detained several weeks on the Isthmus, where he contracted a local fever, which disabled him for a long time after his return to New York, this injury was held a ground of recovery. Williams v. Vanderbilt, 28 N. Y. 217.

The Hobbs case was very recently followed, but criticised by Fry, J., in McMahon v. Field, Ch. Div., 44 L. T. (N. S.) 175. There the plaintiff hired stables of the defendant in order to put some horses there which he wished to dispose of at a fair held in the town. Soon after the horses arrived they were turned out of the stables in consequence of the defendant having also let them to some other person, and as he did not supply the plaintiff with other accommodations for the horses, he was compelled to obtain it elsewhere. The plaintiff claimed damages for injury sustained by the horses by being thus suddenly turned out of the stables and exposed to the weather while he was seeking other stables for them. Held, not recoverable. The court said: "If there had been no decision on the point I should hold a person who breaks a contract must take the consequences of that breach, and the fact that something which coincides with the breach produces the result does not relieve him from the consequences. But that does not appear to be the law. The case of Hobbs v. London and South-western Railway, L. R., 10 Q B 111, has been pressed upon me, and I am unable to find any distinction between that case and the present. There the illness of the plaintiff's wife was the result in the first place of the breach of contract; secondly, of the physical condition of the wife; and thirdly, the physical state of the weather on the night in question, on which she was obliged to take a walk. Here the injury to the horses was the result, first, of the breach of contract; secondly, of the physical condition of the horses; and thirdly, of the state of the weather on the afternoon in question. In giving judgment in that case Cockburn, C. J., after stating two hypothetical cases, said (L. R., 10 Q. B. 119): 'In either of those cases the injury is too remote, and I think that is the case here; it is not the necessary consequence, it is not even the probable consequence of a person being put down at an improper place, and having to walk home, that he should sustain either personal injury or catch a cold.' If that is a correct statement of the law, I am bound to find that it is not the necessary and probable consequence of the horses being turned out of the stable on a May afternoon, that in going to a neighboring stable they should catch cold. Horses are moved, and there is nothing to show that these horses were more susceptible to cold than other horses. Archibald, J., said (L, R., 10 Q. B. 124) that 'in the case of breach of contract, the party breaking the contract must be held liable for the proximate and probable consequences of such breach; that is, such as might have been fairly in the contemplation of the parties at the time the contract was entered into.' If that be a sound view of the law, I must hold that neither the particular condition of the horses, nor of the weather, on that afternoon, was in the contemplation of the parties to the contract when they entered into it. I follow that case because it is an authority of the Court of Appeal, and not because it is to my mind a satisfactory decision."

The Hobbs case and the Barker case seem to us to strain the law to its extreme. Railways are not provided for the conveyance of the healthy and robust alone. Sick and delicate people have a right to carriage, and are every day transported, as well as those who are strong and in health. It is not the fault of the passenger that he is sick, or delicate, or is made sick by the exposure consequent upon the railway company's negligence. Especially is it not the fault of the woman that she is menstruating. Loss of business from such illness may not be recoverable; but why is not the illness the direct and easily-foreseen result of the negligent exposure? Suppose, for example, there is a railway collision and wreck, and the cars take fire and are consumed. All the passengers easily escape, except one, who is sick or has a wooden leg, and perishes in the attempt. Here is an "intervening, independent cause"—the sickness or the wooden leg. That was not the fault of the railway company. It "appertained exclusively" to the passenger. But will any one deny the liability of the company? The law of the cases cited will bear revision.—[The Albany Law Journal.

Manufacturing Enterprises in the South.

The report of the President of the Graniteville Cotton Manufacturing Company at Augusta, Ga., which was recently submitted at the annual meeting of the stockholders, must prove not only gratifying to the stockholders, but to all who have at heart the success of manufacturing enterprises in the South. The Graniteville and Vaucluse factories are under the management of the Graniteville Cotton Manufacturing Company, with an aggregate of 34,064 spindles and 886 looms. The product of goods for the year ending 1st of March last was, in pounds, 4,669,663, and in yards, 16,303,569, in which 12,383 bales of cotton, averaging 450 pounds to the bale, were consumed. The profits were $137,196 and the expenses, including insurance, taxes, schools, churches, interest, &c., $16,383, leaving a net profit of nearly $91,000, being a net earning of over 15 per cent on the entire capital stock. Of this, $48 000, or 8 per cent, was paid in dividends, and the balance, $43,000, carried to the surplus fund, which now aggregates $168,543. The loss of running time during the entire year was only ten days, and this was on account of low water. The requisite machinery has been introduced in the Vaucluse mill for making and printing flour sacks and other kinds of bags out of cloth manufactured in the mill, and the President says the experiment has proved a complete success, giving good promise of becoming a valuable source of profit and an important market for the consumption of a large portion of the products of the mill.

It is stated that engineers are now engaged in locating the new railroad from Alexandria, La., to Jacksonville, Ark., which, when completed, will connect the St. Louis, Iron Mountain and Southern with the New Orleans Pacific.

Railroad Extension in the South.

At a meeting of the stockholders of the Augusta and Knoxville Railroad Company, held at Augusta, Ga., on the 4th inst., President Verdery made the following allusion in his annual report to the extension of the Virginia Midland Railroad:

"The question of extending the Virginia Midland Road from Danville, Va., to Spartanburg, S. C., now being agitated, contains more of business than speculation, and no argument is needed to demonstrate the advantages of the consummation of such plans."

A resolution was adopted by the stockholders to the effect that they regarded the connection of this road with the North Carolina Midland extension at Spartanburg, S. C., as of vital importance, and that the officers of this road be empowered to create such mortgages or liens on the property of the Augusta and Knoxville Company as will perfect some consolidation or traffic arrangement with the Spartanburg and Greenwood road and with the North Carolina Midland.

The Augusta and Knoxville Railroad is completed twelve miles from Augusta, and John G. Clarke & Co., of Baltimore, are now erecting an iron bridge across the Savannah river. Nearly all the grading is finished on the Carolina side, and trains will run to Greenwood in the fall.

It is estimated that the work on the railroad from Greenwood to Spartanburg, sixty-six miles, including track laying, will cost only $7,200 per mile. There are but nine miles of heavy work. The counties of Spartanburg and Laurens, South Carolina, will subscribe $75,000 each and Augusta will give the rest. The completion of the road from Augusta to Spartanburg is now assured.

The track of the Chicago, St. Louis and New Orleans Railroad is to be changed in June from the southern, or five feet gauge, to the standard, or four feet eight and a-half inch gauge. The Louisville and Nashville Railroad is making arrangements for a similar change, which will be consummated in a few weeks, and it is understood the Cincinnati Southern will soon follow. The action of these Southern trunk lines will doubtless necessitate a similar change on the minor Southern roads, or entail considerable loss on them.

The Missouri, Kansas and Texas Railroad has been leased to the Missouri Pacific Railroad Co., which has operated it ever since it was taken from the hands of the Union Trust Company in December last. The lease has been approved and signed by the officers of both companies, and will be submitted to the stockholders for ratification on May 18. It is understood that the lease is a virtual continuation of the present agreement by which the Missouri Pacific operates the road and pays to the company the net earnings.

Statesville, N. C., will vote on the 2d of June on a proposition to subscribe $50,000 to the Statesville Air-Line Railroad, this subscription to be turned over to the North Carolina Midland, provided it builds to Statesville. It is thought the proposition will carry almost if not quite unanimously.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending April 30, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad,	213,722	2,759,581	2,682,741
Schuylkill Canal	10,838	42,183	103,200
Lehigh Valley	160,145	2,110,675	1,672,012
Del., Lack. & Western,	92,249	1 256,898	1,084,021
Shamokin Valley	29,858	3 27,666	263 955
Central New Jersey.	125,001	1,284,912	1,070,585
United R. R. of New Jersey	40,743	495,918	333,481
Pennsylvania Coal	31,914	347,460	284,848
Delaware and Hudson	85,406	1,091,662	1,018,526
Huntingdon & Broad Top Mt.	5,248	144,102	157,933
Penn. and New York.	29,255	530.109	458,587
Clearfield, Pa.	53,571	742,744	888,755

The total tonnage of anthracite coal from all the regions for the week ending April 30, as reported by the several carrying companies, amounted to 723,034 tons, against 407,563 tons in the corresponding week last year, an increase of 315,471 tons. The total amount of anthracite mined for the year is 8,031,330 tons, against 6,875,916 tons for the same period last year, an increase of 1,155,414 tons. The quantity of bituminous coal sent to market for the week amounted to 90,244 tons, against 91,024 tons in corresponding week last year, a decrease of 780 tons. The total amount of bituminous mined for the year is 1,526,654 tons, against 1,193,686 tons for the corresponding period last year an increase of 332,968 tons. The total tonnage of all kinds of coal for the week is 813,278 tons, against 498,597 tons in corresponding week last year, an increase of 314,691 tons, and the total tonnage for the coal year is 9,557,984 tons, against 8,069,602 tons to same date last year, an increase of 1,488,382 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending April 30 was 189 732 tons, of which 129,051 tons were coal and 60 681 tons coke. The total tonnage for the year thus far has been 2,945,021 tons, of which 2,106,489 tons were coal and 838,532 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended April 30 were 34,816 tons, and for the year to that date 551,807 tons, a decrease of 44,946 tons as compared with the corresponding period last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 24,684 tons; year, 454,763 tons; decrease as compared with 1880, 8,098 tons. Chesapeake and Ohio Canal—week, 9,532 tons; year, 43,765 tons; decrease as compared with 1880, 19,177 tons. Pennsylvania Railroad—week, 600 tons; year, 53,278 tons; decrease as compared with 1880, 17,670 tons. The Reading Railroad coal shipments for last week, ending May 7, were 197,000 tons, of which 32,500 tons were sent to Port Richmond and 48,000 tons shipped thence, and 11,500 tons were sent to Elizabethport and 12,000 tons shipped thence. —[Phila. Ledger, May 9.

Cincinnati Southern Railroad.

The Baltimore Sun says that the Cincinnati Southern Railroad, which is owned exclusively by the city of Cincinnati, was built under the direction of the Municipal authorities with money derived from the sale of city securities, which the next generation of tax payers will be obliged to redeem, and then adds :

The road extends from Cincinnati to Chattanooga in an almost direct line, and traverses a country rich in natural resources, but only partially developed. Up to this time the road has not yielded the results expected, and the taxpayers of Cincinnati are becoming somewhat restive under the burden which the annual levy for interest on the bonds imposes. The blame for a deficiency in the revenues of the road is put upon the trustees and commissioners, and the alleged shortcomings of the management enter into the local political contests. With a tax rate of $3 10 in the hundred dollars it is not surprising that the people of Cincinnati are clamoring for the sale of the Southern Railroad.

Railroad Earnings.

The earnings of the Denver and Rio Grande Railway for the month of April were $433,312; corresponding month last year $164,883; miles now operated 690, operated last year 337.

The gross earnings of the New York and New England Railroad for the month of March were $212,018 82; operating expenses, $167,654 48; net earnings, $44,364 34.

The earnings of the Flint and Pere Marquette Railroad for week ending April 30 were $50,698 70; corresponding week last year $37,292 90; from Jan. 1 to April 30 this year $583,370 80, same period last year $505,769 80; increase $77,601.

The earnings of the Chicago and Grand Trunk Railway for week ending April 30 were $35 524 as as compared with $14,516 for corresponding week last year. The aggregate increase for 17 weeks this year over same period last year was $101,902.

The earnings of the Central Pacific Railroad for the month of April were $1,874,000 as compared with $1,356,716 for April 1880. The earnings of the first four months of this year were $6,519,907; corresponding period last year $5,001,256; increase $1,518,651.

The earnings of the St. Paul, Minneapolis and Manitoba Railway for four weeks ending April 30 were $425,685 47 as compared with $333,014 03 for corresponding weeks last year. The aggregate earnings from Jan. 1 to April 30, 1881 were $1,160,317 13, an increase of $247,622 03 over same period last year.

The track of the Pennsylvania Railroad in Maryland, from its point of connection with the Georges Creek and Cumberland Railroad, near Cumberland to the State line, will shortly be relaid with heavy steel rails. The distance is about four miles. It is stated the change from iron to steel is made in anticipation of heavy coal tonnage.

The Secretary of the Interior has decided that the Northern Pacific Railroad has the right secured to it by its charter to survey and build its road across the Crow Indian reservation on the Yellowstone River in Eastern Montana, and the Indian agent at the Crow agency has been instructed to permit the engineers of the company to proceed with their surveys.

The Shenandoah Valley Railroad is now completed 143 miles, and to extend it from Waynesboro', Va., to the Norfolk and Western Railroad at Big Lick on the Roanoke river, 95 miles further, a general mortgage for $2,250,000 has been executed to the Fidelity Insurance Trust and Safe Deposit Company of Philadelphia.

The Secretary of the Treasury has written a letter to Thomas H. Wells, chairman of the committee on Hoop Iron Manufactures at Youngstown, Ohio, in which he adheres to the decision of ex-Secretary Sherman in 1881 on the subject of duty on co n ties.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, May 12, 1881.

The money market continues very easy at 2@3½ per cent, for call loans and time loans, and 4@4½ per cent for prime mercantile paper.

The posted rates for prime bankers' sterling were 4.85½@4.87½. The actual rates are about 4.84¾@4.86¾. Cable transfers, 4.87¼@⅜; and prime commercial bills, 4.83¼@½.

The following circular, modifying circular No. 42, dated April 11, 1881, was issued by the Secretary of the Treasury on the 9th inst.:

Circular No. 42, dated April 11, 1881, having been so modified by circular No. 44, dated April 26, 1881, that foreign holders of six per cent bonds of the United States, described in the first mentioned circular, might present the same for continuance until May 20, the earliest date practicable for that purpose, notice is hereby given that the Secretary of the Treasury will receive bonds of that description to be continued as provided in the first mentioned circular until the 20th of May, 1881, the limit fixed for the presentation at the London Agency, and circular No. 42, of April 11, 1881, is hereby modified accordingly.

It will be seen from the above that the extension of time, within which the bonds named may be presented for continuance, is accorded as well to domestic as to foreign holders. It is believed by Treasury officials that substantially all of the bonds will be presented for continuance. The continued bonds are reported as selling for a premium of about 1 per cent, and this of itself assures the continuance of the bonds except in cases where holders may overlook the notices for such

continuance until too late to present the bonds. As the Treasury holds ample means for purchasing additional bonds for the sinking fund there is no anxiety in Treasury circles to have any more of the bonds come in for continuance than will in all probability be presented for that purpose before the expiration of the extended time, as what will then remain can be applied to the sinking fund with great advantage.

The Ontario Silver Mining Company has declared its regular monthly dividend of 50 cents per share for April, payable May 16, at the office of Messrs. Wells, Fargo & Co., No. 65 Broadway.

The Homestake Mining Company has declared its regular monthly dividend of 80 cents per share for April, payable at Wells, Fargo & Co's., 65 Broadway, on the 25th inst.

Pittsburg, West Virginia and Charleston Railroad.

The gross earnings, operating expenses and net earnings on thirty miles of this road, extending from Pittsburg to Monongahela City, during the years 1879 and 1880, compare as follows:

	1879.	1880.
Earnings	$154,574 35	$240,215 35
Expenses	127,479 41	174,463 45
Net earnings	$27,094 94	$65,751 90

It will be noted that the net earnings in 1880 increased $38,766 96. The contracts for gradating and masonry of the Redstone branch, from Brownsville to Uniontown were let early in April, and work is in full progress. It is expected that when this division shall be completed and in running order, the increase of net earnings will be large, inasmuch as that part of the road traverses a country rich in coal and limestone.

Grand Trunk Railway of Canada.

The gross receipts, working expenses and net profit of the Grand Trunk Railway Company of Canada for the month of March, 1880 and 1881, were:

	1881.	1880.
Gross receipts	£191,718	£180,370
Working expenses	129,180	121,138
Net profit	£62,538	£59,232

—showing an increase in gross receipts of £11,348 in working expenses of £8,042, and the net profit of £3 306.

The aggregate for three months from Jan. 1 was as follows:

	1881.	1880.
Gross receipts	£514,272	£496,006
Working expenses	377,009	353 028
Net profit	£137,263	£142,978

—showing an increase in gross receipts of £18,266, with an increase in working expenses of £23,981, making a decrease in the net profit of £5,715.

Delaware River Railroad.

The board of directors of the Delaware River Railroad Company voted at their meeting in Woodbury, N. J., on the 2d inst., to increase the capital stock from $75,000 to $125,000, for the purpose of putting the road and its rolling stock in first class order. The new or additional rolling stock will cost $10,000, and the improvement of the road, such as the strengthening of the bridges, the laying of new ties, &c., will cost $15,000. The Woodbury Constitution says that arrangements have been made for carrying excursions from Wilmington to Atlantic City and Cape May this summer via the Delaware River and the West Jersey railroads. For this reason the improvement of the road will be commenced at once, so that everything will be in readiness for the season.

☞ PENNSYLVANIA RAILROAD COMPANY,
TREASURER'S DEPARTMENT.

PHILADELPHIA, May 2, 1881.

The Board of Directors have this day declared a Semi-Annual Dividend of FOUR PER CENT. on the Capital Stock of the Company, clear of all taxes, payable in cash on and after May 28 to stockholders as registered on the books at 3 P. M., April 30, 1881.

On May 28, dividends will be paid to women only; after that date, they must await their turn with other stockholders.

The Board have also instructed the Treasurer to give public notice that the stockholders will have the privilege of subscribing at par to the stock of the Company in the proportion of TWELVE AND ONE-HALF PER CENT. of the number of shares registered in their names April 30, 1881, and those entitled to a fraction of a share can subscribe for a full share. All subscriptions must be made and paid for in full prior to June 15, 1881, and no subscriptions will be received after that date. The privilege of taking new stock may be sold by any stockholder, and blank forms of allotment will be furnished upon application.

JOHN D. TAYLOR,
Treasurer.

OFFICE OF THE HOMESTAKE MINING COMPANY,
18 WALL-ST., NEW YORK, May 12, 1881.

ESTABLISHED IN 1831.
AMERICAN RAILROAD JOURNAL,
PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL COMPANY,
JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.
The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.
The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.
The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.
The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.
The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.
The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address
AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.
TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

THE EAST RIVER BRIDGE.

To the thousands who daily cross the East River on their ferry boat trips between New York and Brooklyn, and to those travellers by the Sound steamers to whom the great structure, which has been slowly growing up from the banks and stretching its web work of iron over the river, is less familiar, the East River or Brooklyn Bridge now presents a more interesting spectacle than ever before. The placing of the floor beams excites much curiosity among people generally who are watching the work as well as among engineers and builders, who have found in the different stages of work on the bridge a valuable field for study and conjecture. An interesting description of the work now in progress and facts concerning this great suspension bridge are given by the Scientific American as follows:

"The work of suspending the floor beams progresses with practical uniformity at both towers and on both sides of each tower, the design being to keep the strains on the masonry as equally balanced as possible. At this writing about twenty-five beams are in place on each side of the two towers, or something near a hundred in all. Suspender ropes are in place for more than twice as many additional beams, there being four suspenders to each beam.

From below the suspenders look like spider lines; they are, however, stout ropes of steel wire, from 1⅝ to 1¾ inches in diameter, and able to sustain a weight of 50 tons, or more each, or five times the heaviest load likely ever to fall upon them. The bands by which the suspenders are attached to the cables above are of wrought iron, five-eighths inch thick by 5 inches wide. They were put on when the cables were being wound, and fit closely to the cables. On the outer side the ends of the bands terminate in two lugs, seven-eighths inch thick. An iron screw bolt, 1¾ inches in diameter passes through the lugs to hold the suspender socket and to tighten the band around the cable. The bands were put on by the winders, who heated the backs of the bands in little forges until they could be opened far enough to let them go over the cable. The two ends of the band were then drawn together, a thin plate of iron being slipped between the cable and the hot band so as to protect the galvanizing of the wire of the wrapping until the band was cool. To these bands the suspender ropes are attached by means of wrought iron closed sockets. On the lower end of each suspender is a cast iron socket for the reception of the stirrup rods which hold the floor beam. The stirrup rods have long screw threads, by means of which the beam can be raised or lowered to regulate the floor grade, it being impossible to cut and fasten the suspenders to the exact length required.

The floor beams are made in halves at the steel works; are landed at the foot of the towers; are hoisted to the level of the bridge floor and run out upon a tramway to the point of suspension; and after being attached to the suspenders are securely riveted together, making a continuous beam the entire breadth of the bridge, or 85 feet. These floor beams are unlike any ever before used on a suspension bridge. They are 32 inches deep, 9⅜ inches wide, and weigh four tons. Each beam has two top and two bottom chords tied and braced together in the form of a triangular lattice girder. The chords are of steel channel bars. The main beams are suspended 7 feet 6 inches from centers, and between each pair of principal beams a lighter I beam is placed, resting on the truss chords, so that the floor planking will be supported and fastened every 3 feet 9 inches from centers. Wooden bridging will be inserted between the beams to resist the strain of the over floor stays. The longitudinal trusses are six in number, dividing the bridge floor into five sections. The two outside sections, 18 feet 6 inches in width, are for vehicles. A tramway will also be laid down in each, in case it may ever be desirable to run street cars across the bridge. Inside the carriageways will be two railways for cars to be propelled by an endless iron rope, operated by a stationary engine. Between the railways, and elevated 12 feet above them, will be a footwalk, 15 feet wide. This promenade will be the first part of the structure completed, since it will be needed for the workmen upon other parts of the superstructure. On both sides of the river the masonry of the approaches to the bridge is substantially finished."

A PROMISING FIELD FOR ENTERPRISING EXPLORERS.

The San Francisco News Letter says: When the late Secretary Seward purchased Alaska from the Czar he was not aware of the fact that he was getting with his countless fur-seals, fisheries, mines, and icebergs, one of the greatest rivers in the world, and now almost demonstrated to be of greater volume than the Mississippi. Such a stream is the Yucon.

The vast region it waters remains as much a terra incognita as the Congo. In fact, while the latter has been once explored—by Stanley—from the point where Livingstone turned back down to the Atlantic Ocean, and by Livingstone from its extreme sources to where Stanley's explorations began, no traveler has ever yet seen the upper water of the Yucon or has been able to enlighten the world as to its length or its source, or the region it drains.

Here, then, is an opening for enterprise and ambition, more fruitful of promise than anything as yet unrevealed in Africa or the Arctic Sea, and probably less dangerous. That the country contains mines of gold and silver, we may readily conjecture from the fact that such mines exist on all sides of it. The river is navigable for hundreds of miles. It is free from ice from June to September. Its banks are flanked below with Indian villages. Its waters are filled with fish, for the support of human life, and its woods with game. The mountains in which it rises are unknown to white men, but, as they are generally believed to be stored with that sort of treasure which led to the rapid settlement of California and to the expansion of commerce on the South and Central Pacific, there is the strongest sort of temptation on the part of thousands to see them, test them, and dig them up, if the treasure can be found.

The Government has many vessels lying idle and uselessly rotting for the want of ac-

tion. Why not fit one of them up for a two or three years' cruise on this great unexplored river of the North? The discovery of gold mines there would lead instantly to a large migration from all parts of the world, and in a few years contribute millions to the commerce of the Southern Pacific States and Territories.

A Model Street Car.

The Philadelphia Record says that a new street car has just been introduced into that city which in an artistic and sanitary point of view, is a decided innovation, and then describes it as follows:

Perfect ventilation has been secured by a perforated ceiling. The dome lamp in the centre and the side lights add increased brilliancy to the interior, besides dispensing with the obnoxious smell of oil. The windows are quite large, and besides having a patent anti-rattling attachment, are so arranged that, when desired, they can be opened to an extent that makes practically an open summer car. The platforms are made very low purposely to accommodate children and ladies. The conductor can be signaled by the passenger without rising from his seat. Above the driver's head, suspended by pivots to the roof, is a mirror set at an angle, giving him a full view of the interior. The conductor is also provided with a mirror, enabling him, by standing with his back to the door, to keep a lookout for passengers in and out of the car. Each car has a contrivance entirely novel for preventing accidents to horses which might fall down and be exposed otherwise to injury by being dragged beneath the car. Another arrangement in front of the fore wheels is designed to save human life. A further device relieves the horses from all strain in starting and, above all, the springs and spring-bed are of a new pattern, permitting the car to turn curves as on a pivot, without a jar or noise.

New Railway Signal.

The London, Ont., Free Press says that there is now on exhibition in that city an appliance intended to supersede all present modes of railway signalling. It works by electricity, and it is claimed by the inventor that it can be worked at any required distance, that it is as nearly automatic as possible. The train despatcher presses a button which sets the signal in motion, and an indicator or "reply" shows what signal has been given, i. e., whether "clear," "caution," or "danger." In case of breakage of wires communicating from signal to indicator the signal will go immediately to "danger." Another very important improvement is that the lamp cannot be lighted unless the machine is properly arranged. Only a single line of wire is necessary to communicate with signal and indicator, and there is a positive indication given on the indicator when the signal comes to "danger." The external appearance of the semaphore is all that could be desired for the purpose for which it was intended. The "Electric Railway Signal" was the invention of the late Robert Watson, but it has been improved and altered by Mr. Josiah Nesbitt, of Toronto.

The Erie Railway Company has just issued a free pamphlet entitled "Summer Homes and Sports," which is a directory to the many Summer resorts among the streams and hills along that line, giving full particulars as to trout and bass fishing, where to stop, and what it will cost. It may be had at any of the company's offices in the City.

Commerce of New York.

The foreign imports at New York for the month of April, 1881, are officially stated as follows:

	1880.	1881.
Entered for consumpt'n.	$22,064,758	$18,246,103
Do. for warehousing ...	14,338,713	8,454,351
Free goods.....	10,890,473	10,755,417
Specie and bullion	410,319	15,383,746
Total entered at port...	$47,704,263	$52,839,617
Withdrawn fr. wareh'use	6,112,693	8,593,000

The foreign imports at New York for four months from January 1, were:

	1880.	1881.
Entered for consumpt'n	$88,189,358	$72,587,313
Do. for warehouseing..	39,360,366	29,034,271
Free goods	43,763,273	42,031,040
Specie and bullion....	3,052,533	28,010,376
Total entered at port.	$174,365 530	$171,663,000
Withdrawn fr. wareh'se	27,554,144	30,798,211

The foreign imports at New York for ten months ending with April, were:

	1880.	1881.
6 months ending Jan. 1.	$266,228,601	$280,770 515
January	40,897,154	36,085,359
February.....	40,165,384	34,157 263
March	45,598,729	48,580,761
April	47 704,263	52,839,617
Total 10 mos.	$440,594,131	$452,433 515
Deduct specie	81,795,704	98,604,912
Total mdse.....	$358,798,427	$353,828,603

The duties received at New York for ten months ending with April, were:

	1880.	1881.
6 months ending Jan. 1.....	$59,271,080 94	$69,593,542 80
January	11,960,677 78	10,572,559 15
February	12,254,602 24	11,217,766 87
March	14,469,557 65	13,122,964 03
April.....	11,901,071 43	11,678,760 93
Total.....	$109,856,990 04	$116,185,593 78

The exports from New York to foreign ports for the month of April, were:

	1880	1881.
Domestic produce.....	$34,167,697	$29,156,110
Foreign free goods....	131,523	690,261
Do. dutiable....	370,628	517,044
Specie and bullion.....	194,633	1,206,984
Total exports.....	$34,864,181	$31,570,399
Do. exclusive of specie	34,669,548	30,363,415

The exports from New York to foreign ports for four months from January 1, were:

	1880.	1881.
Domestic produce.....	$115,272,408	$119,240,101
Foreign free goods..	953,825	3,931,249
Do. dutiable	1,877,488	1,883 972
Specie and bullion...	3,232,287	4,730,068
Total exports	$120,836,008	$129,785,385
Do. exclusive of specie.	117,603,721	125,055,322

The exports (exclusive of specie) from New York to foreign ports for ten months of the fiscal year:

	1880.	1881.
Six months ending Jan. 1....	$197,760,586	$220,839,350
January	25,416,566	30,264,919
February	23,891.148	28,136,303
March	33,626,459	36,290,685
April.....	34,669,548	30,363 415
Total produce ..	$315,364,307	$345,894,672
Add specie	6,565,335	9,379,464
Total exports...	$321,929,660	$355,274,136

Limited Passenger Ticket Good for a Passage if Presented within the Period of Limitation.

J. M. Evans, a citizen of St. Louis, bought on the 26th of February last from a scalper a limited ticket from St. Louis to Little Rock, paying $9 therefor, the regular fare being $14 35. The limitation of the ticket expired at midnight of the day it was bought. Evans entered a car of the St. Louis, Iron Mountain and Southern Railroad at 9 o'clock that night, and when the conductor first went around for tickets exhibited to him the ticket he had purchased, and was informed that it would expire at midnight. When that time came the train had reached a point 85 miles from St. Louis, near Arcadia. Evans was told that he must get out there, but he remonstrated and first offered $1 50 and then $1 75 to be allowed to ride till morning. His offer was refused and he was put off in the wilderness, the night being dark, cold and rainy. In trying to grope his way along in the darkness he fell into a cattle guard and received some bruises and abrasions. He filed a suit against the company, laying his damages at $1,000, and the case was tried in Judge Horner's court at St. Louis on the 11th inst. The defence was the expiration of the ticket, but the court held the law to be that the ticket was good for a passage to Little Rock from St. Louis if presented for passage within the period of limitation. The jury rendered a verdict for plaintiff for $250.

Steel Rails for the Canada Pacific Railway.

A dispatch, dated Montreal, May 14, cites as an evidence of how energetically the Pacific Railway Company is entering upon the carrying out of its great undertaking, the fact that seventeen car loads of steel rails have just been landed from the steamship Winnipeg, and loaded for transmission to the Northwest by railway. The order for these rails was sent to England after the ratification of the contract by Parliament, and the order for building the cars was given at the same time to the Ontario Car Company of London, not quite three months since. Before the Government could have accomplished this work by following out their system of advertising for tenders and the like it would have taken more than double the time, and the rails would have been arriving in the fall, just too late to be laid this year. The advantage of having an enterprising company doing the work cannot be better demonstrated than by such an example as this of how to do business.

A car for transportation of live fish, constructed by order of the United States Fish Commission, by the Philadelphia, Wilmington and Baltimore Railroad Company, arrived in Baltimore recently. It is furnished with patent refrigerators and fastenings, It will be supplied with tanks divided into compartments. The car will be used by Prof. Baird for the transportation of fish for propagation to every section of the country.

The Pittsburg, Virginia and Charleston Railroad was formally opened to Brownsville on the 16th inst,

Railroad Commissioners' Convention.

The convention of State Railroad Commissioners, which it is proposed to hold sometime next month at Louisville, Ky., will be one of especial interest owing to the extended agitation of the railroad question which the past winter has witnessed in the various States, and if fully attended and wisely conducted it can be made advantageous alike to commissioners, the States they represent, the railroads and the people. Of the twenty one States now having such commissions several have adopted them within the past few months, and while they have given them widely differing powers there are many duties assigned common to all, for the better performance of which a conference should prove a valuable aid. Among the commissioners who will attend a number have but just taken their office, and they will come direct from legislative halls where their duties have not been over clearly defined, though discussed too often in ways far from unprejudiced or practical. The entire history of railroad commissions is brief, embracing perhaps a dozen years; the first national convention of railroad commissioners was held at Springfield, Ill., in July 1875 and it has been since that date that commissions have been generally adopted throughout the country. But among those who will meet at the coming convention are several men who have been continuously connected with the Boards of their respective States since the commissions were first organized; men who have earnestly and faithfully studied the duties devolving upon them and have so performed them that the efficiency and utility of such commissions, when wisely conducted, have been demonstrated. Of such commissioners those who are now for the first time taking upon themselves the duties of the office can learn much that will be of advantage to them and the interests they represent.

Among other things which they will find, contrary perhaps to some of the ideas which may have fallen upon them with their appointments from much muddled legislatures, is that it is not so much the creation of railroad commisions that railroad men object to as it is the assumption by any inexperienced man, officially or otherwise, of the duties of railroad managers. Railroad commissioners and railroad managers when both understand their duties and their privileges, and consistently try to direct their course according to the same, as a rule find few antagonistic relations developed between them, excepting where unwise legislative action has made the duties of the State official unreasonably whimsical in character and as unpleasant as unprofitable in execution. While the functions of the various commissions differ so widely there are still many characteristics common to all, that can be discussed to advantage in such a conference, and they relate chiefly to practical matters, pertaining to the adoption of uniform and simple methods for obtaining the information desired from railroad companies; the most important duty of such commissions and the main purpose of their establishment. The policy adopted by the convention of 1879 was to avoid all discussion of abstract questions relating to railroads, and to confine the work to practical subjects connected with the primary duties of the commissioner's office, and the same policy adhered to this year will be more productive of good than would be possible under any assuming or ambiticus policy that may have been incited during the past winter by ill-advised and unscrupulous attacks upon general railroad management.

NORFOLK gives promise of rapidly taking the important position as a business center and a shipping point, which its desirable location warranted even at a much earlier period in its history. Its excellent harbor and various shipping advantages will soon be utilized to an extent that will vastly increase the commercial importance of the city. The extension of the Chesapeake and Ohio Railway and early direct communication with the Southwest and the Pacific States will not only revive and greatly extend the shipping interests of that port but will add new impetus to the activity of business enterprises and local industries, which have shown a new life during the past few years. From statistics recently published it appears that the exports of Norfolk, which in 1865 amounted to but $11,538, rose last year to $18,895,158; the cotton trade showing an increase from 6,174 bales in 1858-59 to 585,514 bales for the first six months of the cotton year of 1880-81.

Temperance Among Railroad Men.

Occasional items are found floating about, assuming the character of news in many papers in regard to certain railroad managers requiring of employes abstinence from the use of intoxicating drinks while on duty. It is spoken of as though such requirements were the exception rather than the rule, while it should be well known that in regard to no duties are railroad rules universally more strict, and their enforcement more rigidly carried out, in all departments of any responsibility or trust, than concerning that duty which demands of an employe a clear brain and steady nerves, which the use of alcoholic liquors is liable to make at any moment impossibilities. One of the first questions asked of an applicant for a position on a railroad, and one of the most important features essential to a good recommendation to such a position, will generally touch upon a man's habits as to temperance. While there must be of necessity more or less use of alcoholic drinks among railroad men, cases of intoxication among them as compared with the same number of men in other trying positions are exceedingly rare at any time, and especially so when upon duty. To their credit it can truthfully be said that this good result comes as much from a sense of honor and duty among these frequently overtaxed men as from any fear of discharge. But the rules in regard to intemperance are exceedingly strict on all well managed railroads, and on many roads no employe in any capacity whatsoever can remain who is known to use intoxicating liquors at all.

The railroad companies are doing a great deal to encourage temperance by forming voluntary temperance societies, and with considerable success, and the movement is a most worthy one and commends itself to all; but where pledges have been required of employes there has naturally been found some opposition, though when presented in the right spirit the requirement is one that it is pleasant to be-

lieve is becoming more and more cheerfully complied with. The compulsory nature of the forced pledge is likely to be looked upon as one of its most disagreeable features to the intelligent railroad man who considers his own welfare and that of others, and appreciates the responsibilities in many cases resting upon him. Concerning the injurious effects of alcoholic liquors there can be no question, and the evils from their use to which railroad men are peculiarly liable are pointedly spoken of as follows by the surgeon of the Denver and Rio Grande Railway: "The continued or the excessive periodical use of malt or alcoholic liquors should be abstained from by every one engaged in operating the road, not only on account of the great risks of life and property incurred by intrusting them to the oversight of those whose intellects may be dulled at times when most care is needed, but also, and essentially, because habitual drinking has a very bad effect upon the constitution, which is a serious matter to men so liable to injury as railroad employees are. It so lessens the recuperative powers of the body that simple wounds are followed by the most serious and dangerous complications. Fractures unite slowly, if at all, and wounds of a grave nature, such as those requiring the loss of limb, are almost sure to end fatally. No employee can afford to take such risks, and the railway company can not assume such responsibilities."

Organization.

William S. Conner has been elected president, Samuel T. Miller secretary, and Edward H. Green superintendent, of the Delaware Shore Railroad Company.

The following gentlemen have been elected trustees of the Olsen Gold Mining Company: Milton S. Latham, Wm. M. Lent, J. M. Alexander, L. M. Jones, Thos. Bell, T. F. James and Jno. Turnbull.

The Bradford, Eldred and Cuba Railroad Company filed articles of incorporation at Albany on the 11th inst., capital, $500,000. The road is to be entirely in Allegany County.

The Texas Western Railway Company on the 12th inst., filed amendments to its charter, the principal amendment providing for the construction of a line from Houston to Galveston.

The Rockaway Beach (N. Y.) Transit Company has filed articles of incorporation, capital $100,000, the road running on both sides of the beach to the hotel of the Rockaway Beach Improvement Company.

Articles of association of the Louisville, New Albany and Corydon Railroad Company were filed with the Secretary of State of Indiana on the 14th inst. The capital stock is $100,000, and the directors are: Bennett H. Young, St. John Boyle Charles Goodshaw, George Lyman, S. M. Stockslager, Thomas McGrain and Samuel J. Wright.

At a meeting of the stockholders of the California Southern Railroad Company, at San Diego, Cal., on the 3d inst., Thomas Nickerson, Thomas L. Rogers, M. A. Lull, Joseph G. Osgood and J. S. Gordon were elected directors. The officers are: President, Thomas Nickerson; vice president, Thos. L. Rogers; Secretary, G. N. Weaver; Treasurer, S. W. Reynolds; attorney, Henry E. Cooper; Chief Engineer, Joseph O. Osgood; auditor, J. H. Goodspeed.

A despatch from Portland, Oregon, dated May 11th, says the board of directors of the Oregon and California Railroad Company has elected Henry Villard president, vice R. Koehler, resigned. Paul Schulze and C. H. Lewis resigned as directors, and C. E. B. Robertson and A. G. Cunningham were elected to the vacancies. R. Koehler will act as manager for the present.

At the recent annual meeting of the Ashuelot Railroad Company, the following officers and directors were re-elected for the ensuing year: A. B. Harris, president; E. F. Lane, Treasurer; F. F. Lane, clerk; Oscar Edwards, James A. Rumrill, Tilly Haynes and Henry Colony. Seth Hunt was also re-elected assistant treasurer, and George E. Frink auditor. The office of the company is at Keene, N. H.

At a meeting of the Board of Directors of the Pittsburg, Cincinnati and St. Louis Railway Company, held on the 13th inst., the following officers were elected, G. B. Roberts, president; J. N. McCullough, first vice president; William Thaw, second vice president; Thomas D, Messler, third vice president and controller; S. B. Liggett, secretary; Stephen W. White, assistant secretary; M. C. Spencer, treasurer.

The board of directors of the Joplin and Galena Railroad Company of Missouri at its recent meeting elected the following officers: C. W. Rogers, president; John O'Day, vice president; T. W. Lillie, secretary and treasurer; A. Douglass, assistant secretary. The contract was ratified for the building of the line from Joplin to Galena, Faulkner, Diffenduffer & Co. being the contractors. Trains are to be running inside of sixty days.

The directors of the Petroleum Exchange, in this city, recently elected, are: Josiah Lombard, Livingston Roe, C. Trube, Nicholas Mehlen, Daniel Goettel. H. Robbins, G. W. Stahl, George H. Lincoln, D. R. Offley, George F. Gregory, William Jay Ives and E. Schalk. The officers are: President L. H. Smith, first vice-president W. W. Miller, second vice-president C. F. Ackerman, secretary J. F. Hughes, treasurer Henry M. Curtis.

At the annual meeting of the stockholders of the Cheshire Railroad Company, held at Keene, N. H., on the 11th inst., the following directors were chosen: William A. Russell, E. Murdock, jr., Samuel Gould George F. Williams, John B. Moer, Edward C. Thayer, James H. Williams. The net earnings of the road for the year were $64,671. The management continues to substitute new steel rails, and the road is nearly equipped with them. New engines are rapidly replacing the old ones.

At the annual meeting of the Lake Shore and Michigan Southern Railway Company, held at Cleveland, Ohio, on the 4th inst., the following gentlemen were re-elected directors for the ensuing year: William H. Vanderbilt, Augustus Schell, Samuel F. Barger, Cornelius Vanderbilt, William K. Vanderbilt, John E. Burrill, Darius O. Mills, New York; Henry B. Payne, Amasa Stone, Cleveland; Albert Keep, Chicago; William L. Scott, Charles M. Reed, Erie; Rasselas Brown, Warren, Pa. All the old officers were re-elected.

The stockholders of the Delaware and Hudson Canal Company held their annual meeting on the 10th inst., and elected the following gentlemen as a board of managers for the ensuing year: A. A. Low, James M. Halstead Le Grand B. Cannon, Thomas Cornell, Robert S. Hone, James R. Taylor, Thomas Dickson, John Jacob Astor, James Roosevelt, Adolphus Hamilton, Abraham R. Van Nest, Hugh J. Jewett, and David Dows. Mr. Jewett takes the place of Levi P. Morton, and David Dows that of George Cabot Ward. At a subsequent meeting of the directors, Thomas Dickson was re-elected President.

At Harrisburg, Penn., on the 10th inst., charters were granted to the Ohio and Baltimore Short Line Railway Company, running from Washington, Penn., to Connellsville, designed as a branch of the Baltimore and Ohio Railroad; and the New York, Pittsburg and Chicago Railroad Company, running from the mouth of the Mahoning river, in Lawrence county, to Pittsburg, a distance of 45 miles. A Merger was also recorded of the Pittsburg and Western Railroad Company of Pennsylvania with the Pittsburg and Western Railroad Company of West Virginia, with James H. Hopkins as president.

At the recent annual meeting of the directors of the Indiana and Chicago Railway Company, held at the company's office in Goodland, Newton County, Ind., for the purpose of organization, the following officers were chosen for the ensuing year, viz: William Foster, president; George Hardy, vice-president; Solomon C. Spoor, treasurer, and Z. F. Little, secretary. This contemplated line of road runs from Chicago to Attila, thence south to Brazil, Clay County, Ind., and will be of importance to the country through which it runs as well as Chicago. The line is located through the counties of Lake, Newton, Benton and Warren. In Newton and Benton counties the larger part of the grading is done.

At a meeting in Louisville, Ky., on the 11th inst., of the stockholders of the Pullman Southern Car Company, the following board of directors was elected: George M. Pullman, George F. Brown and C. H. Davie, Chicago; R. B. Bullock, Atlanta; M. Burns, Nashville; A. M. Quarrier, E. D. Sandiford, W. C. Hite and W. F. Harris, Louisville. The board elected George M. Pullman president, George F. Brown vice president, W. C. Hite second vice president, C. H. Davie general accountant, A. S. Weinsheimer secretary and Thomas Hayes general superintendent. For the year ending March 31 the gross earnings were $236,079; expenses, &c., $112,344; net revenue, $123,735.

Articles of incorporation of the following Mining Companies have been filed in the office of the county clerk of New York County: The North American Consolidated Silver Mining Company; capital stock, $500,000, divided into 250,000 shares of $2 each; trustees, Abel D. Breed and six others. The Cincinnati Consolidated Mining Company; capital stock, $500,000, divided into 250,000 shares of $2 each; trustees, Abel D. Breed and six others. The Humboldt Queen Gold and Silver Mining Company of Nevada; capital stock, $2,000,000, divided into 200,000 shares of $10 each; trustees James W. Mills and four others. The Golden Rule Consolidated Mining Company. Capital stock, $200,000, divided into 200,000 shares of $1 each. Trustees, Meyer S. Isaacs and four others.

The Secretary of State of Illinois has licensed Andrew Crawford, Joseph T. Torrence, Chas. B. Lawyer, Arthur N. Sullivan and John A. Baker of Chicago to organize the Chicago and Western Indiana Belt Railway company of Chicago, with a capital of $500,000. The object is to construct a railroad from a point on or near the east line of the town of Hyde Park to a point on or near the east line of the town of Lake View, connecting with all the railroads leading into Chicago, with one or more branches and tracks to connect with warehouses, elevators, docks, stock-yards, mills, manufacturing establishments, along or near its route, all in Cook county; for the transaction of a general transportation business.

The first board of directors are the above named persons.

The following directors of the companies named were recently elected in Philadelphia: Sunbury, Hazleton and Wilksbarre—President, J. N. Dubarry; directors, D. B. Cummins, Wistar Morris Henry M. Phillips, G. B. Roberts, Edmund Smith, John Price Wetherill. Shomokin Valley and Pottsville—President, George B. Roberts; managers, Wistar Morris, J. N. Dubarry, Jacob P. Jones, A. J. Cassett, Edmund Smith, John P. Green. Tyrone and Clearfield—President, J. N. Dubarry; directors, Wistar Morris, Strickland Kneass, Henry M. Phillips, G. B Roberts, N. P. Shortridge, Edmund Smith. The Brandywine and Waynesburg—President, John Curnog; directors, J. N. Dubarry, Edmund Smith, G. B. Roberts, S. M. Felton, N. P. Shortridge, Wistar Morris, S. Kneass, William Morton, J. M. Sloob, B. F. Kinzer, James McClune, Amos Diller. The Chartiers Railway Company—President, G. B. Roberts; directors, S. M. Felton, Alexander Biddle, N. P. Shortridge, Wistar Morris, Strickland Kneass and J. N. Dubarry. The Pomeroy and State Line—President, Strickland Kneass; directors, G. B. Roberts, Edward Smith, Wistar Morris, Eli Slifer, James P. Cohen and S. C. Stewart. Catawissa Railroad—Presidsnt, M. P. Hutchinson; directors, I. V. Williamson, F. K. Shipper, Emmor Weaver, George C. Carson, Joseph C. Harris, John S. Graham. Elmira and Williamsport—President, Thomas Neilson; managers, Thomas Kimber, William Read Fisher, Lewis P. Geiger, Thomas K. Longstreth, Alexander Bacon, William D. Neilson.

Personal.

Thomas Dickson has been elected president of the Delaware and Hudson Canal Company.

M. P. Martin, has been appointed auditor of the Eastern Division of the Northern Pacific Railroad, with headquarters at St. Paul, Minn.

Col. Francis D. Grey, of London, president of the Great Western Railway Co., is expected to visit Canada soon.

Col. N. T. Sprague, of Brandon, Vt., has been elected president of the New York and Brooklyn Elevated Railway Co., succeeding Daniel D. Badger, recently resigned.

The appraisers of the estate of the late Mark Hopkins, of the Central Pacific Railroad, have filed their account in San Francisco, placing the valuation of the property at $20,700,000.

Perceval Lowell, assistant general manager of the Burlington and Missouri River Railroad in Nebraska, has been appointed general passenger agent of the Chicago, Burlington and Quincy Railroad and leased lines in Illinois and Iowa.

J. H. Jones, president of the Buffalo, Pittsburg and Western Railroad Co. returned to Philadelphia last week after making a tour of inspection over the extensions of that road. It is expected that the extensions will be completed early in August.

B. F. Tilden has been appointed joint ticket agent at Indianapolis of the Pittsburgh, Cincinnati and St. Louis, Indianapolis and Vincennes, Terre Haute and Indianapolis Railroads, in place of J. H. Smith resigned.

O. M. Babcock, of Philadelphia, delivered an address at Chickering Hall, this city, Monday night, on the "Keely Motor," giving a description of the motor and an exposure of the alleged mismanagement of the company having it in charge.

William E. Downie has resigned the position of Superintendent of the Brooklyn, Flatbush and Coney Island Railroad. J. L. Morrow, former master of transportation on the Long Island Railroad, is mentioned as his probable successor.

Among the prominent railroad men who arrived in the city early in the week were Joseph Hickson, general manager of the Grand Trunk Railway of Canada, P. L. Cable, president of the Rock Island, and Peoria Railway Co., Wm. W. Wadloy, president of the Central Railroad of Georgia, and Robert Garrett of the Baltimore and Ohio.

Henry Villard, president of the Oregon Railway and Navigation Co., is said to have been among the first of the Pike's Peak emigrants. He was born in Speyer, the capital of Rhenish Bavaria, in 1835. He came to this country when twenty one years old and among his active and varied experiences here have been those of a war correspondent.

The Ohio State Journal says: "President Eells of the Ohio Central railroad, announces that hereafter no Sunday excursion trains will be run on that road so long as it remains under the present management. Mr. Eells says on behalf of the managers: 'We think all laboring men should have one day in seven for rest and worship, and are disposed to accord this to all our employes as far as possible.'"

A. A. Gaddis, who has been the general manager of the Boston Hoosac Tunnel and Western Railway since the line was extended from the Hoosac Tunnel to the Hudson River, has resigned that position, to devote his entire time to the Ogdensburg and Lake Champlain railroad, with which he has been connected for some time. The Boston Journal says: Mr. Gaddis, who is also general manager of the Ogdensburg and Lake Champlain Railroad, has only held the Managership of the Hoosac Tunnel and Western Railway since its recent sale at the urgent request of its officers and owners, and now that its transfer to its new purchasers is soon to be made, has sent in his resignation and will give his whole attention to the Ogdensburg Road, removing with his family to Ogdensburg.

Interest and Dividends.

The Pullman Palace Car Company has declared a quarterly dividend of 2 per cent, payable May 16.

The Ashuelot Railroad Company has declared its regular quarterly dividend of 1½ per cent, payable July 1.

The Middlesex Railroad Company has declared a dividend of $3.50 per share, payable at the Treasurer's office, Boston, on the 16th inst.

The Danbury and Norwalk Railroad Company has declared a quarterly dividend of 1½ per cent payable June 1.

The Iowa Falls and Sioux City Railroad Company has declared a dividend of $1 per share, payable June 1.

Coupons of the mortgage bonds of the New York, Lake Erie and Western Railroad Company, due June 1, 1881, will be paid on presentation on and after that date at the Treasurer's office, 21 Courtlandt street.

The Northern (N. H.) Railroad Company has declared a dividend of $3 per share, payable June 1, 1881, at Boston, Concord and Lebanon, to stockholders of record May 13th.

The Delaware and Bound Brook Railroad Company has declared a quarterly dividend of 1½ per cent, to be credited to the stockholders, less 5 per cent (retained as continaent fund), payable on the 16th inst.

The North Pennsylvania Railroad Company has declared a quarterly dividend of 1½ per cent, (less five per cent of the amount retained for contingent fund), payable on the 25th instant.

The Delaware and Hudson Canal Company has declared a dividend of 1½ per cent, payable June 10. The last dividend was in August, 1876, when 4 per cent was paid.

The stockholders of the Georgia Railroad Company, in convention at Augusta, Ga., on the 11th inst., ratified the lease to Wm. M. Wadley and instructed the directors to pay $3 50 dividend on July 15 and $2 50 in October. Afterwards $2 50 per share will be paid quarterly, making 10 per cent yearly.

Railroad Earnings.

The earnings of the Indiana, Bloomington and Western Railway for the month of April, were $103,554 88; corresponding month last year, $90,375 00; increase, $13,179 88.

The Denver and Rio Grande Railway earnings reported are . first week of May $111,673, corresponding week last year, $39,329 00; second week of May $115,258, corresponding week last year, $41,958; miles now operated 690, operated last year 337.

The Great Western Railway of Canada earnings for week ending May 6, $107,690; corresponding week last year, $87,412; increase, $20,278. The increase of earnings from Jan. 1 to May 6 over corresponding period last year amounts to $159,401.

The Chicago and Grand Trunk Railway earnings for week ending May 7, $18,715; corresponding week last year, $14,897; increase, $3,818; aggregate increase for 18 weeks this year over corresponding period last year, $105,720.

The earnings of the St. Paul, Minneapolis and Manitoba Railway for the week ending May 7, were $81,941 94 an increase of $24,267 19 over corresponding week last year. From Jan. 1 to May 7 the earnings were: $1,242,259 07; corresponding period last year, $970,369 85; increase, $271,889 22.

The Flint and Pere Marquette Railroad earnings for week ending May 7, $36,705 70; corresponding week last year, $28,861 10; increase, $7,844 60. From Jan. 1 to May 7 the earsings were, $620,076 50 as compared with $534,630 90, for corresponding period last year.

Manufacturing.

C. Shaler Smith, of the Baltimore Bridge Company, is finishing ten spans of iron bridge on the Atchison, Topeka and Santa Fe Railway and twelve spans on the Gulf, Colorado and Santa Fe Railroad. He is also putting in two large viaducts on the Gunnison extension of the Denver and Rio Grande Railway.

The works recently opened by the Allen Paper Car Wheel Company at Pullman, near Chicago, will have a capacity of nearly double that of their works at Hudson. The present capacity of both works running a double time is about 30,000 wheels per year. Four years ago but 74 paper car wheels were made in this country; the production of this company at Hudson for the month of April amounted to about $70,000 worth of wheels.

Removals.

Paine, Webber and Co., bankers and brokers, Boston, have removed from 48 Congress street to 53 Devenshire street, that city.

The offices of the Texas and Pacific Railway Co. have been removed from Philadelphia to this city. They are located in the Western Union Telegraph building, corner of Broadway and Dey street, and were opened Monday morning.

The Washington (D. C.) Belt Line Railroad has made its connection between its Virginia Avenue Line and its Eleventh Street Line, and that portion of the road is now ready for the cars.

Mexican Railroads.

The Chicago Inter-Ocean has received a letter from its correspondent who accompanied Gen. Grant to Mexico, in which it is announced that the General has secured the railroad concession which he went there to obtain from the Mexican Government. The letter says that the contract sought by the General in behalf of his company has been thoroughly canvassed by the Government, and its acceptance practically determined on; and as soon as certain necessary formalities are complied with, final action will be taken in accordance therewith. Gen. Grant never was more popular than now. A telegram of welcome from the Mexican President awaited his arrival at Vera Cruz. Ex-Senator Chaffee and U. S. Grant, Jr., are now on their way to the United States. The engineers sent out by Capt. Eads some months since to make a survey for the proposed marine railway across the Isthmus of Tehuantepec, have discovered two practicable routes, one by way of Tarifa Pass and the other by Chicela, not only practicable, but both of them more favorable for the construction of the road than had been anticipated. The Captain has been given the contract of designing a system of improvements of the Harbor of Vera Cruz, and is already busily engaged in preparing plans for that work, and the additional legislation sought by him on the subject of his interoceanic ship railway is already in an advanced stage and everywhere regarded as certain to be duly accomplished.

Redemption or Continuance of Five Per Cent Bonds.

The Secretary of the Treasury issued on the 12th inst. the following circular calling in for redemption, or for continuance at 3½ per cent interest, all the coupon five per cent bonds, and $250,000,000 of the registered bonds—the remainder of the loan being reserved with a view to its payment from the surplus revenues:

TREASURY DEPARTMENT,
WASHINGTON, D. C., May 12, 1881.

By virtue of the authority conferred by law upon the Secretary of the Treasury, notice is hereby given that the principal and accrued interest of the 5 per cent coupon bonds, issued under the acts of July 14, 1870, and Jan. 20, 1871, and now outstanding and uncalled, will be paid at the Treasury of the United States, in the city of Washington, D. C., on the 12th day of August, 1881; and that the interest on said bonds will cease on that day, and none of these bonds will hereafter be exchanged for registered bonds bearing 5 per cent interest; provided, however, that in case any of the holders of the said coupon bonds shall request to have their bonds continued during the pleasure of the Government, with interest at the rate of 3½ per cent per annum, in lieu of their payment at the date above specified, such request will be granted, if the bonds are received by the Secretary of the Treasury for that purpose on or before the 1st day of July, 1881.

The Secretary also announces that, until the date mentioned, July 1, 1881, he will receive for continuance, in like manner, subject to the like conditions, any of the uncalled 5 per cent registered bonds of the acts of July 14, 1870, and Jan. 20, 1871, to an amount not exceeding $250,000,000, the remainder of the loan being reserved with a view of its payment from the surplus revenues. Foreign holders of any of the 5 per cent bonds above described may have them continued as above provided upon the receipt of the bonds at the Government Agency established for that purpose at the banking house of Messrs. Morton, Rose & Co., Bartholomew-lane, London, England.

The request above mentioned should be in form substantially as herewith prescribed, and upon the surrender of the bonds with such request, the Secretary of the Treasury will return to the owners registered bonds of the same loan with the fact that such bonds are continued during the pleasure of the Government with interest at the rate of 3½ per cent per annum stamped upon them in accordance with this notice. Upon the receipt of bonds to be continued as above provided, the interest thereon to Aug. 12, 1881, will be prepaid at the rate the bonds now bear. Registered bonds to be continued should be assigned to "The Secretary of the Treasury, for continuance;" under the provisions of this circular they will be accepted for that purpose in the order of their receipt at the department.

The department will pay no expense of transportation on bonds received under the provisions of this circular, but the bonds returned will be sent by prepaid registered mail, unless the owners otherwise direct. All bonds, whether intended for payment or to be continued, should be forwarded to the "Secretary of the Treasury Loan Division," with a letter of transmission, setting forth the purpose for which they are transmitted, and if to be continued they must also be accompanied by the request above referred to, and the package containing the bonds should be marked "Bonds for continuance."

WILLIAM WINDOM, Secretary.

The following is the form of request for continuance of bonds:

[Date.]——

To the Secretary of the Treasury:

Under the terms of the circular No. ——, issued by the Secretary of the Treasury May 12, 1881, —— the undersigned, owner of the below described United States 5 per centum bond—, issued under the acts of July 14, 1870, and Jan. 20, 1871, hereby request that —— payment to be deferred and that —— be continued during the pleasure of the Government to bear interest at the rate of 3½ per cent per annum from Aug. 12, 1881, as provided in said circular, and in consideration of the premises, —— hereby waive and release all rights to or claim for any interest on said bonds —— in excess of 3½ per centum per annum on and after said date of Aug. 12, 1881, and in witness thereof —— have hereunto set —— hand —— and seal —— this day. [Here describe the bonds, stating whether registered or coupon, denomination, serial numbers, and amounts.]

[Seal] Signature and post office address.]

[NOTE.—The seal should be of wafer or wax if not executed by a corporation. In case the above request is signed by an officer of a bank or other corporation, it should be accompanied by the proper authority, certified by some officer of the institution other than the one empowered to act. If the bonds are presented at the London agency the forms of request for their continuance must be executed in duplicate. The form of request prepared in blank for use will be furnished upon application to the Secretary of the Treasury.]

The amount of the coupon bonds above referred to which are now outstanding and covered by the call is about $120,000,000. The amount of the registered 5 per cent bonds is about $325,000,000. The privilege of extending registered 5 per cents at the reduced rate of interest being limited to $250,000,000, there will remain at least $75,000,000 which the Secretary of the Treasury intends to pay absolutely out of the surplus revenues. It is believed at the department that much more than $250,000,000 of these registered bonds will be offered for continuance, but all applications received after the maximum of $250,000,000 shall have been presented will not be entertained.

An Important Southern Railroad Syndicate.

The organization of one of the largest syndicates ever found in this country for the purchase of railroad interests was announced in this city Monday. The scheme is described as embracing the establishment of a system from the Northwest and Southwest to the Atlantic coast by the purchase of existing lines and the building of new roads. It is said that the syndicate has subscribed $16,000,000 of capital and that purchases have already been concluded of the Macon and Brunswick road of Georgia, the East Tennessee and Virginia system of roads, embracing 619 miles, the Selma, Rome and Dalton and the Memphis and Charleston roads, covering in all about 1,300 miles. Contracts for the construction of several hundred miles will at once, it is said, be let, and the various systems connected, Col. E. W. Cole, of Tennessee, to have charge of the purchase and building for the extension.

Ashuelot Railroad.

The annual statement of this company, made up to April 2, 1881, shows the amount received for rent for the use of the road to have been $14,717; interest received, $1,729—making a total of $16,446 for the year. This is an increase of $1,162 over the earnings of the preceding year. Against this is charged taxes, $1,792; general salaries and expenses, $555; four quarterly dividends of 1½ per cent each, $12,600; amount carried to contingent fund, $922, leaving a balance of $576 to be carried to profit and loss. The treasurer's balance sheet of March 31 is as follows:

ASSETS.

Construction	$218,680 97
Due from Connecticut River Railroad Company	11,062 54
Due from other companies	6,450 86
Bills receivable	4,504 90
Total	$240,699 27

LIABILITIES.

Capital stock	$210,000 00
Contingent liabilities	11,468 75
Dividend No. 12	3,150 00
Credit balances	541 98
Contingent fund	1,759 06
Surplus	13,779 48
Total	$240,699 27

Philadelphia and Reading Companies.

George M. Dallas, Special Master of the Philadelphia and Reading Railroad Company, has filed his tenth audit of the accounts of the railroad and the Coal and Iron Company in the Clerk's office of the United States Circuit Court. The report covers the month of March, and shows that the balance in hand, as indicated by the statements of the railroad company, was $304,182 32. The receipts from travel, freight, canal tolls, &c., during the month amounted to $2,009,842 62; miscellaneous receipts, $48,902 66; notes, real estate sold, &c., $334,984 05; total receipts, $2,607,911 05. Payments, $2,184,812 25, leaving a balance on hand April 1, of $513,099 40. The balance on hand by the Coal and Iron Company for the month at the close of February was $52,-

997 27. Receipts during the month, $1,069,700 80; payments, $1,093,040 87. Balance on hand April 1, $29,657 20.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad Company for the month of March, 1880 and 1881, is officially stated as follows:

	1880.	1881.
Gross earnings....	$1,644,958 19	$1,847,261 44
Working expenses.	902,026 98	1,143,258 14
Net earnings..	$742,931 21	$704,003 30

—showing an increase in gross earnings of $202,303 25, with an increase in working expenses of $241,231 16, making a decrease in the net earnings of $38,927 91.

For the first six months of the fiscal year (October 1, 1880, to March 31, 1881,) the gross earnings, working expenses and net earnings were:

	1879 and 1880.	1880 and 1881.
Gross earnings...	$8,821,334 40	$10,190,499 71
Working expenses	5,762,315 43	6,635,150 00
Net earnings.	$3,059,018 97	$3,505,349 71

—showing an increase in gross earnings of $1,319,165 31, with an increase in working expenses of $872,834 57, making an increase in the net earnings of $446,350 74.

Anthracite Coal Tonnage.

John J. Jones, accountant of the Philadelphia and Reading Railroad Company, makes the following statement of anthracite coal tonnage for the month of April, 1881, compared with the same period last year.

	April, 1881.	April, 1880.
Philadelphia & Reading R. R.....	480,601 02	539,709 05
Lehigh Valley R. R..	403,682 03	387,101 19
Central Railroad of New Jersey.....	274,112 10	307,940 02
Delaware, Lackawanna and Western R. R..	286,483 13	279,439 09
Delaware and Hudson Canal Co.....	197,192 18	228,481 07
Pennsylvania Railroad	187,674 10	136,549 00
Pennsylvania Coal Co.	87,952 09	100,279 07
New York, Lake Erie and Western R. R..	28,156 00	37,139 17
Total.....	1,945,855 05	2,016,640 06

The stock of coal on hand at tidewater shipping points April 30, 1881, was 528,198 tons; on March 31, 1881, 563,063 tons—decrease 34,865 tons.

Cincinnati Southern Railroad.

The Trustees of the Cincinnati Southern Railroad passed on the 14th inst. a resolution to advertise for proposals at once for the lease of the road for 25 years. Bidders are requested to bid for each of three plans. First—gross earnings; second—rental plan, under which the rental is to pay a specific rental, scaled for different years; third—guarantee plan, under which the lessee is secured in a certain per cent on his investment and pays the city the remainder. Proposals are also invited for the purchase as well as for the lease of the road. The bids are to be opened Aug. 18. Advertisements for proposals will be published in the Cincinnati papers, in papers in all the money centres in the East, also in papers in London, Paris and Frankfort. It is believed that the Sinking Fund Commissioner, who must, according to law, pass upon this action of the Trustees, will pass upon it promptly. Public opinion is strong for speedy, definite action on this matter.

Grand Trunk Railway of Canada.

The Directors of the Grand Trunk Railway publish in England a monthly statement of the gross receipts and expenses of the road, and the following are the figures for the first three months of this year, in comparison with the corresponding period in 1880:

	1881. £	s.	d.	1880. £	s.	d.
Gross receipts:						
January.....	164,259	4	11	162,243	1	7
February.....	158,295	4	1	153,393	9	10
March	191,718	18	0	180,369	13	2
Total.....	514,273	7	0	496,006	4	7
Total expenses:						
January.....	126,863	13	2	119,835	4	4
February.....	120,066	4	0	112,054	19	8
March.....	129,180	16	5	121,137	11	4
Total.....	377,010	13	7	353,027	15	4
Net earnings.	137,262	13	5	142,978	0	3

Decreased net earnings, three months, £5,715 12s. 10d; this is equal to $27,816 85.

From this statement it will be observed that while there has been a considerable increase in receipts, the working expenses, including wages, fuel, stores, &c., have advanced in a greater proportion, the result being less favorable than for the same three months of last year.

It is stated that the employees have been largely influenced in their demands for higher pay by the weekly statements of increased receipts, and it is quite likely that there may be some foundation for the report.—[Montreal Witness.

Norfolk and Western Railroad.

The following is a comparative statement of revenue of the Atlantic, Mississippi and Ohio Railroad, now "Norfolk and Western Railroad Company," for nine months ending March 31, 1880 and 1881:

	1879-'80.	1880-'81.
July	$138,223 91	$145,585 32
August	134,955 44	179,946 95
September	177,342 34	209,446 21
October	200,307 63	235,909 95
November	179,970 35	209,946 81
December.....	203,328 58	181,745 72
January.....	156,870 02	164,916 62
February.....	161,953 55	153,633 05
March.....	175,419 78	195,650 42
Total	$1,528,371 60	$1,675,881 07
April	143,099 57	*173,000 00
Grand total...	$1,671,471 17	$1,848,881 07
Increase in favor of 1881.....		$177,409 90

* Estimated.

Atlantic and Northwestern Railroad.

At a meeting of the Guyandotte and Ohio River Railroad and Mineral Company, recently held at Barboursville, W. Va., the name of the company was changed to the Atlantic and Northwestern Railroad Company, and an act of the Legislature of West Virginia extending the scope of the charter was accepted. This company now has the right to build from the Virginia line along New and Guyandotte rivers to the Ohio, and to extend to Wheeling. It has also the right to obtain the control of any connecting railroad. It controls an enormous area of mineral and timber lands, embracing over seven hundred square miles of territory. The stockholders at their recent meeting elected the following board of directors: Joseph S. Miller and H. J. Samuels, of West Virginia; H. D. Whitcomb, H. K. Ellyson, Otis H. Russell and H. C. Parsons, of Virginia; William Walter Phelps, of New Jersey; George M. Bartholomew, of Connecticut; Cyrus H McCormick, Jr. of Illinois; counsellor, Thomas Ewing, of Ohio. Mr. H. C. Parsons, president of the Richmond and Alleghany Railroad Company, was elected president of the new company. It is claimed that this line furnishes a favorable route to the Ohio, and will develop a mineral district rich beyond comparison.

Great Western Railway of Canada.

The gross receipts, working expenses and net earnings of the Great Western Railway Company of Canada for the month of March, 1880, (excluding leased lines) were as follows:

	1881.	1880.
Gross receipts	£91,315	£84,164
Working expenses, including transfers to reserve funds...	57,616	48,452
Net.....	£33 699	£35,712

—showing an increase in gross receipts of £7,151, with an increase in working expenses £9,164, making a decrease in net earnings of £2,103.

The aggregate for two months ending with March, was as follows:

	1881.	1880.
Gross receipts.....	£158,445	£145,788
Working expenses	110,836	94,993
Net	£47,609	£50,795

—showing an increase in gross receipts of £12,657, with an increase in working expenses of £15,843, making a decrease in net earnings of £3,186.

The Pennsylvania Railroad engineers have located a line from Latrobe to Mount Pleasant, in Westmoreland county, Penn. They will also locate a low-grade division of the Western Pennsylvania Railroad from Bolivar, on the main line of the Pennsylvania Railroad, to the junction of the Western Pennsylvania and the Allegheny Valley Railroads.

The managers of the Grand Trunk Railway of Canada have purchased the Grand Junction Railway from Belleville to Madoc and from West Huntingdon to Peterborough, with a view, it is said, to prevent the Ontario and Quebec Railway Company getting the use of it while the latter road is in progress.

The State Department at Harrisburg, Pennsylvania has granted a charter to the Tionesta Railway Company with a capital stock of $800,000. The road is to be run from Tionesta to Sheffield, Warren county, a distance of 35 miles. The President is J. W. Jones, President of the Buffalo, Pittsburgh and Western Railway.

The directors of the Cincinnati, Hamilton and Dayton, and of the Cleveland, Columbus, Cincinnati and Indianapolis Railroads have agreed upon terms of consolidation. The shares of both companies will be rated at par in the new company. The proposition will be submitted to the stockholders.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, April 30, 1881.

WILLIAM WINDOM,
Secretary of the Treasury.

A dispatch, dated Oaxaca, Mexico, May 14th, says that Mr. Romero has published there and at the City of Mexico his full report of the proceedings taken in the United States touching the building of railroads in Mexico, and that in Oaxaca all misapprehensions on this subject have subsided. The public feeling is growing entirely favorable to American enterprise and the prospect now is that General Grant will obtain from the authorities all that he asks for in connection with the railway projects in behalf of which he has concerned himself.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending May 7, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad	197,370	2,956,951	2,809,724
Schuylkill Canal	18,082	60,265	114,948
Lehigh Valley	145,467	2,256,142	1,748,035
Del., Lack. & Western.	98,976	1,358,874	1,143,070
Shamokin Valley	17,524	345,190	278,972
Central New Jersey.	84,334	1,319,247	1,129,675
United R. R. of New Jersey	39,903	535,816	347,764
Pennsylvania Coal	20,031	367,492	307,746
Delaware and Hudson	73,940	1,165,603	1,065,151
Huntingdon & Broad Top Mt.	6,975	151,078	171,770
Penn. and New York.	34,659	564,768	478,799
Clearfield, Pa.	56,707	799,451	409,481

The total tonnage of anthracite coal from all the regions for the week ending May 7, as reported by the several carrying companies, amounted to 644,095 tons, against 397,884 tons in the corresponding week last year, an increase of 246,211 tons. The total amount of anthracite mined for the year is 8,655,026 tons, against 7,273,802 tons for the same period last year, an increase of 1,381,224 tons. The quantity of bituminous coal sent to market for the week amounted to 112,643 tons, against 79,673 tons in corresponding week last year, a decrease of 32,970 tons. The total amount of bituminous mined for the year is 1,601,788 tons, against 1,273,353 tons for the corresponding period last year an increase of 328,430 tons. The total tonnage of all kinds of coal for the week is 756,738 tons, against 477,557 tons in corresponding week last year, an increase of 279,181 tons, and the total tonnage for the coal year is 10,256,809 tons, against 8,547,155 tons to same date last year, an increase of 1,709,654 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending May 7 was 174,585 tons, of which 124,270 tons were coal and 50,315 tons coke. The total tonnage for the year thus far has been 3,119,606 tons, of which 2,230,759 tons were coal and 888,847 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended May 7 were 43,824 tons, and for the year to that date 595,431 tons, a decrease of 47,885 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 26,042 tons; year, 480,806 tons; decrease as compared with 1880, 5,589 tons. Chesapeake and Ohio Canal—week, 14,185 tons; year, 57,950 tons; decrease as compared with 1880, 8,999 tons. Pennsylvania Railroad—week, 3,397 tons; year, 56,675 tons; decrease as compared with 1880, 23,296 tons. The Reading Railroad coal shipments for last week, ending May 14, were 114,000 tons, of which 32,600 tons were sent to Port Richmond and 34,500 tons shipped thence, and 6,900 tons were sent to Elizabethport and 12,500 tons shipped thence. —[Phila. Ledger, May 16.

It is stated that the transfer of the Grand Junction Railway to the Grand Trunk Railway of Canada will take place about June 1. It is also said that the road has been bonded at $900,000, and that the bonds have been purchased by the Grand Trunk at 92½.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, May 19, 1881.

Money is extremely easy at 2@3 per cent for call and time loans, and 3½@4 per cent for the best mercantile paper.

The market for foreign exchange is weak. The leading drawers of sterling this morning reduced the posted discount rates to 4.85½@4.87½. The actual rates are 4.84¼@4.84¾ and 4.86¼@4.86¾. Cables are 4.86½@4.87. Prime commercial bills are 4.82¾@4.83.

The trustees for the bondholders and creditors of the Virginia Midland Railroad Company request the holders of certificates representing the first and second mortgage bonds of the Orange and Alexandria Railroad Company to present the same, on or after 23d instant, at the office of the Safe Deposit Company of Baltimore, and receive in exchange new bonds. The latter will cover the principal and interest of the old issues up to 1st July, 1880, and bear interest at 6 per cent, payable semi-annually from 1st March, 1881. The interest on the old bonds from 1st July, 1880, to 1st March, 1881, will be paid in cash at the Safe Deposit Company's office.

The amount of gold coin in the United States on the 1st instant is estimated by the director of the Mint at $520,002,000, of which about $264,000,000 was held as Treasury and bank reserves, and $256,000,000 was in actual circulation. The gain of coin and bullion since 1st July, 1879, was $284,000,000, of which $140,000,000 was added to the circulation. The amount of gold in the

United States is exceeded only in two countries in Europe, namely, by $596,000,000 in England, and $927,000,000 in France. The circulation in England is estimated at $428,000,000, and in France at $816,000,000. The larger proportion of circulation in the latter countries is attributed to the fact that their coinage is of much smaller denominations than that of this country. The largest English gold coin is the Sovereign, which is the equivalent to about $4 86½, while in France for many years past nearly 99 per cent of the gold coinage was in pieces of less than $5. Since 1st July, 1879, the coinage of the smaller gold pieces has been considerably increased, and the director believes that the absorption of $140,000,000 into active circulation since that date is owing, to a considerable extent, to that circumstance.

The trustees of the deed of trust under which the bonds of the Canton Co. of 1874 at 6 per cent are issued give notice that they will select $148,000 of said bonds by lot on 25th June proximo, for redemption. The funds applied to the payment of these bonds are the proceeds of a sale of land by the Canton Company of Baltimore to the Northern Central Railway. The total amount of the bonds outstanding is $1,076,000.

We republish this week the Statement of the Public Debt of the United States as of April 30, 1881.

The closing quotations on Thursday were: Adams Express, 130@132; American Express, 87@88; American District Telegraph, 56@58; Atlantic and Pacific Telegraph, —@55; Chicago, Burlington and Quincy, 166¼@167; Canada Southern, 78@78¼ Chicago and Northwestern, 128¾@128⅞; do. pref., 141½@142; Central Pacific, 91⅛@91¾; Chicago, Milwaukee and St. Paul, 121¼@121½; do. pref., —@132; Chicago, Rock Island and Pacific, 143⅛@144; Cleveland, Columbus, Cincinnati and Indianapolis, 97¼@97¾; Columbus, Chicago and Indiana Central, 31⅝@31¾; Delaware and Hudson Canal, 113@¾113⅞; Delaware, Lackawanna and Western, 125½@125⅝; Hannibal and St. Joseph, 77⅜@77½; do. pref., 112⅜@112½; Lake Erie and Western, 56@57; Lake Shore and Michigan Southern, 132¾@132⅞; Metropolitan Elevated, 90¾@91½; Manhattan Elevated, 24⅞@25; Michigan Central, 113½@113⅝; New York Elevated, 107¾@108½; New York, Lake Erie and Western, 49⅝@49¾; do. pref., 91@91½; New York Central and Hudson River, 150⅝@150¾; Ohio and Mississippi 47@47⅛; do. pref., 123; Ohio Central, 35⅛@35¼; Pacific Mail, 55⅞@56; St. Louis, Alton and Terre Haute, 70@72; do. pref, 137@141½; Texas and Pacific, 67⅜@67½; Union Pacific, 123¼@123½; United States Express, 67½@68½; Wells Fargo Express, 118½@119½; Western Union Telegraph, 120@121; do. ex. div., 90½@90¾; Wabash, St. Louis and Pacific, 55⅝@55¾; do. pref., 94¾@95.

Right of Railroad Companies to take Timber, etc., from Adjacent Public Lands.

The Secretary of the Interior has addressed a letter to the Commissioner of the General Land Office relative to the right of railroad companies to take timber from public lands by virtue of the "right of way" act of 1875. The law referred to provides that any railroad company shall have the right to take from public lands adjacent to their road material, earth, stone, and timber necessary for construction purposes. The Secretary says that this law refers exclusively to contemplated or unconstructed roads. Companies have no right to take timber for repairs. Congress evidently meant timber standing or growing adjacent to the line, as distinguished from timber further off; hence, the nearest timber upon the public lands, measuring laterally from the line of road within the termini thereof. To hold that timber in all instances must be taken from the nearest points to the road, measuring laterally from the line, would in many cases defeat the intention of Congress. Such would be the case in sections of country where no timber could be found for many miles on either side of the line. In such cases the Secretary is of opinion the law contemplates that timber may be taken from any point opposite the line within the termini and carried forward and distributed as required in construction. This right, however, is granted only to railroad companies organized according to the provisions of the act of 1875. No company has the power to "give general authority to the public" to cut timber from public lands.

☞ PENNSYLVANIA RAILROAD COMPANY,
TREASURER'S DEPARTMENT.

PHILADELPHIA, May 2, 1881.

The Board of Directors have this day declared a Semi-Annual Dividend of FOUR PER CENT. on the Capital Stock of the Company, clear of all taxes, payable in cash on and after May 28 to stockholders as registered on the books at 3 P. M., April 30, 1881.

On May 28, dividends will be paid to women only; after that date, they must await their turn with other stockholders.

The Board have also instructed the Treasurer to give public notice that the stockholders will have the privilege of subscribing at par to the stock of the Company in the proportion of TWELVE AND ONE-HALF PER CENT. of the number of shares registered in their names April 30, 1881, and those entitled to a fraction of a share can subscribe for a full share. All subscriptions must be made and paid for in full prior to June 15, 1881, and no subscriptions will be received after that date. The privilege of taking new stock may be sold by any stockholder, and blank forms of allotment will be furnished upon application.

JOHN D. TAYLOR,
Treasurer.

Paine, Webber & Co.,

BANKERS AND BROKERS,

(Members of the Boston Stock Exchange.)

53 Devonshire St., Boston.

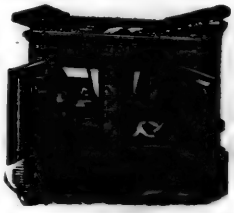
NEW ISSUE OF U. S. TREASURY NOTES

NOT COUNTERFEITED.



1s In centre is portrait of George Washington.
2s Portrait of Thomas Jefferson.
5s Portrait of Andrew Jackson.*
10s Portrait of Daniel Webster.*
20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

It has been decided to broaden the gauge of the Toronto and Nipissing Railway from its present width of three feet six inches to the standard of four feet eight and one half inches by the laying of a third rail. The rails have been ordered from England the first shipment to be made in July. The change will be effected in time for the fall traffic, and by the method adopted no interruption will occur in the operation of the road.

The Wooster and Lake Erie Railroad, recently incorporated, will extend from Wooster, Ohio, to Russell Station, the junction of the New York, Pennsylvania and Ohio, and the Cleveland, Tuscarawas Valley and Wheeling Railroads, a distance of 13 miles. The capital is $60,000, in shares of $50 each.

LELAND HOTEL, CHICAGO, ILL., FINEST location in the city, corner Michigan avenue and Jackson street; fronting on the beautiful lake and park; two blocks from the Custom House and Post-office. Newly furnished and reconstructed. American plan. Popular prices, $3 and $3 50 per day. WARREN F. LELAND, Proprietor, late of Delavan House, Albany.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts.

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

ESTABLISHED IN 1831.
AMERICAN RAILROAD JOURNAL,
PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL COMPANY,
JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.
The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.
The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.
The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.
The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.
The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.
The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

SECOND QUARTO SERIES, VOL. XXXVII., No. 22.] NEW YORK, MAY 28, 1881. [WHOLE No 2,353, VOL. LIV.

HOW OLD RAILS ARE MADE INTO NEW.

In speaking of the amount of handling required to convert an old iron rail into a new one the Indianapolis Journal says: "From the time it arrives in the yard at the Indianapolis rolling mill until it is shipped out, a rail is handled thirty-one times. The process is as follows: It is first unloaded from the car, then picked up and run on a set of roll to the shears, then cut up, when cut piled into fagots, then loaded on to a barrow and charged into furnace, heated to a welding heat, then hauled out and placed on iron buggies, run to weighing rolls, handled six times, until finished to a bloom, then returned to a buggy, carried to a repeating furnace, brought to a welding heat, then returned to the rolls on a buggy, passed through the rolls nine times, then run to saws where both ends are put off at once, then laid on the cooling bed; when cold, placed under the straightener, which takes out all minor crooks. The burr on the ends is then filed off, when the rail is inspected, then taken to the punching machine and fitted for splice bars, thence to the slotting machine, where it is slotted for the spikes; then the rail goes on the benches in the yards and from thence to the cars."

BITUMINOUS COAL FOR FAST LOCOMOTIVES.

Much attention has been recently directed to the advantages offered by bituminous coal over anthracite for the generation of steam. While paying a high compliment to American machinists, in pronouncing our freight locomotives to be the best in the world for the conditions under which they are used, the London Engineer refers to the high rate of speed of fifty and sixty miles an hour attained by English passenger engines, considering it impossible to maintain that speed excepting by the use of quick burning bituminous coal, and says: "Until American engineers give up anthracite they will never attain perfection in fast locomotives. There seems to be an insuperable difficulty in burning it quickly enough. The consumption of coal in English engines is at the rate of ninety pounds or one hundred pounds per square foot of grate per hour with fast trains, and this with a single five-inch blast pipe for two eighteen inch cylinders. This gives more than sufficient draught. The Reading engine seems to be unable to burn more than half this quantity of anthracite in the time. Hence the colossal firebox, which spoils the whole engine. The use of anthracite for the specified purpose is all very well for the moment, but when American engineers establish services of really fast trains on all their principal lines, they will find it pay to give up anthracite in favor of bituminous coal."

A CURE FOR CAR SICKNESS.

For many persons there is as much suffering to be experienced in the way of nausea and headache on a railroad journey as there would be to the ordinary traveller from the sea-sickness of an ocean voyage. What is known as "car-sickness" is by no means uncommon, especially among ladies, and its discomforts make burdens of many trips that would otherwise be full of enjoyment. To many sufferers from this trying sickness the following from the Boston Herald contains much of interest and the simplicity of the remedy suggested makes it worth remembering.

"A lady who had occasion to take a short trip on the Lowell road—and she never travels by rail for pleasure—was, as is usual with her, as thoroughly sick as ever a landsman is on the "heaving deep," by the time she had ridden a dozen miles. The conductor of the palace car, who was apparently very familiar with such cases, told the sufferer's companion that a sheet of writing paper, worn next to the person, directly over the chest, was a sure preventive of the trouble in nine cases out of ten. He had recommended it to hundreds of travellers, and rarely knew it to fail. The prescription seemed very like a "charm"—a horse chestnut carried in the pocket to ward off rheumatism, or a red string around the neck to prevent bleeding at the nose. But it wes simple, and could at least do no harm. For the return trip, a sheet of common writing note paper was fastened inside the clothing as directed. Result—a perfectly comfortable journey, without a hint of the old sickness that had for years made travel by rail a horror. It was so like a superstition, or a happy accident, however, that the lady would not accept it as real until subjected to a more severe test. This came in a day journey to New York, and that hardest trial of all—a night trip in an "alleged" sleeping car. Both were taken in triumph. The "charm" worked.

The lady writes: "The day journey was a perpetual wonder and delight to me. I could sit up and read, and look at the landscape through which we whirled, and act as other people do. And still I didn't feel ready to confess to a cure until I had tried the sleeping car, which has always been a horror to me. But even here the 'spell' worked. I ate a hearty supper in the dining car—and kept it! Slept soundly all night, got up as comfortably and dressed with as level a head and as steady a hand as though I had been in my own room. Read until breakfast time—a thing I have never before done on the car—and was hungry for my morning meal. It is really wonderful, almost too good to be real. For the first time in my life I have experienced the pleasure of travelling. I wish that conductor to be specially thanked. I wish also that I knew his name. I would like to call the Lord's particular attention to his case, and don't want to make any mistake and have the blessing descend on the wrong man."

The formal report of Mr. J. H. Devereux, as special commissioner in the case of William H. Taylor and William A. Dunphy, trustees, vs. the Atlantic and Great Western Railroad Company now pending in the Court of Common Pleas of Summit County, Ind., has been filed with the clerk. The Master Commissioner was appointed by the Court to make a sale of the mortgaged premises. The report shows that the Special Master Commissioner received for the purchase price of the property the sum of $6,007,203 86, including interest on deposits. Over a million and a half of this was cash received from the purchasing trustees. Almost the whole of this was consumed in straightening up the indebtedness of the old company. The unliquidated

claims against the receiver, and amounts due as dividends, together with a small amount of money on hand, will be turned over to the N. Y., P. and O. Railroad Company, as the new company is by the judgment of the Court liable for unpaid receivers's indebtedness.

Paris Financial Notes.

(From our Foreign Correspondent.)

The Paris, Lyons and Mediterranean Railroad has just held its annual meeting in Paris and declared a dividend for the year 1880 of 70 fcs. per share. The present price of the shares is 1700 fcs.

The Northern Railway of France, the majority of whose stock is owned by the Rothschild family, held its annual meeting April 29th in Paris, when a dividend of 74 fcs. per share was declared. M. Castel continues to occupy the responsible position of Secretary of the company. The shares are now over 1800 fcs. each.

The Societe de l'Union Generale of Paris, at its meeting of April 30th declared a dividend of 40 fcs. per share for the year 1880, and this on a capital of 100,000,000 francs—four times as great as the amount it started out with less than 3 years ago. Its success is in no slight degree due to the able management of M. Eugene Bontoux, under whose auspices this institution brought out the Banque des Pays Autrichiens, and within the last few weeks the Banque des Pays Hongrois. The first of these is selling at a premium of 125 fcs., the second at a premium of 50 fcs while the 500 fcs. shares of the Union Generale itself was actually at 1245 fcs.

The Credit Lyonnais, which lately raised its capital from 100 to 200 million francs, has now 36 branches distributed all over Paris, 29 throughout the department of France, 8 foreign agencies, and its head office still at Lyons. Its shares are now at 900 fcs.

The Banque de l'Union Departementale of Paris has apparently struck a bonanza in bringing out panoramas. Its Royal London Panorama which opened in Leicester Square, London, with "The Battle of Balaklava," took in during the month of April, its first month, not less than $12,540, and the 500 fcs. shares are now at 950 fcs. The Bank's latest issue, the Panorama of Nice, seems destined to be equally successful. Mr. Hoechester, the manager, who is a live man, evidently believes that money can be made out of the public taste for sight seeing.

C. H. H.

St. Paul and Sioux City Railway.

A deed of conveyance was filed in the office of the Register of Deeds, St. Paul, Minn., on the 14th inst., from the St. Paul and Sioux City Railway Company to the Chicago, St. Paul, Minneapolis and Omaha Railway Company, transferring the St. Paul and Sioux City Railway to the Chicago, St. Paul, Minneapolis and Omaha Company. The deed is declared to be made on condition that the party of the second part will pay the 3 per cent due the State and subject to the liens and incumbrances now existing against the road, which include: 1. A deed of trust dated July 1, 1879, to the Central Trust Company, of New York, as trustees. 2. An extension mortgage dated March 2, 1880, with the same trust company. 3. A further instrument executed between the same parties dated the 30th day of April. 4. A mortgage or trust deed executed by the St. Paul, Stillwater and Taylor's Falls Railway Company to Horace Thompson and William B. Dean, trustees, dated January 1, 1879, to secure the sum of $334,800, according to the terms and conditions of certain bonds denominated first mortgage bonds, issued by the company. The deed is dated the 9th day of May, and is executed by the St. Paul and Sioux City Railway Company, by H. H. Porter, President.

Philadelphia and Reading Companies.

The following is the comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the month of April, 1881 and 1880:

	1881.	
Gross receipts:	Month.	Year to date.
Railroad traffic ...	$532.251 76	$2,731,758 12
Canal traffic.....	9,951 60	L49,462 55
Steam colliers.....	364 33	92,319 68
Richmond coal barges	L1,157 28	L94 25
Total Railroad Co.	$541,410 41	$2,774,521 00

General Manager Tallmage of the Missouri Pacific line, has received instructions to proceed at once with the construction of a line of road leaving the main line of the Missouri Pacific at Pacific Junction and running thence through Polk, Dade and Jasper counties to Carthage. Franklin, Marias, Miller, Camden, Hickory, Dallas. This line will open up a new and very rich section of Missouri and will shorten the through line to Texas by about thirty miles.

Elizabethtown, Lexington and Big Sandy Railroad.

By referring to an advertisement in another column, it will be seen that Messrs. Fisk & Hatch, 5 Nassau St., this city, have for sale the first mortgage 6 per cent sinking fund gold bonds of this company, of which less than $2,000,000 now remain, and which they offer at 102½ and accrued interest—subject, however, to further advances without notice.

The Big Sandy and Chesspeake and Ohio route to the sea is not only nearly one hundred miles shorter than three of the older trunk lines, but its grades are, for both East and West bound traffic, much lighter, and fuel and railroad supplies are obtainable at an almost nominal price.

The Local Traffic of the Big Sandy route promises to be enormous. Opening to the world, as it does, a comparatively unsettled region, whose intrinsic treasures will be developed by the many branch roads already finished or in process of construction, all of which will be feeders to the main stem.

Model Street Car.

In our issue of May 21, quotation was made from the "Philadelphia Record, describing a "Model Street Car," embracing many valuable improvements constituting the most perfect Tram Car hitherto made. The public will be further interested to know that these cars were made for the "Green & Coates Streets City Passenger Railway" of Philadelphia, by the "John Stephenson Company Limited" of New York, which company have received additional orders from the Green & Coates S reets Railway Co."

Scales and Testing Machines.

The Philadelphia Scales and Testing Machine Works, Riehle Bros., Proprietors, announce that they are very busy filling orders for their well-known make of Scales and Testing Machines. Their New York and Pittsburg store, require a large number of goods to replenish depleted stock, and large shipments to the various agencies West and South have been made. The Northern Pacific Railroad, Department of Docks New York City, have recently ordered their well-known Testing Machines.

Wm. Warton, Jr., of Philadelphia has taken the contract for the construction of a first-class passenger railway at Cape May, the road to be finished and in running order by the 26th of June. It is to run from the Sea Breeze House along the beach, and in front of the principal hotels, and extend to Schellinger's Landing, a distance of two-and-a-half miles.

On the 21st inst. forty stock cars, equipped with the Westinghouse Air Brake left the Pittsburg stock yard for the east. The introduction of the automatic brake is something new on stock cars and promises to supersede the old style of brake.

Col. Thomas A. Scott.

In the death of Col. Thomas A. Scott one of the oldest and most celebrated railroad men of this important period of railroad history has passed away. For a long time, as has been widely known through frequent press dispatches, he has been in a critical condition from strokes of paralysis, the third of which occurred May 4th while about to attend the wedding of a son of his old friend, Theodore Cuyler, Philadelphia. A slight injury in a railroad accident about twenty five years ago is said to have been the indirect cause of his illness. Since the third shock of paralysis there have been intervals of a few days in which he has rallied somewhat, and it was thought that his removal to his country seat at Woodburn, near Darby, Pennsylvania, would be beneficial to him. He was consequently removed to Woodburn on the 16th, but while for a few days the change appeared to do him good, he suffered a relapse, and on the following Saturday, after sinking gradually during the previous two days he died at his quiet country home, where he had been looking forward hopefully to spending the summer, surrounded by members of his family and several of his railroad friends. He was born at London, Franklin Co., Pa., on the 28th of December, 1824, and was consequently in his fifty-seventh year at the time of his death.

Col. Scott has been so prominently identified with the great railroad system of the country that to one familiar with our railroad history there is now little to learn concerning the different steps of his remarkable and brilliant career; for few men while in active life have been the subjects of more biographical sketches, or have been more carefully studied and described in the different stages of their achievements than this great railroad manager. His career was not so striking in diversities as in the direct line it seemed naturally to follow. From the time of his entering the service of the Pennsylvania Railroad Company in 1850 (previous to which after a few years at a village school, he had spent most of his time in a country store and in two positions as collector of tolls) to the time of his last illness he was moving continuously forward in the work for which he was pre-eminently adapted; always progressive and always standing foremost among those who not only knew how to plan but also how to execute, he followed a course for which nature peculiarly fitted him. While favored to a remarkable degree by physical adaptabilities to his calling he was conspicuously a self made man. He saw with a wise self study early in his career the field in which his powers could be used to the best advantage and with a discernment as valuable as it is rare never wasted his energies in attempting to gratify unwarranted ambition in other departments of business of public life. An illustration of this is seen in the fact that with both of our great political parties he has been esteemed a popular man and neither, by public act of his, could claim him wholly as its own; honors were not sought by him from either, though he was deeply interested in the welfare of his country and could always be relied upon for help in times of public need and peril. To his remarkable powers of concentration and the ready discernment of his abilities perhaps more than to any other causes can be attributed his great success in life. But while this seems apparent the public enterprises which are deprived of his services cannot help feeling that their great loss may be partially attributed to his final habit of unconsciously overtaxing himself; a habit engendered by very the elements of his success, found in his magnificent physical powers leading him to forget that there were limits to human endurance in arduous and responsible positions.

The benefits given to the world by the life works of a man like Col. Scott are not limited to special interests or to local enterprises. The force exerted by him is felt in manifold departments of business and extends into the greatest elements pertaining to material development and prosperity. Exerted directly upon the perfecting of railroad systems and enhancing their values his efforts have been felt and their results will be long recognized in the important material advancement which marks the wonderful history of our country, as well as of her railroads, during the past quarter of a century.

American Railroad Prospects.

A foreign opinion concerning American railroads and their securities is given as follows by Herapath's Railway Journal of London, in an editorial of its issue of May 7th: "The outlook for the great trunk railroad systems of the United States still appears to us to be very encouraging, and the high rates ruling for their stocks and bonds upon the markets of New York, Philadelphia, and Boston seem to justify our assertion. After all, the Americans themselves must be the best judges of American business prospects; and when we find the stock markets of the three great centres named all exhibiting a fair amount of steadiness, and even of firmness, we are clearly justified in asserting that the general commercial situation remains tolerably good in the United States. It could, indeed, scarcely be otherwise. Never since it was established in the days of Washington has the American Union basked in such a sunshine of prosperity. A vast development of agriculture, a great extension of metallurgy and manufactures, a decided reduction in the rate of interest on money, an incredible influx of more or less valuable European immigrants, these are the great influences which have given an animation and a vigor to American business generally, such as it has never before exhibited. Another circumstance which has contributed to the increased prosperity of the great trunk railroad interest of the United States is the conclusion of something like a reasonable agreement between managers for the establishment of fares and freights at a level which will yield a tolerable remuneration for the capital engaged. In times past American railroad managers appeared to fancy that they were never showing themselves to be good men of business unless they were endeavoring to reduce themselves and their neighbors to the verge of bankruptcy. Happily, however, such suicidal folly as this is now a mere matter of American railroad history, and American railroad men see that if the interests committed to their charge are to be maintained in anything like a satisfactory condition it will never do to cut one another's throats.

"There are five great influences which appear to us to be telling in favor of American railroads. We will set these influences out seriatim. The first of them is the wide-spread tendency to amalgamation, or as the Americans term it, consolidation. The advantages of

amalgamation or consolidation are, in certain cases, obvious. In the first place an amalgamation averts the danger of future possible competition, yet this has no great effect in America, the amalgamations there being generally of extension lines rather than of parallel lines; in the second place it economises some management charges, and in the third place it strengthens credit where credit is unhappily low and drooping. The second great influence which is now calculated to promote the prosperity of American railroads is the growing cheapness of money. Seven or eight years since even a prosperous American railroad fancied it was doing extremely well if it could issue bonds at 6 per cent per annum; but now when the Federal treasury is talking seriously converting the 6 per cent and 5 per cent debt of the United States into 3½ per cent, it quite clear that 4½ per cent or at the most per cent will be the American railroad bond interest of the future. A Company like the Pennsylvania or the Baltimore and Ohio, which has bonds falling due in almost every year, will realize in the course of the next decade very considerable economies from the power which it now possesses to negotiate loans upon easier terms. The third great influence which is calculated to increase the value of American railroad stock, is the widely extended employment of steel rails. As we have observed upon more than one occasion, iron rails fare badly in the capricious and variable climate of the United States, while steel rails are enabled to make a much better resistance. An important saving can scarcely fail to be realized under this head in future maintenance charges. Fourthly, we have only to direct attention to the greatly increased population and wealth of the United States to enable our readers to arrive at the conclusion that the traffic and business of the great trunk railroads of America must certainly grow as years roll on. It is true that this growth of traffic may involve a necessity for more sidings, extensions, and duplications; but even if this is the case, there must still be a good balance of additional profit to the credit of stockholders. The fifth circumstance which is calculated to increase American railroad dividends is the more sensible policy of avoiding ruinous rate cutting which now prevails among railroad managers and to which we have already directed attention. Altogether, American railroad prospects appear to us to be decidedly hopeful."

The grading of about forty miles of the extension of the Indiana, Bloomington and Western Railroad from Indianapolis to Springfield has been put under contract. The mileage of the system will be as follows: Indiana, Bloomington and Western proper, 212 miles; extension, Indianapolis to Springfield, 130 miles; the Ohio division, formerly the Cleveland, Sandusky and Co., lumbus, 191 miles; the Ohio Southern, 116 miles; the Jackson to Wellington branch, 15 miles. The company how has in actual operation 516 miles, and in process of construction 145 miles.

Railroad Earnings.

The earnings of the Indiana, Bloomington and Western Railroad for the week ending May 15, 1881, were $20,996 02, against $19,099 70 same term in 1880, an increase of $1,896 32.

The earnings of the Burlington, Cedar Rapids and Northern Railroad for the week ending May 14, 1881, were $36,699 12, against $30,627 98 last year, a gain of $6,071 14.

The gross earnings of the Minneapolis and St. Louis Railway for the month ending April 30, 1881, were $38,003 61; same month in 1880, $75,081 57; increase in 1881, $37,077 96.

The approximate earnings of the Denver and Rio Grande Railway for the third week in May, 1881, were $122,136; do. 1880, $44,976; increase, $77,160 Miles now operated, 690; miles operated last year, 337.

The earnings of the Northern Pacific Railroad for the third week in May, 1881, were $30,447; third week in May, 1880, $49,138—increase, $31,309. From January 1, to May 22, 1881. $766,290, same period in 1880, $611,496, increased, $154,794.

The earnings of the St. Louis and San Francisco for the third week in May, 1881, were $72,600; third week in May, 1880, $42,200, increase, $30,400. From January 1, to May 21, 1881, the earnings were $1,-105,765; same period previous year $886 143, increase, $219,622.

The earnings of the Flint and Pere Marquette Railroad for the week ending May 14th, 1881, were $37,642 20; against $25,940 85 for the corresponding period of the previous year, an increase of $11,701 35. From January 1, to May 14, 1881, the earnings were $657,718 70; same period in 1880, $560,571 75—increase, $97,146 95.

The earnings of the Louisville and Nashville Railroad for the second week in May, 1881, were $185,-700; corresponding week in 1880, $141,000, increase, $44,700. From January 1, to May 14, 1881, the earnings were $3,783,283, against $2,711,166 for the corresponding period of 1880, an increase of $1,072,-117.

Personal.

W. J. Ritchie, Chief Justice of the Dominion of Canada, has been knighted.

John W. Garrett President of the Baltimore and Ohio Railroad Co., is expected home from Europe about the first of June.

M. C. Jameson has been appointed assistant treasurer of the Norfolk and Western Railroad Co.. with headquarters at Lynchburg, Va.

At the meeting of the Atlantic and Pacific Railroad Company in Boston May 19, Thos. Nickerson was re-elected president.

William A. Guest & Co., this city, bankers and dealers in iron and steel rails, have removed from 17 Nassau street to 41 and 43 Pine street.

Wm. W. Lang, President of the Southwestern Immigration Company, sails for Europe in the interests of that company, on Saturday of this week, in the City of Berlin.

Herman R. LeRoy, a member of the New York Stock Exchange, and treasurer of the Union Club, has been admitted as partner in the banking house of Clark, Dodge & Co.

At the annual meeting of the stockholders of the Pittsburg, Fort Wayne and Chicago Railroad Company held at Pittsburg, May 19, L. H. Meyer, of New York, Charles E. Speer, of Pittsburg, and Jesse L. Williams, of Fort Wayne, were re-elected directors. The vote polled represented $20,390,000.

At a meeting of the Board of Directors of the Pittsburgh, Cincinnati and St. Louis Railway Company, hold at Pittsburg on May 13, 1881, J. N. McCullough was elected first Vice President, William Thaw, second Vice President, and Thomas D. Messler, third Vice President and Comptroller.

The venerable Peter Cooper explains the manner in which he earned his fortune as follows: "I learned three trades. I learned to be a brewer, a coachmaker and a machinist, all before I was 21 years old. I worked three years at $1 50 a day, and saved enough out of that to get a start in life. I was making machines to shear cloth; then I bought the patent right of the machine and made them for sale. That was before the war of 1812. I determined to give the world an equivalent in some form of useful labor for all that I consumed in it. I went on and enlarged my business, all the while keeping out of debt. I cannot recollect a time when I could not pay what I owed any day. I would not spend money before I earned it. Another rule I had was to keep clear of the banks; I never asked them for accommodation; I never got them to discount notes, because I did not wish to incur an obligation without a certainty of being able to pay it. I that way I managed to keep clear of panics. My rule was 'pay as you go.' I can't remember the time when any man could not have had for the asking what I owed. Another thing I wish to say: all the money I ever made was in mechanical business, and not in speculation."

Organization.

Certificates of incorporation have been filed with the Secretary of State of Ohio of the Toledo, Delphos and Burlington Railroad Company, branch line; and of the Paulding and New York Railroad Company, capital $20,000.

At a meeting of the stockholders of the Leadville Consolidated Company on the 20th inst., the following trustees were elected: L. B. Elkins, J. B. Chaffee, L. M. Lawson, T. W. Shannon, R. C. Shannon, H. B. Bacon, P. A. Hegeman. L. M. Lawson was elected president, T. W. Shannon vice-president, and A. Ebert secretary and treasurer.

The stockholders of the Manchester and Keene Railroad Company have elected the following board of directors: W. W. Bailey, B. F. Kendrick and G. Y. Sawyer, jr., of Nashua; George B. Twitchell, of Keene; Charles E. Paige, of Lowell. W. W. Bailey was elected president; Thomas E. Hatch, clerk; John H. Buttrick, treasurer.

The stockholders of the Des Moines and Kansas City Railroad Company elected on the 12th inst. as directors William M. Jones, H. E. J. Boardman, T. E. Browne, J. H. Blair, Samuel Merrill and Charles S. Jones. The officers are: William M. Jones, president; H. E. J. Boardman, of Marshalltown, vice-president; T. E. Brown, treasurer; Charles J. Jones, secretary.

The Secretary of State of Illinois has licensed C. J. Burnes, J. C. Thomas, John S. Kendall, T. B. Levey and Leonard E. Rubold, all of Chicago, to organize the Illinois and Indiana Coal and Railway Company, with a capital of $1,000,0000, for the construction of a railway from Effingham, in Effingham County, through Jasper and Frawford counties to the western boundary of Indiana. The first board of directors are the gentlemen above named.

The directors of the Atlantic and Pacific Railroad Company, recently elected, are: Thomas Nickerson,

T. Jefferson Coolidge, Isaac T. Burr, Charles J. Paine, George B. Wilbur, George C. Lord, Jesse Seligman, Edward F. Winslow, Fred Butterfield, Joseph D. Fish, Horace Porter, Francis B. Hayes and Hobert Harris. Thomas Nickerson was re-elected president; E. F. Winslow, vice-president, and the other officers held over for the ensuing year.

At the annual meeting of stockholders of the Flint and Pere Marquette Railroad Company, held May 18, 1881, the following gentlemen were unanimously elected directors: Jesse Hoyt, Alfred M. Hoyt, Cornelius D. Wood, of New York; Wm. W. Crapo, Francis Hathaway, Loum Snow, of New Beford, Mass.; Lewis Pierce, of Portland, Me.; Abram G. Brower, of Utica, N. Y.; Wm. L. Webber, H. C. Potter, H. C. Potter, jr., of East Saginaw.

John I. Blair, representing the bondholders who have recently secured control of the Green Bay and Minnesota Railway and changed the name to Green Bay, Winona and St. Paul, filed articles of association with the Secretary of State of Wisconsin May 16. The capital stock of the new corporation is $10,000,000, and the length of road from Green Bay ot Winona, with a branch from Onalaska to Winona, is 219½ miles.

At a meeting of the stockholders of the Washington and Chesapeake Railroad Co., at Suitland, Md., the following officers were elected: A. W. Dimock, New York, president; S. T. Suit, Md., treasurer; George T. May, Washington. secretary, with the following board of directors: A. W. Dimock, S. T. Suit, Thomas Donaldson, S. I. Wailes, George W. Wilson, W. J. Murtagh, J. L. Husband. The road is to be put under contract at once.

Articles of association of the Illinois and Indiana Railway Company have been filed in Indiana. Capital stock, $3,000,000; directors, William Burdon, R. B. Caldwell, John B. Thompson, William J. Leddell, E. B. Crum, H. Altman and Jos. M. Hurlbert. The road is to be run through the counties of Dearborn, Ripley, Decatur, Bartholomew, Brown, Monroe, Owen, Green and Sullivan, 160 miles. This is to be a narrow gauge road, and will be an extension of the Effingham, Sullivan and Swiss City road.

At the annual meeting of the stockholders of the Nashua, Acton and Boston Railroad Company the following gentlemen were elected directors to serve for the ensuing year: John C. Moulton, Frederick Smyth, James W. Johnson, Samuel N. Bell, Benjamin A. Kimball, Francis B. Hayes, Henry C. Sherburne, J. Thomas Vose, William Power Wilson, Joseph B. Clark, Dana Sargent. John C. Moulton, of Laconia, N. H., was elected president, Frank B. Cook treasurer and John B. Goodrich clerk.

The annual meetings of the stockholders of the Sioux City and Pacific Railway Co., the Cedar Rapids and Missouri River Railroad Co., the Iowa Falls and Sioux City Railroad Co., the Maple River Railroad Co., the Iowa Railroad Land Co., the Moingona Coal Company, Western Railway Construction Company, Blairtown Lot and Land Company, Sioux City and Falls Town and Lot Company and Missouri Valley Land Company were held in Cedar Rapids, Ia., May 19. The directors of each company remains the same.

At the recent annual meeting of the stockholders of the Central Vermont Railroad Company at St. Albans, Vt., the following were elected directors: J. Gregory Smith, St. Albans; James R. Langdon, Montpelier; Benjamin P. Cheney, Boston; George M. Rice, Worcester; Jacob Edwards, Boston; W. C. Smith, St. Albans; John H. Kimball, Bath, Me.; Jed P. Clark, Milton, Vt.; B. B. Smalley, Burlington, Vt.; James W. Emery, Portsmouth, N. H.; Olit Drury, Boston; W. H. H. Bingham, Stowe, Vt.; W. H. Dubois, Randolph, Vt.

Articles of incorporation were filed in the office of the County Clerk of New York County on the 20th inst., for the North Horn Silver Mining Company; capital stock, $4,000,000, divided into 400,000 shares of $10 each; trustees, Thomas J. Hurley and eight others. The Golden King Mining Company; capital stock, $500,000, divided into 209,000 shares of $2 50 each; trustees, Elisha Riggs and four others. The El Dorado Canon Mining Company; capital stock, $1,000,000, divided into 100,000 shares of $10 each; trustees, J. Raymond Thomson and four others. The Big Basin Mining Company; capital stock $500,000, to be divided into 500,000 shares of $1 each. The trustees are Robert Sewell and four others. The Mina Rica Mining Company; capital stock, $1,000,000, dsvided into 200,000 shares of $5 each. Trustees, Joshua C. Sanders and four others.

The St. Louis and Texas Railroad Company of Arkansas was organized at Little Rock on the 20th init., by the choice of the following board of directors: S. A. Barnes, St. Louis; William Black, Brinkley, Ark.; N. T. White, Pine Bluff, Ark.; John Parham, Forest City, Ark.; G. W. Brown, Camden, Ark. The officers are: President, J. W. Paramore, St. Louis; vice-president, S. W. Fordyce, Hot Springs; treasurer, Leonard Matthews, St. Louis; secretary, George D. Fisher, St. Louis. The road is to be built by September, 1882. George B. Hibbard, of St. Louis, has the contract for its construction. Four corps of engineers are in the field. The road runs through Arkansas midway between the St. Louis and Iron Mountain Railroad and the Mississippi River. Mr. Paramore is also president of the Texas and St. Louis Narrow Gauge Railroad Comsany. Work will begin immediatoly.

At the annual meeting of the stockholders of the Missouri, Kansas and Texas Railroad Co., held at Parsons, Kansas, on the 18th inst. the following directors were elected: Jay Gould, Sidney Dillon, G. J. Forrest, Thos. T. Eckert, Wm. Bond, M. S. McReady, A. G. Dulman, Sam Sloan, Thos. W. Pearsol, Fred. L. Ames, Frank S. Bond, R. S. Hays, H. C. Cross, C. H. Platt and David Kelso, the three latter being of Kansas. Jay Gould was re-elected president, H. B. Henson secretary, and Judge David Kelso attorney for Kansas. Resolutions were adopted approving all mortgages and contracts made to the Gould management in reference to the Missouri, Kansas and Texas road during the time they have had possession of the same, to continue the construction of the road through to the City of Mexico, and to increase the stock of the consolidated company $47,000,000 for that purpose.

A meeting of the stockholders of the Wheeling, Parkersburg and Charleston Railroad Company was held as Parkersburg, W. Va., on the 19th inst., at which the following directors were elected: Ohio county, Captain John W. McLure and W. F. Peterson; Wood county D. R. Neale, W. N. Chancellor, C. H. Shattuck and G. W. Thompson, Jr.; Pleasants county, R. H. Browse; Roane county, William Woodward; Kanawha county, Isaaac N. Smith and B. W. Byrne. At a subsequent meesing of the directors the following officers were elected: President, D. R. Neale; vice-president, G. W. Thompson, Jr.; secretary and treasurer, W. N. Chancellor. C. H. Shattuck and G. W. Thompson, together with the president, were constituted the executive committee of the board. The survey is going forward satisfactorily, and the Eastern syndicate reported through Senator Camden, who was present, that just as soon as the counties comply with the understanding in reference to the survey and right of way they are ready to begin carrying out their agreement.

The whistles on the Philadelphia, Wilmington and Baltimore Railroad are being changed to the kind in use on the Pennsylvania Railroad, and the platform steps on the passenger cars are being changed to conform to those used on the same road.

The Pennsylvania Supreme Court affirmed, on the 23d inst., the decree of the Court of Common Pleas declaring Frank S. Bond and others as the legally elected officers of the Philadelphia and Reading Railroad Company. Judges Sherwood, Trunkey and Sterrett dissented.

The plan for the re-organization of the South Carolina Railroad Company has been agreed upon by a majority of the stock and bond holders, in whose interests the road, when sold, will be bought in.

The Hilo and Kilauea (Hawaiian Islands) Railroad—Jordan's narrow-gauge road—has commenced operations. At present the business of the road is conveying road material from one point to another several miles apart.

A scheme has been projected in Japan for building nearly 1,000 miles of railway, running to the western and northern limits of the main island, and a native company is being formed for the purpose of carrying it out.

The Rogers Locomotive Works, Paterson, N. J., recently shipped by steamer from New York the nine locomotives which they had been building for a Spanish railroad. They are the first American locomotives to go to that country.

The Brooks Locomotive Works, Dunkirk, N. Y., are filling order for 23 locomotives for the Utah and Northern Railroad. Seven have already been delivered, and the rest are to be sent from the works at the rate of two each month.

W. H. Stevenson, of Ottawa, has been awarded the contract for the grading of the Napanee, Tamworth and Quebec Railway work. It is to be begun without delay, and completed by the 15th of November next.

The American Waltham Watch Company has received the only gold medals awarded to any exhibit of watches at the International Exhibition at Melbourne, Australia.

Judge Traverse, of Iowa, has decided that railroad companies are liable for animals run over by their trains on public highway crossings on Sunday.

There are now 3,300 men employed in the locomotive works at Paterson. Their wages amount to $1,650,000 annually. The works are being greatly enlarged.

Work was commenced on the Laclede and Fort Scott road, fourteen miles west of Lebanon, May 18.

The opening of the Mexico-Cuanta Railroad will take place on the 16th of June.

The Charlotte, Columbia and Augusta Railroad is being relaid throughout with steel rails.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending May 14, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	120 685	3,077,637	2,930,555
Schuylkill Canal....	13 207	75,472	127,769
Lehigh Valley.....	70 198	2,326,340	1,824,435
Del., Lack. & Western.	62,713	1 418,587	1,204,601
Shamokin Valley....	20,406	365,596	294 152
Central New Jersey.	86,587	1,405,834	1,186,166
United R. R. of New Jersey.....	24,682	560,498	360,844
Pennsylvania Coal ..	22.921	390,313	326,955
Delaware and Hudson	52,397	1,218,000	1,110,952
Huntingdon & Broad Top Mt.....	7,740	158,819	186,869
Penn. and New York.	22,421	587.189	498,142
Clearfield, Pa.....	46,306	845,757	433,189

The total tonnage of anthracite coal from all the regions for the week ending May 14, as reported by the several carrying companies, amounted to 414,269 tons, against 388,904 tons in the corresponding week last year, an increase of 25,-865 tons. The total amount of anthracite mined for the year is 9,018.295 tons, against 7,619,916 tons for the same period last year, an increase of 1,398,379 tons. The quantity of bituminous coal sent to market for the week amounted to 103,147 tons, against 88,279 tons in corresponding week last year, an increase of 14,868 tons. The total amount of bituminous mined for the year is 1,704,-930 tons, against 1,361,632 tons for the corresponding period last year an increase of 343,298 tons. The total tonnage of all kinds of coal for the week is 517,416 tons, against 477,183 tons in corresponding week last year, an increase of 40,-233 tons, and the total tonnage for the coal year is 10,728,225 tons, against 8,981,548 tons to same date last year, an increase of 1,741,677 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending May 14 was 169 955 tons, of which 117,157 tons were coal and 52 708 tons coke. The total tonnage for the year thus far has been 3,289,561 tons, of which 2,347,916 tons were coal and 941,645 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended May 14 were 42,294 tons, and for the year to that date 537,725 tons, a decrease of 57,903 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 22,227 tons; year, 503,033 tons; decrease as compared with 1880, 7,289 tons. Chesapeake and Ohio Canal—week, 17,030 tons; year, 74,980 tons; decrease as compared with 1880, 21,078 tons. Pennsylvania Railroad—week, 3,047 tons; year, 59,712 tons; decrease as compared with 1880, 29,474 tons.—[Phila. Ledger, May 23.

A Deadhead Black List.

The misuse of railroad passes has grown to be so wide spread that the Western Association of General Passenger and Ticket Agents have decided to issue a monthly black list, containing the names of those persons "who shall obtain by false representation any free transportation, or having legitimately obtained any such transportation shall use it for any other purpose than expressed or implied in the terms specified in the pass or permit, by selling, lending, or in any wise disposing thereof." It is intended to thereafter debar any person whose name is entered on the list from receiving free transportation over the roads represented in the association. The first number of the black list has just been published; it contains the names of business men, legislators, editors, and all sorts of officials, all over the West, who have loaned or sold their road privileges, and Wisconsin is fully represented. It is creditable to the press of the State, however, that the newspaper men mentioned are in nearly every instance those who are connected with insignificant cross-roads sheets; one member of the Legislature is involved. The publication of this black list will doubtless soon put a stop to the pernicious and dishonorable practice of loaning passes. As for the men who sell their passes, they should be prosecuted.—[Madison (Wis.) State Journal.

New Route to the Northwest from Spartanburg.

A meeting was held at Rutherfordton, N. C., on the 20th inst. in the interest of a new route to the Northwest from Spartanburg, S. C., via Rutherfordton and Marion, N. C., to Cranberry Iron Works in Mitchell county, N. C, to connect with the railroad now being built from Johnson City, Tennessee, on the East Tennessee, Virginia and Georgia Railroad, to Cranberry Iron Works, which is running sixteen miles, and will be completed to the latter point by the 1st of September next. Representatives attended the meeting from Spartanburg and Greenville, S. C.; Charlotte and Marion, N. C., and Jonesboro', Tenn. A resolution was passed unanimously favoring the building of the whole line; also, resolutions favoring the immediate survey of the road from Rutherford to Spartanburg—a link in the proposed line—and the organization of the company under charters granted in both States; also, pledging Rutherfordton county to contribute her full share of aid in building the road. The speakers all alluded to the importance of railroad connection centering in Spartanburg, and favored extending this new line from the Northwest to Spartanburg as the best objective point. Spartanburg is a point on the proposed Virginia Midland extension which is to connect Baltimore with the principal Southern cities.

Gauges of Railways in the New Dominion.

There are three different gauges in use in the Dominion of Canada: the ordinary gauge of the United States, the old broad gauge, and the newer narrow gauge, but both of the latter are giving way to the former. We compare the length of road having different gauges in the two years :

	Gauge.	1880. Miles.	1879. Miles.
Railways in operation	5 ft. 6 in.	289.04	391.74
" "	4 ft. 8½ in.	5,916.14	5,177.27
" "	3 ft. 6 in.	686.00	686.00
Total.....		6,892.17	6,255.01

—which shows that the increase has all been under the head of 4 ft. 8½ inch gauge, and that 102 miles of broader gauge track has been taken up. Track has been laid, we are informed, on 6,254 miles of the 4 ft. 8½ in. gauge, and the increase in length of road in operation of that width is 739 miles over 1879.

The Shenandoah Valley Railroad Company have decided to build their own line all the way from Waynesboro' to Roanoke, not on account of any difficulty in securing the use of the Richmond and Alleghany's tracks from South river to Buchanan, but because of the iron fields which the Shenandoah Valley is anxious to traverse. The Richmond and Alleghany's roadbed is the towpath of the old James River and Kanawha Canal, and is on the north bank of the river for most of the way by the iron tracks, while the latter are on the south side. Accordingly the Shenandoah Valley will choose the latter route.

Tunnel Under the English Channel.

Work on the Tunnel between England and France is said to be progressing favorably at the rate of 25 feet per day, and has already been carried to a distance of above 300 yards. This is in the shape of a driftway of about seven feet in diameter, opening near the mouth of the tunnel on the west side of Abott's Cliff. Commencing here, it runs in a line parallel with the line of railway and follows the natural dip of the strata. The idea is to continue in this way until a depth some 200 feet below the bed of the Channel is reached. It is then confidently hoped by geologists that the character of the geological formations will admit of the engineering operations being advanced in a direct line or level, so as to allow of a corresponding rise on the other side of the Channel. The operations are carried on under the directions of Colonel Beaumont, the chalk being cut by a disc furnished with cutters, which is worked by one of that gentleman's compressed air engines. It is a most ingenious mechanical contrivance, and for more reasons than one is peculiarly adapted to the work which it is performing here. The disc makes two revolutions per minute, slicing off the chalk to the thickness of a quarter of an inch at each revolution. There is no change in the soil, which is still gray chalk, and there is a remarkable freedom from the percolation of water.

Since July 1, 1880, 6,130 miles of new railroad mail service has been established by the post office department. As the department avails itself of the increased facilities for mail transportation afforded by every mile of new railway constructed in the country, this 6,130 miles may be said to represent quite accurately the full extent of railroad extension of the past eleven months.

The New York, Pennsylvania and Ohio Railroad Company opened its new branch from Sharon, Pa., to Middlesex, Pa., on the 22d inst. Work was commenced on this line last September and the entire cost has been $100,000. The object of building this line to Middlesex is to secure the business of the very extensive rolling mill located there.

A charter has been granted by the Governor of Pennsylvania to the Ohio and Baltimore Short Line Railway Company to construct a railroad from a point near the borough of Washington, in that State, to a point near the borough of Connellsville, in Fayette county, the length of said road to be forty-six miles, and the capital stock $1,000,000.

In the United States Circuit Court Philadelphia on the 20th inst., Judge Butler appointed Charles R. McConkey Receiver of the Middle Division of the Peach Bottom railroad. The required security is $20,000. Sussex D. Davis of Philadelphia was appointed Special Master under the Receivership.

The engineers of the Baltimore and Drum Point Railroad are engaged in making additional surveys with a view to the location of the road between Baltimore and the Annapolis and Elkridge Railroad. Work was commenced at Brooklyn, near the Anne Arundel terminus of Light-

street bridge, and the surveys are proceeding in the direction of Curtis creek. Nicholas Goldsborough is Chief Engineer of the road.

Southern Pacific Railroad.

The San Francisco Daily Stock Exchange announces, on the authority of President Crocker, that in a couple of months the Southern Pacific Railroad Company will begin an extension of their road from Soledad southward, to connect with the main line at or near Bakersfield; again, from a point at or near Mohave a new line will be built eastward, through Cajon Pass, to strike the present line near Colton, straightening up the present route and shortening the line a matter of 100 miles or so. The new line from Soledad will be built straight to Paso Robles Springs, in San Luis Obispo county. It will then strike eastward through Estrella valley, coming out south of Tulare Lake to Bakersfield. The section, from Mohave to Colton, will cut off the present detour through San Fernando valley to Los Angeles, a road which, when the new one is completed, will be used simply for the running of local trains. Indeed, it is not impossible that it may be torn up, as the San Fernando tunnel is a constant expense to the company.

Iron Excursion Boats.

The iron steamboat Cetus, which recently arrived from Philadelphia, has had her saloons fitted up, and is now in readiness to take her place in the Iron Steamboat Line, which is advertised to begin regular trips on Saturday the 28th inst. Two other boats of similar build are expected to join her on that day. One of these has been built at Cramp's yard, where the Cetus was launched; the other comes from Roach's yard. The company have contracted for four more iron steam-boats. A trial trip was made by the Cetus around the Bay on Monday, when she was saluted by the whistles of the numerous steam vessels which were passed. She promises to be a very swift boat, and will doubtless be capable of making 20 miles per hour. Her dimensions are: Length, 212 feet; breadth of beam, 32 feet, and depth of hold, 7½ feet. The hull has been powerfully braced, and is divided into 15 water-tight compartments. All of the latest contrivances for the avoidance of disasters have been used in her construction. The whole interior is lined with iron, and it would be impossible for a fire to make any serious headway even if one should originate. Her cabins are furnished in the most luxurious manner. The Cetus will accommodate 2,000 passengers with ease. At a distance she looks very much like one of the old wooden excursion steamers. Her cost is about $200,000.

Grand Junction (Canada) Railway.

The Belleville Intelligencer, on the authority of Mr. Bickford, says that the Grand Junction Railway will cost the Grand Trunk Railway Co. nearly $1,000,000 to acquire, and then adds:

The Grand Trunk will buy bonds of the Grand Junction to the amount of $860,000, paying 92½ cents on the dollar. The rolling stock will come to about $100,000 more. On the completion of the transaction, work on the elevator, at Belleville, will cease; it being the intention of the Grand Trunk to use the elevator built by Mr. Rathbun. It is strange that some people regard an arrangement which will ensure the efficient working of the Grand Junction as an injury to Belleville; and yet the bonuses given by that municipality could only have contemplated the active working of the road.

Ohio Refunding its Debt.

For the purpose of refunding the debt of the State of Ohio at a lower rate of interest, the Commissioners of the Sinking Fund will receive proposals at their office in the city of Columbus until noon of June 2, 1881, for a loan of $2,800,000, for which registered bonds of the denomination of $100 or some multiple thereof will be issued at a rate of interest not to exceed 4 per cent per annum, payable on the first day of January and July of each year, at the Agency of the State of Ohio in the City of New York; $300,000 of said loan to be redeemable at the pleasure of the State of Ohio, at the same place, on the first day of July 1882; $325,000 on the 1st day of July 1883; $350,000 on the 1st day of July, 1884, and the same amount on the first day of July, 1885; $375,000 on the first day of July, 1886; $500,000 on the first day of July, 1887, and $600,000 on the first day of July, 1888.

The papers in the case of the United States against the Nashville and Chattanooga Railroad Co. have been forwarded by the Solicitor of the Treasury to the United States District Attorney at Nashville, with directions to bring suit at the present term of the court. The amount involved aggregates $300,000, being the principal and interest of certain unpaid bonds of the railroad, purchased by the government for the Indian trust fund.

The contract for the grading of the Napanee, Tamworth & Quebec Railway from Napanee to Tamworth, via Yarker to Colbrook, has been awarded to W. H. Stevenson, of Ottawa, who has been connected with the building of a number of roads, including the Intercolonial Railway. A large number of men will be engaged, and work commenced at once. The contract is to be completed by the 15th November.

The Washington and Chesapeake Railroad, which is to be put under contract at once, will cross the Baltimore and Potomac Railroad at Mariboro', and connect with the Washington City and Point Lookout Railroad at Forrestville, seven miles east of Washington. Its terminus will be at or near Fair Haven, on the Chesapeake bay. The office of the company is at Suitland, Md.

The Chicago, Milwaukee and St. Paul Railway Company filed, on the 16th inst., in the office of the Register of Deeds at St. Peter, Minn., a mortgage in favor of the Farmers' Loan and Trust Company, of New York, for $9,000,000. The money borrowed is to be used on the Mankato and Minneapolis Extension.

Arrangements have been completed for transferring freight cars by ferryboat across the Ohio river between the Chesapeake and Ohio Railway at Ashland, Ky, on the south side of the river, and the Scioto Valley Railroad, on the north side.

The Erie Canal, which was opened for business on the 17th inst., had been closed 166 days, which is longer than for any year since 1846, and it is not known how long before that. The opening day, May 17, is later than for any one of these years except 1875, when it was May 18.

New Ferry Boats.

The Harlan & Hollingsworth Company, Wilmington, Delaware, are building two new ferry boats for the Camden and Philadelphia Ferry Company. They are to be of similar build and eight feet longer than any now on the line, i. e., 145 feet between perpendiculars and 158 feet over all. The breadth of beam is to be 30 feet; from guard to guard, 54 feet; depth of hold, 10 feet 9 inches. The entire hull will be of iron, except the deck plank. There will be bulkheads in case of collision. The main engine will have a 44-inch cylinder, with 10 feet stroke. The water wheels are to be 18½ feet in diameter, 7½ feet face of buckets. There will be one return-tubular, wagon-top boiler, with three furnaces and arches, to have a working pressure of 45 pounds to the inch, and also a donkey vertical boiler, 30 inches in diameter. The outfit is to be two metallic life boats, 18 feet long, a steam pump and hand fire-pump. The boats are to be ready for service by October, and are to cost about $75,000 each.

It has been decided to extend the Danville, Olney and Ohio Railroad (at present an unimportant road running from Kansas, Ill., to Westfield) northward from Kansas, to connect with Chicago and Eastern Illinois at Danville, and southward to intersect the Ohio and Mississippi at Noble, Ill. The road was originally a narrow gauge, but is now being widened, and when completed will furnish another Illinois outlet from Chicago.

Russell Elliott, auditor of the Indianapolis and St. Louis road, has filed his report of the earnings, &c., of the St. Louis, Alton and Terre Haute division in the United States Court at Indianapolis. It shows the freight earnings to have been $103,597 03; passenger, $25,786 60; mail, $1,695 34; miscellaneous, $5,000; total, $137,886 13.

The organization of the Arkansas division of the Texas and St. Louis Railway has been completed. The construction of this division, together with the company's completed road in Texas, will give it an independent through line from St. Louis to the heart of Texas. The system will be known as the Cotton Belt Route.

The contract for boring the tunnel through Boston Mountain, on the Arkansas division of the St. Louis and San Francisco Railroad, between Fayetteville and Fort Smith, has been awarded to Keegan & Scully. The tunnel is to be 1550 feet long, and to be finished by January 1, 1882.

The connection of the Chesapeake and Ohio Railway with the Scioto Valley Railroad at Ashland, Ky., is nearly completed, giving to the former its desired Western outlet and access to the Ohio coal fields, via the Ohio Central Railroad.

Ground was broken on the 23d inst., on the Black Hills and Custer City Railroad which will run from Deadwood, Dakota, to Custer City, with a branch to Rapid City—a total length of about seventy-five miles. It is building by the Homestake Mining Company.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.

Fitchburg Railroad.

A new time table as follows went into effect on the Fitchburg Railroad on the 16th inst., among the changes being important additions of new trains:

Westward—Leave Boston for Waltham via main road at 7.05 A. M. Train heretofore leaving Boston for Waltham via Watertown Branch at 8.35 A. M., will leave at 8 33 A. M. A train will leave Boston for Concord at 9.05 A. M., in place of train which before left Boston at 9.00 A. M. for Waltham. Another new train leaves Boston for Waltham via Watertown Branch at 1.20 P. M. The Cincinnati express, which has been leaving Boston at 2.15 P. M., is to leave at 3.20 P. M. A train will leave Boston for Marlboro' at 5.30 P. M., stopping at Waltham, Concord and Concord Junction on the main road. A train will leave Boston at 5.35 P. M., run to Concord Junction ahead of express train leaving Boston at 6 P. M., and follow it from Concord Junction to Fitchburg. The Pacific express leaving Boston at 6 P. M. has been quickened up in order to make important connection with the New York Central Railroad. It will also hereafter make close connection with the New London Northern Railroad at Miller's Falls for Brattleboro'. The putting on of new trains has enabled the management to rearrange the trains so as to give the Watertown Branch a train to leave Boston at 6 10 P. M. The place of the 5 30 P. M. train for Concord being filled by a Fitchburg train, the Concord special train will hereafter leave Boston at 6.20 P. M.

Eastward—Leave Waltham for Boston via Watertown Branch at 6.50 A. M. and arrive at Boston at 7.30 A. M. Leave Waltham for Boston via main road at 7.55 A. M. This, between Brick Yard and Boston, takes the place of the train run from Brick Yard to Boston. Train now leaving Fitchburg at 6.40 A. M. will leave at 6.35 A. M. in order to be sure and make connection with train leaving Waltham at 10 A. M. via Watertown Branch. A train from the Marlboro' Branch will arrive at Boston at 8.55 A. M., stopping only at Concord Junction, Concord and Waltham. The Atlantic express now due at Boston at 9.30 A. M. will be run express from Fitchburg, arriving at Boston at 9.05 A. M. The train leaving Fitchburg for Boston at 7.30 A M. will remain unchanged between Fitchburg and Boston. The train now leaving Waltham for Boston via Watertown Branch at 11.10 A. M. will start from Concord at 10.40 A. M. The Cincinnati express now due in Boston at 3.35 P. M. will hereafter arrive at 2.30 P. M. A freight train will be run each way on the Peterboro' and Shirley Branch, which will do away with the mixed train arrangement. A new passenger train will leave Ayer Junction for Greenville at 1 P. M., connecting with train leaving Boston at 11.15 A. M. and with trains from several roads centering at Ayer Junction. Returning, it will arrive at Ayer Junction at night in time to connect with other roads and with train due in Boston at 7.30 P. M. Several changes are also made in the Sunday trains, including a new one from Marlboro' to Boston and return.

The total value of property in the District of Columbia is $176,116,894, of which the United States owns about one-half. There are 230 miles of streets, of which 186 are paved. The shade trees cover 120 miles of streets, and number 53,050. There are 112 miles of lighted streets, with 4,826 street lamps. The water mains are 175 miles in extent; 826 fire plugs; 1,234 stop-boxes, and 317 hydrants located; there are 109 miles of pipe sewer and 45 miles of brick sewer laid; 1,266 telegraph poles set, with 436 miles of telegraph wire; there are 75 public school buildings, 35 of which are owned by the District, and 40 rented. There are also about 31 miles of street railroad in the District of Columbia.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, May 26, 1881.

In the early hours the money market was extremely easy at 2@3½ per cent for call and time loans, and at 3½@4½ per cent for prime mercantile paper; but in the last hour some of the stock brokers paid as high 4 per cent; the closing quotation was 3@3½ per cent on stocks and 2@2½ per cent on United States bonds.

The posted rates for prime bankers' sterling were 4.85@4.87. The actual rates were 4.84@½ and 4.86@½. Cable transfers were 4.86¼@4.86¾. Prime commercial bills were 4.82¼@¼.

The Secretary of the Treasury has directed that the interest on the Pacific Railroad bonds shall hereafter be paid by checks from the department, instead of on schedules at the Sub-Treasury offices, as heretofore. All registered interest paid by the Treasury will, therefore, hereafter be paid by check.

The Treasurer of the Pennsylvania Railroad Company is prepared to receive from the stockholders payment on their subscriptions to the new stock of the company, to which they are entitled under the allotment made May 26. All subscriptions must be paid by June 15th, proximo.

The 7 per cent bonds of the Chicago, Clinton, Dubuque and Minnesota Railroad Company, dated February 1, 1879, will be redeemed August 1 at the office of the New England Trust Company, Boston, Mass., and interest will cease on that day.

The Governing Committee of the Stock Exchange has formally recognized the recent issue of $18,000,000 Northern Pacific Railroad stock as a good delivery.

The stockholders of the Syracuse, Binghamton and New York Railroad Company, voted on the 23d inst., to increase the capital stock to $2,500,000.

The interest on the 6 per cent bonds which have been continued at the lower rate of interest begins July 1, and on the continued 5s on Aug. 12.

Messrs. John J. Cisco & Son will pay par and interest for the income and indemnity bonds of the Houston and Texas Central Railway Company if presented on or before June 1.

The total values of the exports of domestic provisions, tallow and dairy products during April, 1881, were $8,133,164, during four months ending April 30, $52,405,350, and during the six months ending April 30, $73,360,712; and during April, 1880, the total values were $12,965 672, during the four months ending April 30, $44,286,762, and during the six months ending April 30, $58,484,014. The total values of dairy products for the twelve months ended April 30, 1881, were $23,485,781, and during the same period in 1880, $16,607,950.

The chief of the bureau of statistics reports that the total values of the exports of domestic breadstuffs from the United States during the month of April, 1881, were $20,426,014, and during April 1880, $22,705,074. For the four months ended April 30, 1881, $71,575,627, and for the four months ended April 30, 1880, $74,068,454. For the ten months ended April 1881, $225,155,801, and for the same period in 1880, $233,844,387.

The "Iron Steamboat" subscriptions are in demand by reason of the near approach of the steamboat season. The bulk of the shares is now held by gentlemen of undoubted ability, who are now managing the greatest railroad interests of the country. They bought the stock of the original subscribers.

The closing quotations on Thursday were: Adams Express, 132½@133; American Express, 86½@87; American District Telegraph, 55¼@56½; Chicago, Burlington and Quincy, 172@173; Canada Southern, 80½@80⅝; Chicago and Northwestern, 132¾@133; do. pref., 145@145¼; Central Pacific, 96¼@96⅜; Chicago, Milwaukee and St. Paul, 128⅞@129; do. pref., 138½@139; Chicago, Rock Island and Pacific, 147¼@147½; Cleveland, Columbus, Cincinnati and Indianapolis, 99¼@99¾; Columbus, Chicago and Indiana Central, 80⅜@80⅝; Delaware and Hudson Canal, 112½@112¾; Delaware, Lackawanna and Western, 127½@127⅝; Hannibal and St. Joseph, 84½@84¾; do. pref., 115½@115¾; Lake Erie and Western, 63@63⅛; Lake Shore and Michigan Southern, 134½@134⅜; Metropolitan Elevated, 93¾@94; Manhattan Elevated, 29@29⅜; Michigan Central, 115½@115¾; New York Elevated, 110⅝@110⅞; New York, Lake Erie and Western, 50¼@50⅜; do. pref., 91¼@91½; New York Central and Hudson River, 151⅛@151⅜; Ohio and Mississippi 46⅞@47; Ohio Central, 86@86¼; Pacific Mail, 56½@56¾; Panama, 270@280; St. Louis, Alton and Terre Haute, —@71; do. pref., 98@100; Texas and Pacific, 68@68¼; Union Pacific, 127¼@127⅜; United States Express,

Pennsylvania Railroad.

The statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie for April, 1881, as compared with the same month in 1880, shows:

An increase in gross earnings of.....	$272,006
An increase in expenses of.....	111,778
An increase in net earnings of.....	$160,228

The four months of 1881, as compared with the same period in 1880, show:

An increase in gross earnings of..... ..	$1,094,827
An increase in expenses of	880,134
An increase in net earnings of	$214,693
All lines west of Pittsburg and Erie for the four months of 1881 show a surplus over liabilities of $1,463,701, being a gain as compared with the same period in 1880 of.....	146,524
Total increase	$361,217

The Dayton and Southeastern Narrow gauge Railroad was released from the Receiver, on the 21st inst., by order of the court, and transferred to the Toledo, Delphos and Burlington Railroad Company. Both roads are narrow gauge, and the latter acquires possession of the former by paying all of the Receiver's and other indebtedness, amounting to $486,000. Gen. Corse, President of the Toledo, Delphos and Burlington Railroad Company, and George W. Ballou, of New York, acted for the transfer company.

The New York, Lake Erie and Western Railroad Building corner of Duane and West streets, in this city, has been entirely vacated by that company, with the exception of the General Ticket office. President Jewett, with his staff of aids and the Treasury, Accounting, and Freight Executive departments, removed to the Coal and Iron Exchange, No. 21 Cortlandt street, some weeks ago, and General Passenger Agent John N. Abbott has just removed with his department to quarters on the third floor of the same building. The General Ticket office will remain in the old building in West street.

☞ PENNSYLVANIA RAILROAD COMPANY,
TREASURER'S DEPARTMENT.

PHILADELPHIA, May 2, 1881.

The Board of Directors have this day declared a Semi-Annual Dividend of FOUR PER CENT. on the Capital Stock of the Company, clear of all taxes, payable in cash on and after May 28 to stockholders as registered on the books at 3 P. M., April 30, 1881.

On May 28, dividends will be paid to women only; after that date, they must await their turn with other stockholders.

The Board have also instructed the Treasurer to give public notice that the stockholders will have the privilege of subscribing at par to the stock of the Company in the proportion of TWELVE AND ONE-HALF PER CENT. of the number of shares registered in their names April 30, 1881, and those entitled to a fraction of a share can subscribe for a full share. All subscriptions must be made and paid for in full prior to June 15, 1881, and no subscriptions will be received after that date. The privilege of taking new stock may be sold by any stockholder, and blank forms of allotment will be furnished upon application.

JOHN D. TAYLOR,
Treasurer.

Paine, Webber & Co.,

BANKERS AND BROKERS,

Denominations, $1,000, Coupon or Registered.

Registered Bonds have Coupons attached, payable to bearer, or with coupons detached, interest payable to owner or attorney, at Company's office, in New York City.

Price, 102½ and Accrued Interest.

Subject to advance without notice.

ROUTE AND RESOURCES.

The route of the road is from Lexington, Ky., to Huntington, West Va., through the rich blue grass region of Kentucky, being the neck of the Chesapeake and Ohio route, and thus the most important link in that whole vast system which is to day extending itself to the Far West, Northwest, and particularly the Southwest, via the Paducah and Elizabethtown and the Paducah and Memphis Railroads.

The necessary funds for the completion of this road are assured, and work is rapidly progressing from Mount Sterling eastward and from Ashland westward. From Mount Sterling to Lexington and from Huntington to Ashland the road is in active operation; trains running daily. All the steel rails, fastenings, and ties are bought and on the ground. Fifteen new locomotives have been ordered and four hundred new cars, preparatory to the opening of the entire road.

We recommend these bonds as a safe investment security.

FISK & HATCH,

5 Nassau Steet,
New York.

The De Lesseps Canal.

Ex-Secretary Thompson says the De Lesseps canal scheme is progressing faster than was expected with the preliminiary work of clearing off trees and laying out the course of the canal. He expects to be able to have excavation started by midsummer. He is having 700 portable houses constructed, to be taken down there and put up. They will also take a large stock of all kinds of tools, including heavy steam shovels for excavation. A narrow-gauge railroad will be run along the side of the canal to carry out earth from the excavations to where it is needed for grading. He is going to try an experiment with American labor, and will test the adaptability of negroes to the climate by taking out a colony of some 500 blacks from the Gulf States. If those men do not stand it he may employ Cuban coolies.

LELAND HOTEL, CHICAGO, ILL., FINEST location in the city, corner Michigan avenue and Jackson street; fronting on the beautiful lake and park; two blocks from the Custom House and Post-office. Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts.

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

ESTABLISHED IN 1831.
AMERICAN RAILROAD JOURNAL,
PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL COMPANY,
JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.
The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.
The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.
The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.
The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.
The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.
The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

SWIFT'S IRON AND STEEL WORKS,
26 West Third St., CINCINNATI, O.,

Manufacturers of all Weights of Standard and Narrow-Gauge Rails by most Approved Process. Also Rail Fastenings, Steel and Bloom Boiler Plate, Tank Sheet and Bar Iron.

SECOND QUARTO SERIES, VOL. XXXVII., No. 23.] NEW YORK, JUNE 4, 1881. [WHOLE No 2,354, VOL. LIV.

MANITOBA AND THE NORTHWEST.

A pamphlet recently published furnishes the following particulars of this vast district:

The province of Manitoba, in Canada, extends from eastward of the Red River to a line about 200 miles west of that river, and beyond that is the North West Territory, reaching to the base of the Rocky Mountains, a further distance of nearly 800 miles. The Red River runs through Manitoba, for upwards of 100 miles to its outlet into Lake Winnipeg. The valley of the Red River contains some of the richest alluvial soil on the continent of North America, and the Assiniboine river, several hundred miles in length, which falls into the Red River at Winnipeg, runs through another valley, having a great depth of rich soil. The Little Saskatchewan River falls into the Assiniboine about 150 miles from its mouth, and runs parallel to the Assiniboine about 100 miles to the east of it. These three rivers in Canadian territory with their tributaries comprise an area of wheat and grazing lands estimated at 300 miles long by 150 broad, which produces wheat of the finest quality. It is now being settled upon by farmers from Canada and the United States, and by emigrants from Great Britain and Ireland.

The productiveness of the soil along the Red River, Assiniboine, and Little Saskatchewan Valleys, is greater than in Minnesota or Dakota, and the yield of wheat per acre is larger. This is also the fact throughout the whole Province of Manitoba. The exhibit of the growth of cereals and vegetables from Manitoba at the agricultural shows last year at Ottawa, Toronto, Hamilton, and London is the strongest testimony of the fertility and productiveness of the prairie soil of that province. If further evidence is needed, it may be found in the speech made by the Consul General of the United States for Manitoba, who, on the 3rd October, 1879, made the following statement in regard to the flow of emigration westward. He said that one of the great tides of emigration now was to the northern zone, "specially adapted to wheat growing and cattle raising. That included Canada, Wisconsin, Michigan partially, and Minnesota, but three-fourths of the great wheat producing belt of the continent lay north of the boundary. There the future bread supply of America, and of the old world too, would be raised." He went on to say "that he wished to allude to that which was also of very great moment, the meat supply. In his opinion, the beef raised in this northern district to which he had referred would be found to be superior in quality and superior in quantity to any that could be raised even on the plains of Texas and the adjoining States." The land requires no clearing of timber. It simply needs to be ploughed, and in the same season produces productive crops, thus enabling settlers to avoid all the hardships known to backwoods-men in clearing up heavily timbered lands.

In addition to the great productiveness of the soil for wheat, it is also admirably adapted for the growth of oats, barley, and all other kinds of grain, the yield per acre being very large. Roots and vegetables of all descriptions grow in the greatest profusion. The yield, as exhibited at the agricultural shows throughout Canada, compares most favorably with similar articles grown in other parts of the Dominion.

The country is well adapted for raising cattle, the prairie grass being peculiarly nourishing and in large quantities. It also makes excellent hay, the only expense being the cost of cutting and drawing to the farm-yard. So excellent is the prairie grass that cattle driven for hundreds of miles across the plains, show no falling off in weight and condition as they proceed on their journey. The abundance of grass and hay, and the excellent root crops which are grown, render the raising of large herds of cattle extremely profitable. Horses remain out during the winter, the depth of snow being light, and when brought in, in spring, are not in much worse condition than when turned out at the beginning of winter. They are frequently herded in bands of from one to two hundred, in charge of one man, to prevent them from roaming too far.

The climate of Manitoba and the North West is extremely healthy. Fever and ague, which exist in so many parts of the Western States, are here unknown. In summer the heat is by no means oppressive, and though amply sufficient for the thorough maturity of the crops, is no greater than in Ontario, or throughout the northwestern portion of the continent. In winter the cold is steady, and no greater, as a rule, than is met with in all parts of the continent north of Chicago. The fall of snow is lighter than in most parts of Canada, seldom reaching two feet in depth. On the whole, the climate is an excellent one, both as regards the health of the inhabitants and the maturing of the crops.

The Government of Canada have under contract and partially completed about 600 miles of railway, 250 of which are now in actual operation from a point about 120 miles east of the Red River to 80 miles west of it, with a branch to the American boundary at Emerson, where connection is made with a continuous railway system reaching all parts of Canada and the United States. The Government expect to have the whole 600 miles in operation by the summer of 1882, and when this line is constructed, communication during the season of navigation, from May till the middle of November, will be made between the wheat-growing districts and the great inland lakes. The Government have also entered into contracts with the Canadian Pacific Railway Company for the completion of the entire Pacific Railway, making a continuous railway connection in British territory, from the Atlantic to the Pacific. It is the intention of the Railway Company to proceed vigorously with the construction of the line through the Prairie country, with the view of securing the completion of a main arterial line to the base of the Rocky Mountains, within the next four or five years. Branch lines will also be constructed when the necessity for them becomes apparent. The Assiniboine River is navigable from its mouth to Fort Ellice, and during the summer months steamers run regularly carrying large numbers of passengers and freight between Winnipeg and Fort Ellice and intermediate places. A line of steamers also runs from

the railway near the mouth of the Red River, to the mouth of the Main Saskatchewan River, where it falls into Lake Winnipeg, thence up the Saskatchewan River to the Prince Albert settlement, Battleford, the capital of the North-West Territory, and on to Edmonton, which is near the base of the Rocky Mountains. These steamers carry passengers and freight, and arrangements are now in progress for adding to the number of boats, as the increasing traffic may render necessary.

George Stephenson and Oliver Evans.

Apropos to the centennial celebration of the birth of George Stephenson, to be held in England June 9th the New York Times says: "The inventor of the principal of the locomotive is clearly the man who first used steam alternately on each side of the piston, and, above all, who first availed himself of its elastic force. In a word, the inventor of the locomotive is the inventor of the high-pressure engine. The claim includes much more than the application of steam to land locomotion, but it does include the invention of the locomotive as surely as the greater includes the less. That inventor is not George Stephenson, of England, but is Oliver Evans of Philadelphia.

Evans' invention, like Watt's, sprang from a boyish trick. One day while they both were yet children, his brother told him of the astonishing result which followed the placing in a blacksmith's forge of a gun barrel half filled with water and stopped at the ends. The matter rested there until he came across an account of the low pressure condensing engine. He instantly associated the two things, and, as a mental conception, the invention was that moment complete. If he had done nothing more, he had then conceived of a high pressure engine. But, happily, his claims to fame rest on more and sufficiently substantial foundations. He announced his discovery and was called crazy for his pains. Then he sought for sympathy and financial help in England, and twice sent plans and specifications there. The fact is incontestible, for it is recorded in contemporaneous English publications. Finally, he resolved to devote the product of all his other inventions to his steam bobby, and in 1786-7 he patented his engine. Nor is this all. In 1801, to claim no earlier date, he put it into successful practical operation. It was designed for a stationary engine, and for years it furnished power to marble-saws and a plaster mill. The idea of locomotion was, however, not abandoned, and soon after he made another engine, which he called Eructor Amphibolis. This singular contrivance was driven by steam alone over the highway, a distance of a mile and a half."

The South Carolina Railroad Company have begun the extension of their tracks to the water side, and before the opening of the fall trade will be prepared to receive and deliver goods on the extensive piers specially constructed for the company's use. The road will be sold under decree of the United States Court in July, and the syndicate of Northern capitalists who hold the bulk of its debt, and who will probably become its purchasers, announce their purpose to equip the road throughout in the most complete and efficient manner and make it, with its connections, a great trunk line from the Northwest to Charleston.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of May, were:

The first electric railway now working in the vicinity of Berlin is so satisfactory that a second is projected to run to another district of the suburbs. The cost of construction is only £7,500 per kilometre.

A Veritable Palace Car.

The following description of a Pullman Palace Car sleeper, recently placed on the Eastern Division of the St. Paul, Minneapolis and Omaha Railway, is from the St. Paul Pioneer Press:

There are twelve sections in the body of the car—twenty-eight double and two single berths. In the drawing room there are two double and two single berths, and the smoking room has a double berth. The ladies' drawing room is in one end of the car, and the gentlemen's in the other end. In the gentlemen's drawing room is a double washstand. The car is supplied with air and automatic brakes, with paper wheels forty-two inches in diameter. The machinery is so perfect and so complete in all its parts that the occupants do not experience the slightest jolting as the cars move along the rails. All the side, or panel work is solid mahogany, ingeniously and elaborately carved, while the carpets are of the heaviest and softest patterns of velvet. A striking feature is the metallic work, the cuspidors, knobs, etc., which are gilded instead of being silvered. It is lighted with five large patent lamps with double burners, which render all parts of the car so light that the finest print can be read as plainly as by daylight. This is the first of five cars of the same description, all of which will cost $80,000.

Duty on Car-Truck Channel Iron.

The Secretary of the Treasury of the United States at Washington has reversed his ruling of October, 1880, in relation to the duty on car-truck channel iron. This iron is imported in the form of rolled plates 7 feet long 10½ inches wide, with flanges on each side. The question was raised some months ago as to whether these plates should be subjected to a duty of 35 per cent as "manufactures of iron," or a specific duty of 1½ cents a pound as material to be used in manufactures. Last October the department ruled that the completed plate was a "manufacture," and consequently was subject to an ad valorem duty. At the present price of iron in Scotland the duty on these plates is about $21 a ton. The Pennsylvania iron manufacturers, however, were not satisfied with this ruling, and Assistant Secretary French gave them another hearing, which resulted in a reversal of the decision of last October, and instructions have been sent to the various custom houses to levy a duty of 1½ cents a pound, which increases the duty on a ton to $33 60.

The ten new locomotives now building by the Hinkley Locomotive Works for the Missouri Pacific Railroad are of an entirely new pattern, with four driving wheels on each side, and will be considerably heavier, as well as more powerful, than ordinary engines. Their style is almost perfectly plain, many parts usually polished in this case being painted black. They will weigh, when completed, about fifty tons each. A peculiarity of their construction is that the engineer's cab is practically over the boiler or fire-box, while the fireman is placed behind and beneath.

A profile map of the plans of the Delaware, Lackawanna and Western Railway Company for reaching Buffalo, Erie County, N. Y., has been filed in the County Clerk's Office and everything points to definite and speedy action.

New York, Saturday, June 4, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THERE is good ground for congratulation in the financial achievements which our Government is exhibiting to the world. It is not improbable that the close of the present fiscal year will show that in twelve months the public debt has been decreased $100,000,000. This will be so if the month of June makes as good a record as is shown in the statement for May; a reduction of $11,150,721.

A THROUGH LINE from New York to Chicago will be acquired by the New York, Lake Erie and Western Railroad Company through the control just obtained, of the franchise of the Chicago and Atlantic Railway Company, extending from Marion, Ohio, on the New York, Pennsylvania and Ohio Railroad to Chicago. It is intended to commence at once the work of completing the line and by an arrangement with the New York, Pennsylvania and Ohio Railroad Company the New York, Lake Erie and Western Railroad Company will control the entire line to Chicago, thus securing a through route between New York and that city entirely independent of existing lines. It is said that a syndicate composed of Kuhn, Loeb & Co., Winslow, Lanier & Co., L. Von Hoffman & Co., Woerishaeffer & Co., and others, have purchased of the New York, Lake Erie and Western Railroad Company the first mortgage bonds upon the Chicago line, interest on them being guaranteed by the New York, Lake Erie and Western Railroad Company, and additionally secured by a pledge of the latter's gross earnings and those of the New York, Pennsylvania and Ohio Railroad Company from all Chicago traffic.

Cooper Union.

Among all the public exercises given by schools and colleges at this season of commencements, there can be found no better example of a great philanthropic work conducted in a quiet and practical way than is furnished by the annual commencement exercises of Cooper Union and by the report made at that time of the previous years' work of the Institute. The Cooper Institute for the Advancement of Science and Art has been continually broadening its field since its first establishment until now its generous provisions extend into all departments of science and art and not only cover the requirements of a practical mechanical or scientific education but afford means for adding to the same the polish and ornament of a liberal culture. The twenty second annual commencement of the Institute was held in the hall of the Union on Saturday evening of last week, and an indication of the breadth of the educational privileges afforded by this grand institution is seen in the variety of topics taken by the graduates for the oratorical part of the exercises. Orations were delivered by Henry Mendelson, on "Metallurgy;" by James S. Erwin, on "Eloquence;" by E. J. Kaltenbosh, on "Political Education;" by Abraham Levy, on "Free Government;" by Henri D. Dickinson, "A Plea for the Alchymist," and by E. D. Bolsover, on "Technical Education," the last named gentlemen also delivering the valedictory.

The event was one of unusual interest as it closed a year of marked activity in the Institute, during which valuable additions have been made to the various departments and improvements adopted in the courses of free instruction. During the week receptions were held at which opportunities were afforded the public for seeing some of the work accomplished by the students and for looking through the spacious and convenient instruction, reception and reading rooms. The receptions were largely attended and the exhibitions drew forth many expressions of admiration from experts and critics as well as from friends, the exhibits made by the classes in mechanical drawings and by the students in the Woman's Art School attracting special attention. On Saturday evening the closing literary exercises were held and the large hall was filled to its crowded capacity. Peter Cooper, to whose liberality and practical wisdom New York is indebted for this magnificent institution, presided, and the hearty tributes of respect which greeted him evinced the esteem and veneration in which he is held by those receiving the direct benefits of his philanthropy and by the general public. Among others on the stage with him were Hon. Abram S. Hewitt, Edward Cooper and F. W. Plympton. The trustees' report, read by Mr. Hewitt, stated that last years' expenses were $45,450 which sum was derived from the rents of the building and from the income of a special endowment of $150,000 made by Mr. Cooper for the support and increase of the free reading room and library. The amount earned for themselves by the pupils in the different departments of the Woman's Art School during the year was $19,480. During 1880 the library and reading room was visited by 402,685 persons. Since the property was transferred to the trustees by Mr. Cooper, in 1857, at the cost of $630,226, they have expended over $868,000 in giving free instruction to the public.

There is a special value at this time in the work which is being done at Cooper Institute. Never was there a time when high mechanical skill, trained in theory and practice, has been in greater demand in this country than on these days of gigantic construction enterprises, The incentive which is given to inventors by the employment of new forces and means for the advancement of scientific work and progress in engineering and general construction was never stronger than to-day. The railroad enterprises under way and the many more contemplated offer most encouraging fields for the exercise of just those acquirements which this institution develops. Among the new and valuable features recently employed for utilizing the work produced under this free training is the establishment in the Cooper Union building of an Inventors Institute, where a permanent exhibition of inventions is maintained and one of the chief aims of which is to place inventors in connection with capitalists and others most interested in utilizing the products of inventive skill. But not alone in this department is the work which Mr. Cooper is doing particularly timely but also in the Woman's School of Art which is most flourishing now when the fine arts hold out more encouragement to their devotees than ever before in America. It must be a source of peculiar congratulation and happiness to the venerable founder of Cooper Union to see in his ripe and honored old age the work of his hands so fruitful of present good and so rich in promises of future utility and blessing to the men and women of his city and of his country.

Secretary Blaine on the Care of Live Stock in Transit.

Increasing interest is being manifested both in this country and in Europe in the subject of providing better and more economical measures for feeding and watering live stock in transit, and the question having been much agitated and

studied, has become one of the most important connected with improvements in transportation, while in its sanitary and economic relations it has assumed a character of international importance. Many devices have been placed before railroad managers in the way of parlor cattle cars, etc., but in the main they have not been at all favorably received on account of the undesirability for many reasons of having special cars for such purposes, and because it does not seem possible to fully meet the requirements practically and economically in that way. Mr. Tingley's device, consisting of a simple method for feeding and watering the stock at stations in ordinary cars without removal, as previously described in the JOURNAL, is receiving much attention here and abroad, and is gaining a deserved popularity with railroad men, shippers and consumers alike. We had occasion a short time since to publish the opinion of Sir Edward Thornton on the device and its bearing on the exportation of American beef, and we give below a letter on the subject from Hon James G. Blaine, Secretary of State:

WASHINGTON, D. C., May 18th, 1881.

A. D. TINGLEY, Esq.

DEAR SIR.—I have been very greatly interested in your invention for the feeding and watering of cattle while in transit by rail for Eastern and European markets. My attention has been called officially by reports from abroad to the very great importance of careful and humane transportation of cattle as affording a protection against disease and insuring always a better quality of beef.

I hope you will succeed in your enterprise and I cannot indeed doubt that you will. You are doing a most valuable work and I trust you will meet with just recompense.

Very truly yours,

(Signed) JAMES G. BLAINE.

Organization.

Jay Gould, Trenor W. Park, Sidney Dillon, Russell Sage, C. P. Huntington, Charles G. Francklyn, E. H. Perkins, Jr., Henry Hart and J. B. Houston have been elected directors for the ensuing year of the Pacific Mail Steamship Company.

Articles of incorporation were filed with the Secretary of State of Ohio on the 27th ult., of the New York, Ohio and Western Railroad Company, with a capital of $50,000. The road is to run from Medina to Trumbull Co.

The Kankakee and Southwestern Railroad Company have re-elected J. F. Tucker, E. T. Jeffery and W. J. Mauriac. W. K. Ackerman was re-elected president, J. C. Welling treasurer and W. J. Mauriac secretary.

The following gentlemen have been elected directors of the Santa Cruz Railroad Company: Geo. Crocker, E. C. Wright, F. G. Douty, A. C. Bassett, J. L. Willcutt, W. E. Brown, C. J. Robinson. George Crocker was elected President, J. L. Willcutt Secretary, and N. T. Smith Treasurer.

At the recent annual meeting of the Montreal and Vermont Junction Railway Company, held at Stanbridge, Quebec, the following Board of Directors was elected: J. Gregory Smith, A. H. Millmore, Jed. P. Clark, Jo D. Hatch, J. S. Brigham, G. Smith and E. C. Smith.

The directors of the Concord and Claremont Railroad Company, elected on the 25th ult., are; George E. Todd of Concord, Dexter Richards of Newport, Daniel W. Johnson of Claremont, Charles P. Sanborn of Concord, Mason W. Tappan of Bradford and Henry C. Sherburne of Concord.

At the annual meeting of the Chicago and Springfield Railroad Company the three retiring directors, W. K. Ackerman, B. F. Ayer and L. V. F. Randolph, were re-elected. W. K. Ackerman was re-elected president, J. C. Welling treasurer and J. Dunn secretary.

The Galveston and Pacific Narrow-Gauge Railroad Company was organized at Galveston, Texas, on the 28th ult., with a capital stock of $750,000. The route of the road will be from Galveston to Victoria, San Antonio and Camargo. The subscription books for the capital stock will be opened next week.

The directors of the Mont Alto Railroad Company, recently elected, are: I. S. Waterman, T. B. Kennedy, G. B. Wiestling, E. W. Wiestling, E. P. Dwight, John Stewart and D. O. Geho. The directors of the Mont Alto Iron Co. are: I. S. Waterman, G. B. Wiestling, E. P. Dwight, E. P. Wiestling and W. J. Barr.

The Milwaukee Grain Transportation Company, with $1,000,000 capital stock, and Thos. K. Ewing, Sam. McCord and W. H. Osborne as incorporators, filed articles of association in Madison, Wis., May 17. The purpose is to manufacture and sell cylinder cars under a patent held by the Prosser Twin Cylinder Car Company of Chicago.

The directors of the New York and Harlem Railroad Company, recently elected, are: Wm. H. Vanderbilt, Cornelius Vanderbilt, Wm. K. Vanderbilt, Augustus Schell, Abraham B. Bayles, James H. Banker, John B. Dutcher, Robert J. Nivin, Joseph Parker, Chauncey M. Depew, William H. Leonard, Samuel F. Barger and John E. Burrill.

The stockholders of the Wilton Railroad Company, at their annual meeting in Nashua, N. H., elected the following directors: Solomon Spalding, of Nashua; Clarke C. Boutwell, of Nashua; William Ramsdell, of Milford; John Reed, of Nashua; John A. Spalding of Nashua. Clerk, J. Thornton Greeley, of Nashua.

The directors of the Northern Railroad Company, elected at the annual meeting of the stockholders in Concord, N. H., on the 26th ult., are: Henry C. Sherburne of Concord, George W. Nesmith of Franklin, Uriel Crocker of Boston, Francis B. Hayes of Boston, Josiah H. Benton, Jr., of Boston, George E. Todd of Concord and Alvah W. Sulloway of Franklin, N. H.

Articles of consolidation of the Detroit, Butler and St. Louis and the Butler and Detroit Railroads were filed with the Secretary of State of Indiana, on the 25th ult. The capital stock of $1,200,000, and the directors are T. McMillan, C. H. Buhl, Allen Sheldon, R. A. Alger, George W. Balch, Rufus W. Allette and James F. Joy, all of Detroit.

At the annual meeting of the stockholders of the Swedesboro', Railroad Company, held at Swedesboro', N. J., on the 26th ult., T. Jones Yorke, Richard Ashhurst, J. S. Thompson, Samuel Black, David B. Gill J. H. Vanneman, Edwin Stokes, M. Gill and J. H. Bradway were elected directors, J. S. Thompson was re-elected President and D. B. Gill secretary and treasurer.

The Newcastle and Franklin Railroad, recently purchased by the Buffalo, Pittsburg and Western, has been renamed the Newcastle and Oil City Railroad. The election at Newcastle last week resulted in the choice of the following directors: J. W. Jones, C. H. Clark, George F. Tyler, of Philadelphia; Archer N. Martin, of New York City; F. W. Mitchel, of Oil City, and William Patterson, of Newcastle. President, J. W. Jones.

The stockholders of the Nashua and Lowell Railroad Co. have elected the following directors: Francis A. Brooks, Francis V. Parker, Gedney K. Richardson, Boston; Jeremiah W. White, Cornelius V. Dearborn, William W. Bailey, Nashua; A. M. Shaw, Lebanon. President, Francis A. Brooks; Treasurer, Charles B. Brooks, Boston; corporation clerk, Walter A. Lovering, Nashua.

At the annual meeting of the Peterborough Railroad Company, in Nashua, directors for the ensuing year were chosen as follows: James Scott, of Peterborough; George W. Gill of Worcester; George A. Ramsdell, of Nashua; S. A. B. Abbott, of Boston; John H. George, of Concord; Edward Spalding, of Nashua; Frank A. McKean, of Nashua. Corporation clerk, Gilman C. Shattuck, of Nashua.

At the annual meeting of the Concord Railroad Company, held in Concord, N. H., on the 14th inst, the following directors were elected: Frederick Smyth of Manchester, Samuel N. Bell of Manchester, J. Thomas Vose of Boston, Benjamin A. Kimball of Concord, Franklin B. Hayes of Boston, Henry C Sherborne of Concord, James W. Johnson of Enfield, and John H. Pearson of Concord.

The Atlanta and Alabama Railroad Company was organized at Atlanta, Ga., on the 28th ult., by the election of A. Haskell, of Columbia, S. C., president; G. J. Forencre, of Atlanta, vice-president, and W. H. Snowden, A. S. Buford, James Bryan, T. M. R. Talcott, L. J. Hill, S. M. Inman, A. Murphy, directors. This road extends from Atlanta, Ga., to Birmingham, Ala. It is claimed that the stock has all been taken and the road will be built.

A company to be known as the Continental Construction Improvement Co., with a capital of $10,000,000, was organized in New York on the 26th ult., to build the Boston, Hoosac Tunnel and Western Railroad, which is to extend from Boston to Buffalo, via Schenectady, Utica, Rochester and Syracuse, partly over the Syracuse and Chenango Railroad, recently purchased, with branches to Oswego, the soft-coal regions and New York city.

At the annual meeting of the stockholders of the Manchester and Lawrence Railroad Company, held at Manchester, N. H., on the 27th ult., the following named directors were unanimously elected: Benjamin F. Martin, Manchester; Edward A. Abbott, Concord; Joseph W. Smith, Andover, Mass.; Nathan Parker, Manchester; William A. Tower, Boston, Mass.; Asa Fowler, John A. White, Concord. President, B. F. Martin; clerk, S. N. Bell; treasurer, George B. Chandler.

The directors of the Ashtabula and Pittsburgh Railroad Company, recently elected, are: H. B. Perkins and Warren Packard, Warren; Caleb B. Wick and F. H. Matthews, Youngstown; F. Harrington, Rock Creek; Henry Hubbard and H. L. Morrison, Ashtabula, Ohio; John N. Hutchinson, Philadelphia; Wm. Thaw, Wm. P. Shinn, Thos. D. Messler, Wm. Mullins and W. H. Barnes, Pittsburgh. The officers are: President, John N. Hutchinson; secretary and treasurer, A. F. Hubbard.

Articles of association of the Rogers and Siloam Springs Railway to run from Rogers to the latter place, a distance of thirty-five miles, were filed in the office of the Secretary of State of Arkansas on the 26th ult. The capital stock is $1,000,000. The directors are C. W. Rogers, A. G. Thompson, of St. Louis; John O. Day, James Dunn, of Springfield, Mo.; Peter Van Winkle, of War Eagle, Ark.; James A. C. Blackburn, of Rogers, Ark.; E. P. Watson, of Bentonville, Ark.; P. H. Van House and D. R

Davidson, of Fayetteville, Ark. Work on the projected road will commence shortly.

Articles of incorporation were filed with the Secretary of State of Illinois on the 27th ult. of the Fulton County Extension Railroad Company running from Fairview, in Fulton County, east to Peoria. One branch will run via Monmouth to the Mississippi and another via Galesburg to the Mississippi. The capital stock is $1,000,000. The incorporators are S. H. Malloy, T. M. Stewart, S. S. King, Joseph Braden, of Chariton, Ia., and James C. Wilcoxsen, Henry Phelps, Moses Turner and John A. Gray, of Lewiston, Ill.

The Secretary of State of West Virginia has issued a certificate of incorporation to the Kanawha and Raleigh Railroad Company for the purpose of constructing a railroad from the mouth of Calvin creek, Kanawha county, to a point on Clear Fork of Big Coal run. The principal office shall be at Philadelphia, Pa., and the certificate perpetual. The capital stock is $150,000 divided into shares of $100 each. The corporators are James A. Wright, Edward M. Davis and Henry C. Davis, all of Philadelphia, and Wm. H. Dewes, of Carkin, Kanawha county, W. Va.

Articles incorporating the Austin Railway Company have been filed in the office of the Secretary of State of Minnesota. The proposed road is to start from some point in Mower County, on the line of the Southern Minnesota Division of the Chicago, Milwaukee and St. Paul Railway east of Ramsey, in said county, and thence to run so as to intersect the Iowa and Minnesota Division of the same road north of or at the city of Austin. The general offices of the company are to be at Austin, and the amount of capital stock is fixed at $50,000. Following are the names of the incorporators, all of Mower County; O. W. Shaw, W. T. Wilkins, Z. H. Sherwin, E. C. Dorr, H. H. Ball, R. O. Hall, G. Schleuder, Ira Jones, W. L. Hollister, C. A. Pooler and F. I. Crane.

At the annual meeting of the Suncook Valley Railroad Company held at Manchester, N. H., on the 26th ult., the following board of directors was elected: Samuel N. Bell of Manchester, Natt Head of Hooksett, Reuben L. French of Pittsfield, Frederick Smyth of Manchester, Charles H. Carpenter of Chichester, Lemuel B. Towle of Epsom, Martin V. B. Edgerly of Manchester. S. N. Bell, President, and Lewis G. Clark, Clerk. The road is operated by the Concord Railroad Co., under a contract or lease. The annual meeting of the Suncook Valley extension was then held and the following directors were elected: Samuel N. Bell, Frederick Smyth, Natt Head, William H. Berry, Daniel E. Tuttle, Thomas Cogswell, George W. Emerson. President, S. N. Bell, and Clerk, B. P. Cilley.

An agreement between the companies representing the following railroads, to wit: Minneapolis and St. Louis, capital, $3,200,000; Minneapolis and Duluth (White Bear Branch), capital $200,000; Minnesota and Iowa Southern, capital $3,000,000, and Fort Dodge and Fort Ridgely, capital $9,000,000, has been filed in the office of the Secretary of State of Minnesota, its purport being the consolidation of the capital stock, franchises and property of the parties of the second, third and fourth part with those of the party of the first part, viz.: the Minneapolis and St. Louis Railway Co., which operates the several lines enumerated. The agreement is dated May 13, 1881, and the consolidation goes into effect on the 1st of June. It is further stated that the new company shall have a capital stock of $20,000,000, divided into 200,000 shares of which not more than 80,000 may be issued as "preferred," the rest to be "common." The directorate of the consolidated company up to the first Tuesday in October, 1881, is named in the instrument as follows: W. D. Washburn, H. T. Welles, J. K. Sidle, W. D. Hale, C. H. Pettit, A. H. Bode, W. W. McNair, R. J. Baldwin and M. P. Hawkins, all of Minneapolis, with W. D. Washburn president, A. H. Bode treasurer, and M. P. Hawkins secretary. The instrument is signed by W. D. Washburn and W. D. Hall, of the M. and St. L.; Isaac Atwater and W. D. Hall, of the M. and D.; John Martin and David Secor, of the M. and I. S., and John Martin and Isaac Garmol, of the Ft. D. and Ft. R.

Personal.

Percy Echols, a civil engineer, son of Gen. John Echols, of Staunton, Va., died in Ashland, Ky., last week, of typhoid fever.

Mr. Evarts has gone from Paris to London, where he will remain until the reassembling of the International Monetary Conference on June 30th.

F. C. Keefer has been elected president and Mr. Macklin, vice president of the Montreal and Vandreuil Railway Co., Canada.

William L. Burt has been elected President of the Boston, Hoosac Tunnel and Western Railway Company, vice Fred L. Ames, resigned.

M. Romero, formerly minister to the United States is to represent the Mexican Southern Railway Company in Mexico.

John W. Garrett, president of the Baltimore and Ohio Railroad Company, and Wm. H. Vanderbilt arrived in this city from Europe on the steamer Germanic last Saturday.

Joseph P. Brinton, of Philadelphia, has been elected President of the Richmond, Fredericksburg and Potomac Railroad Company in the place of Judge Robert Ould, resigned.

Henry W. Fuller, leaves the position of general Eastern passenger agent of the New York, Lake Erie and Western Railroad to assume charge of the passenger department of the Chesapeake and Ohio Railway, at Richmond, Va.

Col. Francis De Grey, president, and Frederick Broughton, general manager of the Great Western Railway of Canada were registered at the St. James Hotel, this city, Monday. Col. De Grey arrived on Monday from London by the steamer Gallia.

At the meeting of the board of directors of the Pacific Mail Steamship Company held last week J. B. Houston was elected president. The other officers hold over. It is expected that there will be no change in the management.

James Buckley has been appointed general Eastern passenger agent of the New York, Lake Erie and Western Railroad, with headquarters at 401 Broadway. Mr. Buckley has been ticket agent at the principal Erie ticket office in this city for the past sixteen years.

Colonel Thomas M. King, superintendent of the Allegheny Valley Railroad, has resigned to take charge of the Pittsburg Division of the Baltimore and Ohio Railroad, with headquarters in Pittsburg, the resignation taking effect June 1st. He is succeeded by C. B. Price, formerly private secretary to general superintendent McCargo.

E. H. Mott has been appointed to the management of the press department of the New York, Lake Erie and Western Railroad Company, succeeding John W. Romaine, recently appointed assistant emigrant agent of that company. Mr. Mott is well known in newspaper circles of this city and elsewhere, having been connected with prominent New York dailies, and has also had experience in the duties of his present position, previously in the office with Mr. Romaine.

Col. B. W. Spencer, treasurer of the New York, Lake Erie and Western Railroad Company, has been appointed Brigadier General and Inspector General of Rifle Practice on the military staff of Governor Ludlow, of New Jersey. J. W. Romaine, assistant emigrant agent of the same company has also been appointed an aide on Governor Ludlow's staff, with rank of Colonel.

Mr. N. F. Whiting, prominent amoung the financial writers of New York and who for several years has ably conducted the financial department of the Evening Post, tendered his resignation when the paper passed into new hands, thinking the new management might desire to make a change. He received in reply from Carl Schurz, the editor in chief, a cordial invitation to retain the position, and he is likely to remain on the paper to the general satisfaction of its financial readers.

Benjamin Thomas, for several years superintendent of the Delaware Division of the New York, Lake Erie and Western Railroad, has been promoted to the position of assistant general superintendent of that line, succeeding O. Chanute, who retires from the management. Mr. Thomas began his railroad career as telegraph operator at Narrowsburgh, N. Y., on the division of which he afterwards became superintendent, and has won his present position through his fine executive ability and close application. Charles Neilson, late fuel purchaser for the road, takes the position vacated by Mr. Thomas.

The Chicago Tribune says that J. D. Layng, who recently resigned as general manager of the Pennsylvania Company's line, is to take the position of general superintendent of the Chicago and Northwestern Railway, after July 1st, and adds: The office of general superintendent of this company has been vacant for some time. When Mr. Hughitt, now vice president and general manager, succeeded Mr. Porter as general manager, no successor was appointed, and the duties appertaining to the position were shared by the general manager and Mr. C. C. Wheeler, at that time the assistant general superintendent. About a year ago, however, Mr. Oliver, who had earned the esteem and confidence of the management by his superintendency of the Iowa lines, was promoted to the vacancy, but filled the office only a few months, when failing health forced him to a reluctant resignation. Mr. Layng has the ability, experience and judgment fitting him for the office."

Southern Pacific Railroad.

The Daily Stock Exchange, of San Francisco, learns from an official of the Southern Pacific Railroad Company, who is authorized by President Crocker to make it public, that Chief Engineer Montague with a party of surveyors will soon leave for Yuma to survey the line of road from that point to Point Isabel, at the head of the Gulf of California. The terminus of the road will be at Deepwater, on the Gulf, where wharves and warehouses are to be built and other shipping facilities established. When the road is ready for business, a line of fast steamers will be placed on the Gulf to run to Guaymas, Mazatlan and other Mexican ports. The road is expected to be in complete running order by the 1st of October.

Gen'l Rosser, Chief Engineer of the Canadian Pacific Railway, who has recently returned from the West, reports the location of the line to the 101st meridian beyond Grand Valley, and that trains will be running to the latter place by the 1st of August.

Northern Pacific Railroad.

Grading will commence on the Wisconsin Division of the Northern Pacific Railroad on June 5. Work is in progress on the branch from Fargo in a southwesterly direction, and the Casselton Branch is being extended. The grading of the eastern approach to the Bismarck bridge will begin next week; the masonry and superstructure work is proceeding vigorously. The Missouri Division was completed last fall to about forty two miles from the Yellowstone—track-laying is going on 1½ miles per day, and the Yellowstone will be reached at Glendine by the middle of June. Large forces of men and teams are at work on the Yellowstone Division, and Miles City, about eighty miles up the Yellowstone, will be reached by July 31. Four surveying parties are at work in the Rocky Mountains Division. Engineers are locating the line of the Clark's Fork Division, and grading has been commenced on the eastern end. The line around Lake Pend d'Oreille has been economically improved, and the graders are at work. The track has been laid 134 miles from Wallula on the Pend d'Oreille Division. On the Cascade Division in Washington Territory a more favorable line than heretofore reported has been found, and surveys are in progress between Kalenna and Portland on both sides of the river.

Railroad Law.

THE GERMANTOWN PASSENGER RAILWAY CO. VS. WALLING et al.

A street railway company has the right to carry passengers on the platforms, and if a passenger be injured while standing there, without objections by the company's agents, whether the injury was with his contributory negligence is for the jury to decide under all the facts and circumstances detailed in evidence.

Error to the Court of Common Pleas No. 2 of Philadelphia county.

Case, by Jane R. Walling and Joshua Clendenon, guardian of Grace May Walling, against The Germantown Passenger Railway Company, to recover damages for the loss sustained by the plaintiffs by the death of the husband and father, Bernard Walling, caused by being thrown from a car of defendants, by their alleged negligence, run over and killed. The facts were as follows:

Bernard Walling, a man in the prime of life, thirty-three years of age, who had been a fruit-grower in Kansas, but came to Philadelphia and obtained a concession to carry on the business of a restaurant on the Centennial grounds, was on his way to his business, and hailed the defendant's street car. The car stopped and accepted him as a passenger. He tried to get on the rear platform, but it was so crowded that he was unable to do so. He went to the front platform and took the only available place open to him, viz., on the step. He grasped firm hold of the iron guards upon each side of the step, and, thus supported, stood in a place perfectly safe under ordinary circumstances. The car then proceeded without incident until opposite the Foster Home on Girard avenue, when, being driven round a curve with great rapidity, and, at the same time, striking a defect in the track where the stones had worked out from under the rails, the passengers packed on the platform, by the sudden jolt and rapid motion round the curve, were thrown with great violence against Walling, breaking his right hand-hold, and themselves falling headlong into the street, one of them reaching the curb, which he struck with his head. Walling still held on with his left hand, but by the shock was thrown in front of the dasher, and, after being carried some distance, fell in front of the wheels, which passed over his chest and killed him instantly.

Verdict and judgment for plaintiffs for $5,000. Defendant took this writ.

Opinion by Turnkey, J. January 24, 1881.

At the outset the defendant (plaintiff in error) claims but two questions are presented in the assignments. 1. "Was Bernard Walling guilty of contributory negligence per se, so as to make it the duty of the court below to instruct the jury that he could not recover? and 2. Was the evidence of damage too vague under the requirements of the Act of April 4th, 1868, to justify a verdict for the plaintiff below?"

In fact, the second question is not raised in the record. As a general rule, where specific instructions were not requested by a proper point, and no exception to such as were given, there is no error for correction. Complaint is not now made of the charge respecting damages; the only errors alleged are the refusal of the defendant's points, and they were upon another branch of the case. Surely if the decedent's death, without fault in him, was caused by the defendant's default, the plaintiffs were entitled to recover.

In a charge of marked accuracy and fairness, the question of defendant's negligence and of the decedent's concurrent negligence were submitted to the jury. It is not pretended that the court could have refused to submit to them to decide whether the defendant was negligent, and, it is conceded, that fact is settled by the verdict. If it was the duty of the court to determine there was contributory negligence by the decedent, all the defendant's points should have been affirmed. This is the sole question now for consideration, the one first stated by the defendant.

The facts claimed to reveal want of due care in the decedent are not in dispute. "He voluntarily got upon a car so crowded that he was obliged to take a position on the step of the front platform of the car, occupied at the time by two other men, between whom he squeezed into a position, where, for the purpose of retaining his place, he was obliged to hold fast with one hand to the dasher and the other to the iron bar under the window of the car." So says the defendant. In addition, the car stopped and received him as a passenger. The driver testifies, he knew the car was so full a man could not go through to the back platform. Crowded as it was, the conductor says, there was room for more, both inside and on the rear platform. But Walling first tried to get on the rear platform, and falling, went to the front.

Conductor, driver and passengers acted as if there was room so long as a man could find a rest for his feet and a place to hold on with his hands. Nor was that action exceptionable. Notoriously, it was very common in 1876, and, perhaps, is not infrequent at this day. The companies do not consider such practice dangerous, for they knowingly suffer it, and are parties to it. Their cars stop for passengers when none but experienced conductors could see a footing inside or out. The risk in travelling at the rate of six miles an hour is not that when the rate is sixty, or even thirty. An act which would strike all minds as gross carelessness in a passenger on a train drawn by steam power might be prudent if done on a horse car. Rules prescribed for observance of passengers on steam railroads, which run their trains at great speed, are very different from those on street railways. In the absence of express rules, every passenger knows that what might be consistent, with safety on one would be extremely hazardous on the other. Street railway companies have all along considered their platforms a place of safety, and so have the public. Shall the court say, that riding on a platform is so dangerous, that one who pays for standing there can recover nothing for an injury arising from the company's default?

Musel vs. Lynn & Boston R. Co., 8 Allen (Mass.), 234, was a case like this in its facts. The court said: "It is well known that the highest speed of a railroad car is very moderate, and the driver easily controls it, and stops the car by means of his voice, his reins, and his brake. In turning around an angle from one street to another, passengers are not required to expect that he will drive at a rapid rate, but, on the contrary, might reasonably expect a careful driver to slacken his speed. The seats inside are not the only places where the managers expect passengers to remain; but it is notorious that they stop habitually to receive passengers to stand inside till the car is full, and then to stand on the platforms till they are full, and continue to stop and receive them even after there is no place to stand except on the steps of the platforms. Neither the officers of these corporations, nor the managers of the cars, nor the travelling public, seem to regard this practice as hazardous, nor does experience thus far seem to require that it should be restrained on account of its danger. There is, therefore, no basis upon which the court can decide upon the evidence reported that the plaintiff did not use ordinary care. It was a proper case to be submitted to the jury upon the special circumstances which appeared in evidence." These remarks are quite applicable to the case in hand.

Standing on the front platform of a horse car, when there is room inside, is not conclusive evidence that the person injured by the driver's default was not exercising due care: Maguire v. Middlesex R. Co., 115 Mass. 239. A street railway company has the right to carry passengers on the platforms, and if a passenger be injured while standing there, without objections by the company's agent, whether the injury was with his contributory negligence is for the jury to decide under all the facts and circumstances detailed in evidence: Bunn v. Bellefontaine & St. L. R. Co., 50 Mo. 139.

It has also been decided in other States, that if a passenger be injured while standing on the platform of a street or horse car, the question of his contributing negligence is one of fact for the jury.

So little danger exists in riding on the platforms, accidents to passengers while thus riding are so rare, that this is the first time the question

raised has been presented in Pennsylvania. We think the decisions in other States above referred to are sound. They accord with well settled principles. What is and what is not negligence in a particular case is generally a question for the jury, and not for the court. It is always a question for the jury when the measure of duty is ordinary and reasonable care. When the standard shifts with the circumstances of the case, it is in its very nature incapable of being determined as a matter of law. When both the duty and the measure of its performance are to be ascertained as facts, a jury alone can determine what is negligence, and whether it has been proved: West Chester & Phila. R. Co. v. McElwee, 17 P. F. S. 311.

It is the duty of courts in cases of clear negligence, arising from an obvious disregard of duty and safety, to determine it as a question of law. This principle was applied in the numerous cases cited by defendant. It should always be where the admitted facts, or the proofs adduced by a party, conclusively show his negligence.

The undisputed facts in this case show that the measure of duty on the part of the deceased was ordinary and reasonable care: and what that was, and whether he complied with it, could only be determined by the jury.

Judgment affirmed.

C. H. Gross and T. J. Barger, Esqs., for plaintiff in error.

Richard P. White, Esq., for defendant in error.

The Poughkeepsie Bridge.

In view of the approaching completion of the New York and New England Railroad through to the Hudson River, information as to the present status of the Poughkeepsie Bridge will be of interest. Efforts are being made in the New York Legislature to secure a charter for another bridge across the Hudson, some distance below Fishkill. In the course of the debate upon the bridge question in the Assembly, General Sharpe of Ulster, N. Y., gave the following information concerning the Poughkeepsie Bridge:

"The progress with the bridge at Poughkeepsie has been retarded by several adverse occurrences which it was impossible to foresee or to control. Finally the embarrassment of the constructing company, after the work had been begun and some $600,000 had been expended, caused an entire stoppage; and the difficulties arising out of it are not yet entirely cleared away. Nevertheless, important progress has been made. All the engineering difficulties have been met and overcome, not by calculation but by actual construction. The foundations of one pier have been carried down through fifty feet of water and fifty more of silt at the bottom of the river, to a solid resting place; and from thence the pier has been built up to a hight of twenty feet above the surface. The caisson for the second pier is in place and has been sunk nearly to the required depth; while a third pier is already in the course of construction. Since the stoppage of the work parties of financial strength have become interested in the enterprise and the arrangements necessary to a resumption of the work on such basis as to secure its certain and rapid progress until the end is reached are almost complete. Assurances are given by men of the highest character that the construction will be again begun early in the present season. It is expected to finish the piers during the summer and the superstructure next year, so that the whole will be ready for the cars within the time required by the charter of the Poughkeepsie company unless unforseen accidents in hostile legislation interfere."

In describing the connections for the bridge, Gen. Sharpe stated that—

"The Poughkeepsie, Hartford and Boston Railroad is now in operation from Poughkeepsie eastward to Hartford, and reaching all New England. The New York and New England Road is being finished to Hopewell Junction, in Dutchess county, and a company is also being formed, with a very strong financial backing, to construct a line connecting with the Boston and Albany and Massachusetts Central Roads at or near Westfield, Mass. On the West there are but ten miles to build to reach the Walkill Valley Road, connecting with the Erie at Goshen, and which has been for years in successful operation. Two separate companies have been organized to build not only these ten miles but further on directly to the coal field by different roads leading westward and south. One of these has expended a million and a half in construction; the other has the money and its contracts are made, ready to begin work as soon as that on the bridge is resumed. Neither of these routes presents any serious or unusual difficulty or obstacle; the grades will be easy and the cost will be light."

The "Inventor" of the Locomotive.

The saying that a prophet has no honor in his own country does not apply to George Stephenson; for Northumberland is foremost in making arrangements for celebrating, a couple of months hence, the centenary of the birth of the great engineer, who first saw the light in a humble dwelling in Street-house, in the Tyneside district. The county is very proud to have been the birthplace of the inventor of the locomotive, and it intends to commemorate the centenary in a way that will invest the proceedings with much interest. A chain of locomotives, representing the various stages of development of that wonderful machine, is to be linked together at the Central Station in Newcastle on-Tyne, and journey thence to Street-house. There is also to be a procession of all the trade societies and public bodies in the Tyneside district, including the miners' associations of Northumberland and Durham, and a great public demonstration on the Town Moor. The inevitable banquet will be held at Newcastle in the evening, when, we may venture to anticipate, ample justice will be done to the memory of the man who rose from the humblest position in a colliery to be a very prince among engineers.—[Liverpool Mercury.

A company has been organized to build a branch of the Brooklyn Underground Railroad (the main route of which is under Washington st., Fulton st., and Flatbush ave.) under Myrtle ave. from Fulton st. to Broadway. The capital is fixed at $1,000,000 and is held mainly by Myrtle ave. property owners. Dr. Fearn is president of the new enterprise, George Wilson secretary and and John Weidermier treasurer.

The Chicago, Milwaukee and St. Paul Railway Company have commenced operations for the construction of a railroad from Rockford, Ills., to Kankakee, via Mendota, Seneca and Braidwood, where the company recently purchased 4,000 acres of coal lands.

The contract for grading the Peoria and Farmington Railroad between Monmouth, Ill., and Keithsburg has just been let to Gen. F. C. Smith and John McFarland, of Galesburg. Work is to be begun by the 20th of June, and completed by October 1. The grading of the road between Peoria and Spoon River is being rapidly pushed to completion, and the iron will soon be laid.

Northern Central Railway.

The following is a comparative statement of the gross earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of April—

	1881.	1880.
Gross earnings.....	$487,272 85	$386,130 40
Operating expenses...	269,441 09	272,561 98
Net earnings.....	$217,831 76	$113,568 42

—showing an increase in earnings of $101,142 45, with a decrease in expenses of $3,120 89, making the increase in net earnings $104,263 34.

For the four months ending April 30, the gross earnings, operating expenses and net earnings were:

	1881.	1880.
Gross earnings.....	$1,708,992 55	$1,466,809 87
Operating expenses.	1,020,456 13	974,987 37
Net earnings...	$688,536 42	$491,822 50

—showing an increase in earnings of $242,182 68, with an increase in expenses of $45,468 76, making the increase in net earnings $196,713 92.

From the report of the receiver of the Ohio and Mississippi Railroad, filed in the Circuit Court in Cincinnati on the 18th of May, we learn that the receipts for the month of April (including $158,769 78 on hand at the commencement of the month) were $720,815 45, and the disbursements $641,692 20, leaving cash on hand May 1, 1881, $79,123 25. The disbursements were for: vouchers subsequent to November 17, 1876, $491,532 83; pay rolls, $148,765 27; arrearages, $1,394 10.

Passenger trains are now running on the Cincinnati Northern Railroad between Norwood and Lebanon, a distance of twenty-four miles. From Norwood to Cincinnati passengers use the Marietta and Cincinnati Railroad. It is expected that the portion from Norwood to Cincinnati will be completed in three months. Auxiliary engines specially built for the purpose will be used on the steep grade at the Cincinnati end of the road.

The Miners' Journal says that surveyors have arrived at Tamaqua, Schuylkill county, to survey the line between that point and Stroudsburg proposed by the New York, Lackawanna and Western's extension from the New Jersey Midland road, that the line will ultimately be extended to Pottsville, and tap other points of the Schuylkill region.

In the suit of Robert Law vs. the Chicago and Pacific Railroad Company and its Directors at Chicago, Judge Jameson, on the 28th ult. overruled the demurrer, holding that the lease of the road to the Chicago, Milwaukee and St. Paul Company was not valid—there being no authority for a domestic corporation to lease its road to foreign corporate bodies.

Twenty-five miles of the track of the International and Great Northern Railroad, south of San Antonio, Texas, were accepted by the railroad company on the 27th ult., and will be operated by them.

It is thought that trains will be running upon the new railroad between Haddonfield and Marlton, N. J., by the middle of June.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending May 21, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad, ..	125,319	3,202,956	3,058,728
Schuylkill Canal	11 052	84,524	141,499
Lehigh Valley	80 456	2,406,797	1,904,605
Del., Lack. & Western.	59,563	1,478,150	1,266,428
Shamokin Valley	16,185	381,782	306,122
Central New Jersey.	65,730	1,471,565	1,246,416
United R. R. of New Jersey	20,490	580,989	378,801
Pennsylvania Coal ..	22,226	412,540	347,067
Delaware and Hudson	47,496	1,265,497	1,157,866
Huntingdon & Broad Top Mt.....	7,208	166,028	198,136
Penn. and New York.	20,799	607,989	520,535
Clearfield, Pa.....	46,276	892,033	460,815

The total tonnage of anthracite coal from all the regions for the week ending May 21, as reported by the several carrying companies, amounted to 415,381 tons, against 395,975 tons in the corresponding week last year, an increase of 19,406 tons. The total amount of anthracite mined for the year is 9,448.814 tons, against 8,016.237 tons for the same period last year, an increase of 1,432,577 tons. The quantity of bituminous coal sent to market for the week amounted to 96,915 tons, against 94,138 tons in corresponding week last year, an increase of 2,777 tons. The total amount of bituminous mined for the year is 1,801,845 tons, against 1,455,770 tons for the corresponding period last year an increase of 346,075 tons. The total tonnage of all kinds of coal for the week is 512,296 tons, against 490,113 tons in corresponding week last year, an increase of 22,183 tons, and the total tonnage for the coal year is 11,250,659 tons, against 9,472,007 tons to same date last year, an increase of 1,778,652 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending May 21 was 154 034 tons, of which 106,356 tons were coal and 47 678 tons coke. The total tonnage for the year thus far has been 3,443,595 tons, of which 2,454,272 tons were coal and 989,323 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended May 21 were 46,561 tons, and for the year to that date 584.287 tons, a decrease of 67,222 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 26,044 tons; year, 529,077 tons; decrease as compared with 1880, 10,673 tons. Chesapeake and Ohio Canal—week, 16,757 tons; year, 91,737 tons; decrease as compared with 1880, 25,669 tons. Pennsylvania Railroad—week, 3,760 tons; year, 63.473 tons; decrease as compared with 1880, 30,880 tons. The Reading Railroad tonnage for last week, ending May 28, was 126,500 tons, of which 32,500 tons were sent to and 25,000 tons shipped from Port Richmond, and 12,000 tons sent to and 18,500 tons shipped from Elizabethport.—[Phila. Ledger, May 30.

The Pennsylvania Railroad Company have decided to issue a new four per cent loan amounting to $10,000,000, for the purpose of paying for the Philadelphia, Wilmington and Baltimore Railroad. The directors had been authorized to issue stock for the purchase money, amounting to $18,000,000, but thought it advisable to raise one-half that sum by loan. The form of the loan is a 4 per cent registered bond, running forty years from July 1, 1881. Every year $260,000 of the bonds will be drawn by lot, paid and cancelled. The Pennsylvania Railroad will deposit as collateral for the loan 200,000 shares of Philadelphia, Wilmington and Baltimore stock.

Ticket must be Demanded on the Train.

The Boston Herald says that a case of considerable interest to railroad conductors was recently tried in the Dorchester District Court, in which a man named Julian W. Bliss was complained of for evading fare on the Old Colony Railroad. The conductor asked him for his ticket twice after he had left the train and was on the platform of the depot. The facts of the case are as follows: Bliss, who represents himself to be a teacher of Greek and Latin, got upon the train leaving the Old Colony Depot, Boston, at 8 o'clock Wednesday evening, May 4, and, after riding a short distance, went into the saloon in the car, in which he remained until they arrived at Crescent avenue station, when he came out and got off the train and started to leave the premises, but was stopped by the conductor, who asked him for his ticket, and, after repeating his request for his ticket, informed Bliss that he should arrest him, at the same time placing his hand on Bliss's shoulder. Bliss jumped away and struck the conductor with a cane and then ran. In court Bliss said that he always paid his fare on the road. Associate Justice Fisher said that, as the conductor did not demand his ticket on the train, and as it was shown by the evidence that the man had purchased a ticket from Boston to Crescent avenue station, although he did not choose to show his certificate, or ticket, after leaving the train, he should find him not guilty and order him to be discharged.

The first regular train was run on the 26th ult. by the Quebec Central Railway from Levis to Sherbroke. Doubtless within a very short time connection will be made by this line at Sherbrooke or Lennoxville, which will very materially lessen the distance now traversed by rail between Quebec and New York.

The Galveston and Pacific Narrow-Gauge Railroad Company has been organized at Galveston, Texas, with a capital stock of $750,000. The route of the road will be from Galveston to Victoria, San Antonio and Camargo.

Forty miles additional track of the Texas and Pacific Railway were inspected and accepted on the 28th ult. The length of line now in operation extends 260 miles west of Fort Worth.

The Elizabeth City (N. C.) and Norfolk (Va.) Railroad was formally opened on the 26th ult. by an excursion of stockholders and guest from Norfolk.

William M. Wadley, President of the Central Railroad Company of Georgia, has leased the Port Royal Railroad, extending from Augusta, Ga., to Port Royal, S. C.

The Canadian Pacific Railway Syndicate have bought the line of steamers plying from Victoria to Puget Sound. The sum paid was $200,000.

It is stated that the gauge of the Northern (Canada) Railway will be changed over the whole line by the beginning of July.

It is stated that the Missouri Pacific Railroad will be built to the mouth of the Brazos river.

Philadelphia Stock Exchange.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, June 2, 1881.

Money on call at the opening was 2@3 per cent; prime mercantile paper, 3@4 per cent. In the afternoon the quotation for call loans was 3 per cent; and at the close 2½@3 per cent on stocks, and 2@2½ per cent on Governments.

The posted rates for prime bankers' sterling were 4.84@4.86; the actual rates, 4.83@½ and 4.85@½. Cable transfers were 4.85½@4.86. Prime commercial bills were 4.81½@4.82.

A mortgage was recorded on the 25th inst. from the Harlem River and Portchester Railroad Company to the Farmers' Loan and Trust Company to secure second mortgage bonds amounting to $1,000,000, which are about to be issued by the company. The bonds are payable in 1911, and will bear interest at 4 per cent.

There was an excess of exports of merchandize from the United States during the month of April, 1881, of $11,727,546, against $3,805,917 during April, 1880. The excess for the twelve months ending April 30, 1881, was $259,013,961, against $178,480,218 for the twelve months ending April 30, 1880. The excess of imports of gold and silver and bullion during the twelve months ending April 30, 1881, was $92,281,837, against $73,951,944 during the twelve months ending April 30, 1880.

The Governing Committee of the New York Stock Exchange have adopted a resolution to commence business on Monday mornings from June 6 to September 26, inclusive, at 11 o'clock instead of 10 o'clock, as usual.

The following securities have been admitted to dealings at the Board:

Chicago, Milwaukee and St. Paul Railway Company—$4,200,000 Chicago and Pacific Western Division 5 per cent mortgage bonds.

Chicago, St. Paul, Minneapolis and Omaha Railway Company—$3,392,000 consolidated mortgage bonds, Nos. 15,301 to 18,692 inclusive, in addition to those already listed.

International and Great Northern Railroad Company—As many of the $5,524,000 second mortgage income bonds as may be stamped "assented," in accordance with the scheme to replace them with second mortgage 6 per cent bonds.

Minneapolis and St. Louis Railroad Company—$500,000 second mortgage income 7 per cent bonds.

Milwaukee, Lake Shore and Western Railway Company—$500,000 income bonds, Nos. 1 to 500, and $3,000,000 first mortgage consolidated bonds Nos. 1 to 3,000. Both bear 6 per cent interest.

Missouri Pacific Railroad Company—Third mortgage 7 per cent bonds, $4,500,000. $672,000 have been exchanged for consolidated bonds, leaving outstanding $3,828,000.

Northern Pacific Railroad Company- Land grant general first mortgage sinking fund 6 per cent bonds to the amount and in place of the bond certificates now extant.

Norfolk and Western Railroad Company—$15,000,000 preferred stock, $11,000,000 6 per cent general mortgage bonds, and, when the engraved certificates are ready for use, $3,000,000 common stock. This company was organized May 8, 1881 as the successor of the Atlantic, Mississippi and Ohio Railroad, sold under foreclosure February 10th. The road has a mileage of 428 miles.

Pennsylvania Company—$10,000,000 first mortgage 4½ per cent gold bonds, guaranteed, principal and interest, by the Pennsylvania Railroad Company.

St. Louis, Alton and Terre Haute Railroad Company—$1,357,000 six per cent "Dividend Bonds," issued in full payment of all arrears of dividends accrued upon the preferred stock of the company up to January 1, 1881.

St. Louis, Iron Mountain and Southern Railway Company—$32,086,000 general consolidated railway and land grant 5 per cent mortgage bonds. This issue increased the bonded debt of the company only $2,000,000, the remainder being reserved to retire dividend bonds as they mature.

Public Debt of the United States.

The following is a recapitulation of the public debt statement issued on the 1st inst.:

INTEREST-BEARING DEBT.	
Bonds at 6 per cent	$196,378,600 00
Bonds at 5 per cent	439,841,350 00
Bonds at 4½ per cent	250,000,000 00
Bonds at 4 per cent	738,652,950 00
Refunding certificates	694,850 00
Navy pension fund	14,000,000 00
Principal	$1,639,567,750 00
Interest	17,109,666 28
DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.	
Principal	$10,600,005 26
Interest	737,292 72
DEBT BEARING NO INTEREST.	
Old demand and legal-tender notes	$346,741,646 00
Certificates of deposit	10,860,000 00
Gold and silver certificates	56,865,850 00
Fractional currency, ($15,485,036 92, less amount estimated lost or destroyed, $8,375,934)	7,109,102 92
Principal	$421,396,598 92
Unclaimed Pacific Railroad int.	6,746 51
TOTAL DEBT.	
Principal	$2,071,564,354 18
Interest	17,853,705 51
Total	$2,089,418,059 69
Total cash in the Treasury	236,496,088 18
DEBT LESS CASH IN THE TREASURY.	
June 1, 1881	$1,852,921,971 51
May 2, 1881	1,864,072,693 38
Decrease of debt during month	$11,150,721 87
Decrease of debt since June 30, 1880	89,250,323 88
CURRENT LIABILITIES.	
Interest due and unpaid	$2,451,043 66
Debt on which interest has ceased	10,600,005 26
Interest thereon	737,292 72
Gold and silver certificates	56,685,850 00
United States notes held for redemption of certificates of deposit	10,860,000 00
Cash balance available June 1	155,161,896 54
Total	$236,496,088 18
AVAILABLE ASSETS	
Cash in the Treasury	$236,496,088 18

Bonds issued to the Pacific Railway Companies, interest payable in lawful money.

Principal outstanding	$64,623,512 00
Interest accrued and not yet paid	1,615,587 80
Interest paid by the United States	49,528,566 66
Interest repaid by companies—	
By transportation service	14,256,338 85
By cash payments, 5 per cent earnings	655,198 87
Balance of interest paid by the United States	34,617,028 94

In the Court of Claims at Washington, on the 31st ult., in the case of the Pacific Mail Steamship Company against the United States, in which the Court had given judgment for the company for $40,000, both parties appealing, and the Supreme Court having sent back the case with a mandate, judgment was given for the company for $291,117 30. The suit was for money due on account of carrying the United States mails.

The gross earnings of the Philadelphia and Erie Railroad for the month of April were $293,322 97, the expenses $188,538 18, and the net earnings $104,784 84.

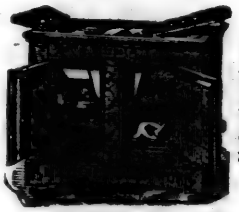
NEW ISSUE OF U. S. TREASURY NOTES

NOT COUNTERFEITED.



1s In centre is portrait of George Washington.
2s Portrait of Thomas Jefferson.
5s Portrait of Andrew Jackson.*
10s Portrait of Daniel Webster.*
20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

It is stated that the executive management of the Chicago and Northwestern Railway Company have decided to construct over 500 miles of new road the present season. This will comprise about 140 miles in Wisconsin, 250 miles in Iowa, 130 miles in Dakota Territory, and 86 miles in the Lake Superior region. With this additional road completed the Chicago and Northwestern Railway system will aggregate nearly 4,000 miles of track.

The grading on the Denver Western and Pacific Railroad is about completed between Denver, Col., and Longmont, and track laying has been commenced. Graders are now at work on the west of Longmont. The road will probably be in operation between Denver and Longmont by the 1st of September.

LELAND HOTEL, CHICAGO, ILL., FINEST location in the city, corner Michigan avenue and Jackson street; fronting on the beautiful lake and park; two blocks from the Custom House and Post-office. Newly furnished and reconstructed. American plan. Popular prices, $3 and $3 50 per day. WARREN F. LELAND, Proprietor, late of Delavan House, Albany.

This instrument is supplied with 12 different keys for 12 stations in or outside of the buildings. Invaluable for all concerns employing night watchmen.

SPECIAL NOTICE.—The "Imhaeuser" referred to by Buerk is the late firm of Imhaeuser & Co., consisting of three persons, and has nothing whatever to do with this firm of E. Imhauser.

Send for circulars to **E. IMHAUSER, 212 Broadway, New York.** P. O. Box, 2875.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

RAILROADS IN CHINA.

Concerning the effect which the peculiar superstitions of the Chinese have upon the introduction of the railroad into China, Rev. D. Bethune McCartee, who for thirty years was engaged in missionary work in that country and who now is in the Chinese diplomatic service, in an interview with a Sun reporter says:

"To understand the opposition of the Chinese to railroads, you must know something about their superstitions. In China, considerations of good and bad luck enter into every transaction in life. In their conception luck is a sort of material substance that can have a course like a wind or a stream. For instance, a house opposite the junction of a street with the street in which it stands is in an unlucky position. The bad luck that may happen to flow down the opposite street will run right into the house. In such a case a sign will be put up to keep the bad luck away, such as:

"The Stone of the Great Mountain is here.

"This refers to the sacred mountains worshipped by the high dignitaries of the Empire. It is not at all necessary that a piece of the stone of the sacred mountain shall be there, for the Chinese believe that you can humbug the bad luck by simply declaring that the stone is there. Sometimes they put a barrier to keep off streams of ill-luck. In front of every Mandarin's office there is a large wall called Pih Ho-Chang, which means 'the wall keeping off calamity.' Sometimes measures are taken to divest a stream of bad luck. I know of a house where a road came opposite the back door, and then bent around the house. It so happened that several cases of illness occurred in the house, and it was concluded that the trouble arose from a stream of ill luck pouring down the road into the back door. So they closed the door and made the road zig-zag so as to diminish the force of the stream.

"Good luck is supposed to flow in the same manner as bad luck. If a man's ancestors are buried in a good place, a stream of good luck flows down the family; if in a bad place, then a stream of bad luck descends. * * * *

"Now you can imagine how much trouble railroad building would cause in China; what innumerable streams of good luck it would cut off or streams of bad luck it would divert upon unfortunate people who had carefully put their houses out of the reach of such influences. The Chinese do not have cemeteries, and tombs are scattered in every direction through the country. Nowhere could a railroad be laid down without desecrating the tombs and lacerating the feelings of the people. When an English company built a railroad from Shanghai to Woosung—only fourteen miles—people stood on the track crying and beseeching so that it was sometimes necessary to stop the locomotive to put them off. The company never would have obtained a charter from the Chinese authorities had its intention been known. Their application was for permission to build a horse road, which was granted. The protests of the Chinese authorities were disregarded, and the company, sustained by Sir Francis Wade, the British Ambassador at Pekin, carried things with a high hand. There was no traffic for the road, and finally the company sold it to the Chinese Government for a good sum. The railroad was then taken up."

"The Viceroy of the Empire, Li Hung chang, is a very able, progressive man, and he is in favor of railroads. He has already a short railroad and telegraph line connecting the government arsenals. He is fully aware of the great advantages to be obtained from railroads. Such a state of affairs as that during the great famine, three years ago, when people were dying of hunger in the northern provinces, with plenty of rice in the southern, was calculated to display the necessity for means of transportation. They also have felt the need of railroads in military operations. The Chinese Government is progressive. It is building iron-clad vessels of war and introducing arms of precision among the soldiers. I think railroads will come in time, but they will be built by the Chinese themselves. The Chinese engineers will make detours to avoid a Fungshwui place just as our engineers make detours to avoid natural obstructions. The Chinese railroad may be a queer institution, but it will be adapted to their wants and conveniences."

THE FIRST AMERICAN RAILROAD IN JAPAN.

Consul General Van Buren of Japan, under date of January 7, 1881, states that the first railroad ever built in the East under the supervision of an accomplished American engineer, after American models and equipped with American engines and rolling stock—has just been completed on the island of Yesso, between Otaro on the seacoast, and Sapposo, the capital, a distance of twenty-three miles. This road, known as the 'Posonai Railroad of Hokaido,' was constructed under the able supervision of Joseph Crawford, an engineer well known in the United States, and was completed in so short time and at such a low figure as to excite the utmost admiration and approval of the government and people.

During the past few months the foreign newspapers, published in Yokohama, ridiculed the prediction that the road would be finished by the end of last year or at anything like as low a cost as $22,000 per mile. The actual fact is that it cost less than $20,000 a mile, including everything, and has now been running for several weeks, carrying from 400 to 500 passengers a trip, and doing a very large freight business. It is the intention to extend the road twenty-two miles further to the coal mines at Posonai. This is expected to be completed within two years. The cars contain the Miller platform and Westinghouse brake and every modern improvement, and are represented as very comfortable, and as running very smoothly.

This new enterprise, so successfully completed by Mr. Crawford, is likely to reawaken the public regard for railroads and enlist the co-operation of the government in the construction of extensive lines, which will prove of great benefit to the people. Nothing is so much wanted in Japan as good, efficient means of transportation, and it is gratifying to know that our countrymen are demonstrating the

practicability of building good railroads here in a short space of time and at a very low cost.

Mexico's Concessions to Gen. Grant.

The following concessions have been obtained from the Government of Mexico by Gen. Grant for his scheme:

1. The line is to start from the City of Mexico, passing by the cities of Puebla and Oaxaca and by Tehauntepec, and to take there the best route for the frontier of Mexico with Guatemala, one branch to come from Vera Cruz and Anton Lizardo and another to run to Huatulco. The company has a right to build a line of Tuxtla, Chiapas, San Cristobal and Comitan, in the State of Chiapas.

2. The surveys of the line are to begin within six months from the publication of the contract, and the work is to commence within six months from that date. During the second year the company is to build at least fifty kilometres of the road, one hundred kilometres during the third year, and one hundred and sixty kilometres during each of the seven succeeding years. The entire road is to be finished in ten years from the date of contract.

3. The road is to be built without subsidy, but the company will have the right of way and free importation of all articles needed for building during the construction of the road, and for fifteen years afterward. The road and its capital and accessories to be free from all classes of duties for twenty-five years after its completion.

4. The tariffs will be 14, 10 and 7 cents per ton of 2,000 English pounds and per each mile of merchandise at first, second and third class respectively, and 11, 6 and 5 cents per mile for each passenger by first, second and third class.

5. The road is to be the property of the company, who will manage it in its own way, beginning the work at any point and making the gauge to suit its purposes. The Government is not to have any other interference than that required by the general railroad laws of Mexico.

6. The tariffs can be raised to the point at which they will yield 10 per cent of the capital represented by the road, after deducting all expenses.

7. The company has full right to mortgage the road and issue stocks and bonds; but after the lapse of ninety years from the date of contract, the Mexican Government will have the right to purchase the road, paying in cash its actual value.

The project of tunnelling Mont Blanc bids fair to assume a tangible shape, it being pronounced by some of the most eminent French engineers a more practicable undertaking than that of the Simplon route. The estimates of cost for executing such a work are, in the case of the Simplon, $27,000,000, and in that of Mont Blanc some $12,000,000 less. It is furthermore claimed that the Mont Blanc tunnel will make the journey from Paris to Genoa some ninety-seven kilometres shorter, and from Paris to Milan forty-four kilometres shorter than by the Simplon route. The most favored line of the projected tunnel, thus far in the discussion, is from Chamounix to Courmayeur.

We understand that there has been a decision in the courts recently against a State license law, that is to say, the United States Supreme Court, in the case of Weber vs. the State of Virginia, decided that the law of that State imposing a special tax on agents of foreign manufacturers who come there to sell goods of foreign origin is unconstitutional. A Maryland law was several years ago decided to be unconstitutional for making a similar discrimination, but the law has since been revised, and a license would now be found necessary in that State. The text of the Virginia decision has not been published, and, therefore, it cannot be said how completely it opens the State to commercial travelers without license.

Bordentown Locomotive Works.

The extensive railroad shops along the river at the lower end of Bordentown, which have been lying idle for a number of years, are about to be put in operation again for the manufacture of locomotive engines on an extensive scale. The new company, which is styled the "Bordentown Locomotive Works," has a capital stock of $400,000, divided into 4,000 shares of $100 each, but the company will commence with a capital of $150,000. The ownership of the property is in the Pennsylvania Railroad Company and the new company has effected a lease for fifty years. The company has taken possession, and will at once proceed to fit it for operations. It is stated that orders for the constructions of 105 locomotives have already been received, to be completed within one year after the works are in complete operation; also that 12 orders for locomotives had to be refused, in consequence of inability to complete them within a specified time. Referring to the above, the Philadelphia Ledger says:

In the days of the old Camden and Amboy Railroad Company all the manufacture and repair work of the company was done at these shops, giving employment to a large number of hands, and tending to a large extent to make Bordentown one of the most flourishing towns on the Delaware. When the Pennsylvania Railroad Company came into possession of the road, it was found necessary to concentrate all their shops at Jersey City, the principal terminus of the road. The withdrawal of work from the Bordentown shops was a sad blow to the town, as they were about the only industrial enterprise within its limits, and from that time to the present it has languished. The reopening of the shops and the consequent employment of a large force of men, who will, of course, make themselves and families residents of the town and vicinity, will give the ancient village an impetus that will render its future an enviable one.

According to the monthly statement of the Comptroller, the debt of the city of New York on the last day of May was $133,770,970 89, not including $13,572,189 79 revenue bonds issued in anticipation of taxes. The amount in the sinking fund for the redemption of the debt was $34,802,601 09. The bonded debt of the annexed district, not included in the above statement, was $916,500. During the month of May the total amount drawn by warrants was $4,317,426 44 and $15,807,410 65, was drawn since the 1st of January. Thus far this year stocks and bonds have been issued to the amount of $10,775,545 21, including $271,000 for public works, street openings and improvements, $262,500 for docks and slips, $16,000 for the Brooklyn bridge, $76,000 for Croton Water-works, $20,245 21 for "expenses of proceedings, against public officers in the City of New York," and $10,014,800 for current expenses.

A first mortgage bond and trust deed of the Chicago, Texas and Mexican Central Railway Company, in favor of the Central Trust Company of New York, amounting in the aggregate to $10,600,000, was filed with the Secretary of State of Texas on the 1st inst.

International Telegraph Co.

Articles of association were filed at Albany, N. Y., on the 4th inst. of the International Telegraph Company. The capital will be $10,000,000. The route of the line is to be from New York, by way of Philadelphia, Baltimore and Washington, through the States of Virginia, North Carolina, South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana and Texas, to the Rio Grande River; also, from New York, by way of Albany and Rochester, to Buffalo; also, from New York, by way of the New York, Lake Erie and Western Railroad, to Buffalo, and thence west through Pennsylvania, Ohio, Michigan, Illinois and Indiana, to Chicago; also from Cincinnati through Mississippi, Arkansas and Texas, to Houston and Galveston; also from St. Louis through Missouri, Kansas, Colorado and New Mexico, to Mexico; also from Chicago west to California; also from New York to Portland, Me.; also from Boston to Montreal and Quebec. The shares are taken as follows: Andrew J. Baldwin, of Wilkesbarre, 50,000 shares; James F. Cox, of Morristown, 25,000, and Charles H. Stebbins, 25,000. The concern is to continue 100 years.

George M. Dallas, special master under the receivership of the Philadelphia and Reading Companies, has filed in the United States Circuit Court his report of the audit of the receivers for April. The account of the Railroad Company for that month shows receipts of $5,579,578 48. This included, however, a balance from the previous month of $518,099 40. After the payment of expenses and charges there remains a balance to be carried into the May account of $248,423 38. The Coal and Iron Company's account shows on the debit side of the cash account for the month a total of $1,143,553 73. After the payment of expenses there remains a balance on hand to be carried into the May account of $2,372 76.

The annual meeting of the stockholders of the Chesapeake and Ohio Canal was held at Annapolis, Md., on the 6th inst. The stock of the United States ($1,000,000) was represented by Lloyd Lowndes, of Cumberland, Md., and the stock of the State of Maryland ($20,000,000) by the Board of Public Works of the State. The report of the President, A. P. Gorman was read, and a resolution offered by Mr. Lowndes, providing for an enlargement of the locks of the canal in length and width, was adopted. Mr. Gorman, although asking to be relieved from his duties, was re-elected President by the Board of Public Works.

The engineers of the Lake Megantic Railway have made a preliminary survey of the route from the Lake to Greenville and from there to the Katabadin iron works; from St. John the survey is being continued to Mattawamkeag where it will strike the European and North American Railroad.

The Baltimore and Cumberland Valley Railroad will reach Chambersburg, Penn., about the 20th inst.

New York, Saturday, June 11, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THERE is encouragement to believe that the project for giving to New York the much needed underground railroad which has long been promised to the city, is about to be pushed with new vigor. The Governor has signed a bill by which the New York City Underground Railway Company is given an extension of time of three years for completing the road.

THE HOOSAC TUNNEL route between Boston and the West has drawn to itself a large and rapidly increasing freight traffic, and is now offering many attractions in the way of desirable connections, through cars and liberal conveniences which will turn a large amount of passenger traffic Hoosac Tunnelward this season. Through sleeping cars are now sent from Chicago to Boston over the Michigan Central, Canada Southern, New York Central and Fitchburg Railroads, running via the Niagara Branch of the Canada Southern Railroad, crossing the Niagara river at Suspension Bridge.

REPORTS of foreign trade for the months of January, February, March and April show that as compared with the corresponding months of last year the value of our imports has declined several millions, while the volume of our exports remains about the same. During the ten months of the fiscal year ending with April, our exports of merchandise exceeded our imports by something over $246,000,000, while for the corresponding period of the previous year the excess was about $155,000,000. With our large supply of products and the probabilities of a continued large demand for them abroad there appears to be no reason why the balance of trade should not hold for some time to come its present favorable position for American commercial and financial interests.

THE intrest manifested in Boston in the plan for holding a World's Fair there in 1885 is but a natural accompaniment to the increased activity in commercial and shipping enterprises which has been so conspicuously manifested in that city during the past two years. Her somewhat secluded character has been thrust aside by the stimulus to commercial achievements, which Boston has experienced in an unprecedented degree through the starting of new steamship lines and the greatly improved railroad connections with the West, and she stands as never before ready to assume the position of commercial importance of which these shipping acquirements give rich promise. There are many reasons why a Worlds' Fair should be most successfully carried out in Boston, chief among them, in addition to the enterprise of transportation lines terminating there, being the fact that no other city on the continent could so fully draw out exhibits of the innumerable products of New Englands' far famed inventive and manufacturing skill ; and New England manufacturers if they once took the matter up in earnest would recognize no possibility of failure.

THIS week the purchase by the Pennsylvania Railroad Company of a controlling interest in the Philadelphia, Wilmington and Baltimore Railroad was consummated by the payment of the purchase money, and transfer of the shares. The stock purchased was in two certificates, one of 187,303 and the other of 21,116 shares ; the price paid was $80 per share, including the July dividend. The transaction amounted to over $16,000,000, of which about $1,000,000 goes to stockholders in Philadelphia and the remainder, about $15,000,000, was deposited in the National Bank of Commerce in this city, to be distributed among 2,700 stockholders, chiefly in Boston. Subscriptions to the allotment of new stock authorized at the last annual meeting of the Pennsylvania Railroad Company, together with recent heavy earnings and the surplus on hand June 1, furnished the necessary funds. Besides the shares mentioned, the Pennsylvania Railroad Company has distributed since June 1 $2,500,000 among its stockholders in dividends. The payment had been arranged for July, and though it has been anticipated by about twenty days the Pennsylvania Railroad Company will not take possession of its newly acquired property until July 1, after which date the two roads will be operated under the same general management, the Philadelphia, Wilmington and Baltimore Railroad being brought under the Pennsylvania system as a separate Division.

Personal.

J. B. Crosby, President of the South Boston Railroad, has gone to Europe on a five months trip.

General John B. Gordon has been elected President of the Georgia Pacific Railroad Company.

The Cotton Exchange has elected as President Robt. Tannahill; Vice President, Joseph Yeoman, and Treasurer, Walter T. Miller.

The Produce Exchange has elected the following officers : President, Forrest H. Parker; Vice President, J. H. Herrick; Treasurer, Samuel Jacoby.

C. S Colby, has been elected President and Treasurer, E. H. Abbott Vice President and Secretary, and F. N. Finney General Manager of the Wisconsin and Minnesota Railroad Company.

Frederick L. Ames has been elected a trustee of the first mortgage of the Union Pacific Railroad Company, to fill the vacancy caused by the death of his father, the late Oakes Ames.

P. M. Meyer, formerly General Manager of the Southern Minnesota line, has been appointed Secretary of the Chicago, Milwaukee and St. Paul Railway Company, in place of R. D. Jennings.

In the will of the late Col. Scott it was expressly stated that no inventory or account shall be filed in any public office, and, therefore, the exact magnitude of his fortune and the character of the investments will be known only to his immediate family.

The eight trustees of the East River Bridge who will represent Brooklyn for the two years ending June 2, 1883, are : Henry C. Murphy, J. S. T. Stranahan, William Marshall, W. C. Kingsley, H. W. Slocum, A. C. Barnes, Alden S. Swan and Otto Witte.

F. H. Kingsbury has been elected Treasurer of the Cheshire Railroad company, with duties commencing June 1, when the office was removed to Keene. The office of cashier has been abolished and its duties transferred to the Treasurer. Transfers of stock will hereafter be made at Keene.

Ex-Mayor Stokley, of Philadelphia, has been elected President of the " Atlantic and Gulf Coast Canal and Okeechobee Land Company." This company proposes to reclaim a large section of Southern Florida, generally called the " Everglades," by draining the swamps. The scheme involves the construction of a canal about 300 miles in length.

O. W. Smith, General Manager of the Chesapeake and Ohio Railway, has made the following appointments, taking effect on the 5th inst : W. M. S. Dunn, General Superintendent; B. S. Fitch, General Freight Agent; H. W. Fuller, General Ticket and Passenger Agent; John McFarland, Superintendent of motive power; W. H. Lowry, Auditor of disbursements; K. H. Fisher, Auditor of revenue; R. B. Weisiger, General Bookkeeper; John Garrett, Cashier.

A young gentleman who has had a valuable experience in both the freight and passenger departments of one of the most important stations on the leading transcontinental line, from which he has the highest recommendations, desires to obtain a position on an Eastern railroad. Full particulars concerning his qualifications, reason for changing, references, etc., can be obtained by addressing the editor or calling at the office of the AMERICAN RAILROAD JOURNAL.

William C. Young, who surveyed the line of the West Stockbridge and Albany Railroad, in 1858, and after much similar service on the Saratoga, Schenectady, Utica, Hudson River, and other lines, became President of the Panama Railroad Company in 1832, is to attend the coming meeting of the West Point alumni. He graduated at West Point in 1822, served a few years in the army and then became a railroad engineer in the earliest days of railroading. He is about eighty years of age and will be well remembered among the railroad pioneers now living. Another veteran railroad man and soldier is Andrew Talcott, over eighty years old, who is also a graduate of West Point and will attend the meeting with Mr. Young. Mr. Talcott graduated in 1818, served eighteen years in the army and then resigned to become a railroad engineer. Among the important works in which he was interested was the improvement of the delta of the Mississippi river.

Organization.

Articles of incorporation have been filed at Madison, Wis., of the Chippewa Falls and Minneapolis Railroad Company. The road is to be built as soon as possible from Chippewa Falls, Wis., to Minneapolis.

The State Department at Harrisburg, Penn., has granted a charter to the Water Gap and Schuylkill Railroad Company, of which Henry Whealen, of Philadelphia, is president. The new company has a capital of $3 000,000, and runs from Pottsville through Schuylkill, Carbon and Monroe counties, to the Water Gap, a distance of sixty-five miles.

At the annual meeting of the Canada Southern Railway Company held at St. Thomas, Ontario, on the 1st inst, the following named gentlemen were elected directors for the ensuing year: William H. Vanderbilt, Cornelius Vanderbilt, James Tillinghast, Augustus Schell, Samuel F. Barger, Sidney Dillon, Edward A. Wickes, A. G. Dulman, and Joseph E. Brown.

The directors of the United Railroad and Canal Companies of New Jersey, elected on the 31st ult., are: John Jacob Astor, John C. Barron, William Bucknell, A. L. Dennis, Charles E. Green, Robert Lenox Kennedy, Thomas McKean, Isaac W. Scudder John T. Stevens, R. F. Stockton, Ashbel Welch and Samuel Welsh.

The directors of the Tuckerton, N. J., Railroad Company, elected on the 2d inst., are: A. R. Pharo Rutherford Stuyvesant, Samuel Ashurst, H. A. Drake, W. W. Pharo, T. C. Price, John W. Russell, Charles T. Parry, and Richard Ashurst. The officers are: President, A. R. Pharo; vice-president, Rutherford Stuyvesant; treasurer, Richard Ashurst; secretary, T. C. Price.

The directors of the Baltimore and Potomac Railroad Company, elected at the annual meeting of the stockholders held in Baltimore on the 1st inst., are: George B. Roberts A. J. Cassatt, George Small, B. F. Newcomer, W. T. Walters, Dr. E. J. Henkle, Sam'l Cox, Jr. The officers are: Hon. Oden Bowie, president; A. J. Cassatt, vice-president; J. S. Leib, treasurer; John Crowe, secretary and auditor.

At the annual meeting of the stockholders of the Chicago, St. Paul, Minneapolis and Omaha Railroad, held at Hudson, Wis., on the 4th inst., H. H. Porter, David Dows, R. B. Cable, H. R. Bishop and John Comstock were elected directors for three years. The officers chosen were H. H. Porter, president; Philetus Sawyer, vice president; R. P. Flower, Treasurer, and C. W. Porter, Secretary.

The Southern Car Works Company was organized at Knoxville, Tenn., on the 3d inst. with a capital stock of $100,000. George W. Colwell. Robert L. Lott, Reuben Z. Roberts, of Michigan, and W. R. Tuttle and A. L. Maxwell, of Knoxville, were elected directors. The works will be in operation in sixty days and will employ 200 mechanics. The company already has orders for a year's work.

The directors of the Nashua and Rochester Railroad Company, recently elected, are: J. C. Eastman, of Hempstead; Francis H. Dewey, E. B. Stoddard, Charles W. Smith, Charles W. Turner and F. H. Kinnicutt, of Worcester; Aaron W. Sawyer, A. H Dunlap, Benjamin Fletcher, jr., of Nashua; Joseph C. Burley, of Epping; Edwin Wallace, of Rochester; E. W. Hoyt, of Epping, and A. J. Pillsbury, of Northwood. Francis H. Kinnicutt was chosen president.

A certificate of incorporation was filed with the Secretary of State of California on the 24th ult., of the California Southern Extension Railroad Company, to operate a railroad from near San Bernardino to intersect the line of the Atlantic and Pacific Railroad Company, some 60 miles. Directors—H. B. Williams, Wm. G. Cohen, Len Tasheira, Wm. H. Dimond and N. P. Cole. Place of business, San Francisco. Capital stock, $1,500,000, in 15,000 shares. Actually subscribed, $60,000.

Articles of association of the Anderson and Shelbyville Railroad Co. have been filed with the Secretary of State of Indiana—capital stock $400,000, distance forty miles—with B. F. Aimen Colonel Parker, Clinton E. Spencer, E. O. Chapman, Joseph Scofield, S. W. Hutton, and others, as directors. The road is expected to be completed this year, and in connection with the Jeffersonville, Madison and Indianapolis Railroad will make a direct line to Louisville and the South.

The stockholders of the Vermont and Massachusetts Railroad Company have elected the following board of directors for the ensuing year: Daniel S. Richardson, of Lowell; William H. Hill, of Brookline; James A. Dupee, of Winchester; Francis Goodhue, of Brattleborough, Vt.; George F. Fay, of Fitchburg; Thornton K. Ware, of Fitchburg, and Edward L. Davis, of Worcester. The officers are: Daniel S. Richardson president, F. N. Poor treasurer and B. D. Locke clerk.

At the annual meeting of the stockholders of the Chicago, Rock Island and Pacific Railway Co., held at Chicago on the 1st inst., James R. Cowing, Francis H. Tows, Jay Gould and Henry H. Porter were elected directors. After the adjournment of the stockholders' meeting the board of directors met and elected the following officers: President, Hugh Riddle, Chicago; vice-presidents, David Dows, New York, and R. R. Cable, Rock Island; secretary, and treasurer, F. H. Tows, New York; executive committee, Hugh Riddle, David Dows, R. R. Cable, R. P. Flower, F. H. Tows.

The Mobile and South Gulf Railway Company has completed its organization and received its charter under the laws of Alabama. The directors are: W. R. McKeen, Josephus Collett and D. W. Minshall, of Terre Haute; Duncan T. Parker, Gen. J. W. Burke, of Mobile; J. H. Woodard and Morris M. Defrees, of Indianapolis. The board elected J. A. Woodard, president, M. M. Defrees superintendent and engineer, and A. G. Cox, Auditor. Mr. Defrees is pushing the surveys ahead, and will be ready for grading within three weeks. The road will be twenty-five miles long, and will connect with deep water in the lower bay.

The directors of the St. Paul and Sioux City Railroad Company, elected at the annual meeting of the stockholders held at St. Paul, Minn., on the 4th inst., are: H. H. Porter, E. F. Drake, H. Merriam, Augustus Kountze, C. A. Bigelow, A. H. Wilder, J. Q. Adams, George I. Seney, R. P. Flower, R. H. Bishop, J. M. Fiske, S. R. Coble, P. Sawyer, Benjamin Brewster and David Dows. The directors elected H. H. Porter, president; R. P. Flower, treasurer, R. Edgerton, assistant treasurer, and E. I. Hamilton, secretary. H. H. Porter, E. F. Drake, R. P. Flower, R. H. Bishop, Benjamin Brewster, David Dows and Philetus Sawyer were elected an executive committee.

The reorganization of the Texas Western Narrow-Gauge Railway Company was perfected on the 2d inst., and the road was formally transferred to the new management. At a meeting of the stockholders on the same day the following directors were elected: Gen. U. S. Grant, H. Victor Newcomb, John Bailey, Col. Frederick D. Grant, Josiah C. Reiff, A. M. Gentry, W. D. Cleveland, S. K. McIlhenney, and J. C. Tracey. President, U. S. Grant; secretary, J. G. Tracey; executive committee, U. S. Grant, H. Victor Newcomb, and Josiah C. Reiff. Active operations will begin at once in connection with the construction of the road to the Rio Grande.

At the annual meeting of the Chicago and Northwestern Railway Company, held in Chicago on the 2d inst., the following board of directors was elected: William L. Scott, Jay Gould, R. P. Flower, Anson Stager, and Frederick Vanderbilt, the two latter in place of Frank Work and D. P. Morgan. At the directors' meeting the following officers were elected: President, Albert Keep; vice-president, treasurer, and secretary, M. L. Sykes; second vice-president, Marvin Hughitt; assistant secretary and treasurer in New York, P. O. Howe; executive committee, Albert Keep, Augustus Schell, A. G. Dulman, William L. Scott, Samuel A. Barger, C. M. Depew, and D. O. Mills.

At the annual meeting of the New York Central and Hudson River Railroad Company held at Albany, N. Y., on the 1st inst., the following directors were chosen: W. H. Vanderbilt, Cornelius Vanderbilt, William K. Vanderbilt, Frederick W. Vanderbilt, Augustus Schell, Samuel F. Barger, Chauncey M. Depew, James H. Rutter, J. Pierrepont Morgan, Cyrus W. Field, New York; Chester W. Chapin, Springfield, Mass; John Allen, Jr., Buffalo; James M. Marvin, Saratoga Springs. The following gentlemen were elected inspectors of election: Sidney T. Fairchild, of Canenovia; Henry Roseboom, of Roseboom; and Francis S. Pruyn, of Albany. About $65,000,000 of stock were voted on, out of a capital of $89,428,330.

The directors of the Canada Atlantic Railway Company, recently elected, are: Hon. D. A. Macdonald, E. McGillivray, G. B. Pattee, McLeod Stewart, Archibald McNab, Peter Kennedy, James Fraser, John Rankin, Guy C. Noble and R. S. Macdonald. The directors elected E. McGillivray president, Archibald McNab vice-president, and Edward H. Tiffany secretary treasurer and solicitor. The report of the past directors showed fair progress made on the road, and the contractor expects to have cars running to Alexandria in September, and to the High Falls on the Nation on the 1st of January next. The whole of the steel rails were purchased in England, and are on the way to Canada, and will be taken to Coteau Landing by the Grand Trunk Railway.

A new railroad corporation was commissioned by the Governor of Wisconsin on the 2d inst. The incorporators are E. W. Winter, of St. Paul; C. W. Porter, W. H. Phelps, C. L. Catlin and J. C. Spooner, of Hudson, with a capital stock of $210,000. The line proposed to be built is from Eau Claire to Chippewa Falls on the west side of Chippewa River and will compete with the Wisconsin and Minnesota Division of the Wisconsin Central Railway for the immense trade of the mills and drives at or near these

cities. Three of the incorporators are officers of the Chicago, St. Paul, Minneapolis and Omaha Company, and the new line will undoubtedly become part of their system. It is understood that the ultimate intension is to push the road northwards from Chippewa Falls to a junction with the North Wisconsin in Ashland or Bayfield County.

The stockholders of the proposed Cleveland, Youngstown and Pittsburg Narrow-Gauge Railway Company met in Cleveland, O., on the 1st inst., and elected the following directors: H. W. Ford, Thomas T. Buckley, George W. Ballow, F. J. Mather, W. R. Bergholz, of New York; W. A. Lynch, of Canton; W. E. Lewis and Finlay Barber, of Alliance. The board organized by choosing the following officers: President, H. W. Ford; vice-president, W. R. Bergholtz; treasurer, Thomas T. Buckley; secretary, F. J. Mather; executive committee, Thomas T. Buckley, George W. Ballow, W. R. Bergholtz. Following the tracks of the Connotton Valley Railway, which is now being built towards Cleveland, the new line will branch from Connotton at Twinsburg, twenty miles southeast of Cleveland. From that point the precise route of the road has not been decided upon.

Articles of incorporation were filed in the office of the Secretary of State at Springfield, Illinois, on the 31st ult., of the St. Louis, Belleville and Centralia Railroad Company, with a capital of $1,000,000. The incorporators are Adolphus Meier, Joseph W. Branch and Charles Parsons, of St. Louis; Marshal W. Wier, Felix Scott, Thomas Knabelesh, John Klaess and Russell Hinkley, of Belleville, and H. W. Hubbard, of Centralia. The principal office is to be in Belleville, and the purpose is to build a railroad to Centralia, Marion County. Wm. F. Whitehouse, Lorenzo M. Johnson, S. Corning Judd, Edwin B. Sheldon, Henry B. Whitehouse, James M. Hills and Eugene H. Fishburn, of Chicago; Casper William Schaap, of Louisville, Ky., and John B. Lovington, of East St. Louis, were authorized to organize the St. Louis and Cairo Railroad Company, with the principal office in Chicago and a capital of $6,500,000. This company takes what was formerly the Cairo and St. Louis Narrow-Gauge Railroad.

The stockholders of the Baltimore and Drum Point Railroad Co., at their meeting in Baltimore on the 1st inst., elected the following directors: Augustus Albert, Dr. James A. Steuart, Wm. H. Bians, Baltimore; Dr. Benjamin King, Thomas S. Iglehart, John G. Butler, Anne Arundel county; H. E. Morton, Henry Owings of S. Calvert county; Andrew Banks, Baltimore county; Jos. R. Swan, Jr., Samuel Remington, P. V. Rogers, New York. The directors elected officers as follows: President, Augustus Albert, of Baltimore; treasurer, Andrew Banks, of Baltimore county; secretary, John G. Butler, of Anne Arundel county. Mr. N. Goldsborough, chief engineer of the road, is now locating the line between Baltimore and Annapolis and preparing for its construction. The engineers are also locating the road between Furnace and Marley creeks, starting from Baltimore, and as far as they have gone are ready for work. It is expected that the road will be finished to Annapolis Railroad by next January, and the whole line completed in two years.

Articles of association were filed with the Secretary of State of Missouri on the 30th ult., of the Kansas City, St. Joseph and Burlington Railway Co. Capital, $3,000,000. The incorporators are: Elijah Smith, Prosper W. Smith, Wm. Endicott, Jr., Hales W. Suter, Isaac T. Burr, Thomas Nickerson, James W. Potter, Boston. Henry Savies, Bar Harbor, Me., W. J. Rotch, New Bedford, Mass., W. W. Crapo, New Bedford, Mass., Moses Taylor, New York, S. A. Kent, and J. B. Lyon, Chicago, Ill., and John W. Smith, Burlington, Io. The objects are to own, construct and maintain a line of railway, beginning at a point on the line between Iowa and Missouri, near Mendota, Putnam county, extending thence southwardly to Unionville, in said county; thence west through Putnam, Mercer, Harrison, Gentry, DeKalb and Buchanan, to St. Joseph, a distance of 141.4 miles; embracing the entire main line of railway in Missouri heretofore owned by the Burlington and Southwestern Railway Company, of which that portion lying between Mendota and Unionville, a distance of 11.4 miles, is now completed and in operation; and also to own, construct, maintain and operate a line of railway beginning at or near Unionville and running southwesterly through the counties of Putnam, Sullivan, Linn and Carroll to Carrollton, thence to the Missouri river at a point at or east of Lexington, Lafayette county, thence to such point in South Missouri as may hereafter be determined, embracing the entire branch line of railway heretofore owned by said Burlington and Southwestern Railway Company and known as the Linneus branch of the Burlington and Southwestern Railway, of which that portion lying between Unionville and Laclede, Linn county, a distance of 53 miles, is now completed and in operation, the remaining distance between Laclede and Lexington being 60 miles. The amount of tax on the capital stock paid into the State treasury was $1,525.

Railroad Earnings.

The earnings of the Central Pacific Railroad for May, 1881, were $2,068,000 as compared with $1,778,487 for May 1880. For the first five months of this year the earnings were, $8,708,763; corresponding period last year $6,779,743.

The earnings of the St. Paul, Minneapolis and Manitoba Railway for the four months ending May 31, were $382,642 39, corresponding period last year, $281,899 57; from Jan. 1 to May 31, $1,542,959 52, corresponding period 1880, $1,194.594 67.

The earnings of the Denver and Rio Grande Railway for the fourth week of May, were $165,700, corresponding week last year $65,432; for month of May, $514,767, May, 1880, $191.695. Miles now operated, 690, operated last year, 422.

The earnings of the Flint and Pere Marquette Railroad from Jan. 1 to May 31, were $744,078 25, corresponding period 1880, $631,739 30; for week ending May 31, $19,603 70, corresponding week last year $35,350 50.

The aggregate increase of earnings of the Great Western Railway of Canada from Jan. 1 to May 27, over corresponding period last year was, $188,169; earnings for week ending May 27, $103,109, last year, $96,745.

The earnings of the Chicago and Grand Trunk Railway for week ending May 28 were $31,127, corresponding week last year $39,132; aggregate increase for 16 weeks this year, over corresponding period last year, $98,155.

Manufacturing.

The Canadian Locomotive and Engine Works Company are to erect a two story building 324 feet long by 60 feet wide, in Kingston, Canada. A large quantity of new machinery is said to have been ordered, some of it from Canadian and United States works and some from England, and orders for locomotives sufficient to keep the works running to their full capacity for six months are reported.

D. N. Beardsley & Co., wholesale dealers in sawed oak, chestnut lumber, etc., whose office is at 9 Murray street, this city, have been forced by their growing business to acquire increased facilities in New England for production and have purchased recently new territory and saw mills. The Wason Car Manufacturing Company of Brightwood, Mass., and the New York, New Haven and Hartford Railroad Company have given the firm very large orders recently, with assurance of duplicate contracts as fast as Messrs. Beardsley & Co. can supply the materials.

The Eames Vacuum Brake Company have recently published a very handsome catalogue of their widely known brake. It contains full descriptions of their brake, ejector and various attachments and equipments for rolling stock, with plates illustrating in detail each part of their mechanism and workings; in addition it gives much valuable information concerning the general principles of the most approved methods of operating brakes. The catalogue can be obtained of Thomas Prosser & Son at the sales office in this city, 15 Gold Street. The Eames Vacuum Brake is now in use on over seventy railroads.

Baltimore and Potomac Railroad.

At the annual meeting of the stockholders of the Baltimore and Potomac Railroad Company, held in Baltimore on the 1st inst., the report of the directors was presented showing that the gross earnings from all sources were $790,147 37, of which the Washington line and tunnel were $748,460 39, and the Pope's Creek line $41,686 98, an increase as compared with 1879, on the Washington line of $90,875 32, and on the Pope's Creek line of $3,108 42. The total expenses were $632,663 19, of which the Washington line were $571,137 57, and the Pope's Creek line $61,525 62. The net earnings were for the Washington line $177,822 82; the loss on the Pope's Creek line was $19,838 64, making the entire net earnings $157,484 18. There were expended in constructing the double track at both Baltimore and Washington ends $55,551 47. The cost of movement per passenger per mile on the Washington line was 2,797 cents, and on the Pope's Creek line 5,707 cents. The average was 2,898 cents, an increase of 0.160 cents per mile over 1879. The cost of movement of freight per ton per mile on the Washington line was 1.749 cents, and on the Pope's Creek line 5,754 cents. The average cost 1.977 cents was an increase of 0.046 cents per ton per mile over 1879. During the year 542 tons of steel rails were laid on the Washington line, and 46,435 new cross-ties on the two lines. The trestle bridge over the Patapsco has been renewed with iron, and the Eastern Branch bridge, near Washington thoroughly rebuilt. A tribute is paid to the late Col. Thos. A. Scott. The report says that without him the Baltimore and Potomac Railroad might not have been. He was the first to see the benefits which would accrue from it to the Pennsylvania Railroad Company, to impress them upon his associates and to seize upon the opportunity for forming an important northern and southern connection for that road.

The division of the Pennsylvania Railroad from Philadelphia to New York, over which probably more passengers travel than any other section in the country, has been singularly free from serious accidents. The recent accident by an open switch was the first serious one this line has had for years. During the Centennial travel not a life was lost on this road.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending May 28, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	128,065	3,331,022	3,172,948
Schuylkill Canal....	12,670	97,194	149,776
Lehigh Valley.....	85 013	2,491,810	1,980,970
Del., Lack. & Western.	60,401	1,538,552	1,320,937

Penn. and New York.	27,654	636,643	539,106
Clearfield, Pa.....	46,952	938,995	493,900

The total tonnage of anthracite coal from all the regions for the week ending May 28, as reported by the several carrying companies, amounted to 418,153 tons, against 383,047 tons in the corresponding week last year, an increase of 35,106 tons. The total amount of anthracite mined for the year is 9,923,101 tons, against 8,444,862 tons for the same period last year, an increase of 1,478,239 tons. The quantity of bituminous coal sent to market for the week amounted to 101,141 tons, against 93,245 tons in corresponding week last year, an increase of 7,896 tons. The total amount of bituminous mined for the year is 1,902,986 tons, against 1,549,015 tons for the corresponding period last year an increase of 353,971 tons. The total tonnage of all kinds of coal for the week is 519,294 tons, against 476,292 tons in corresponding week last year, an increase of 43,002 tons, and the total tonnage for the coal year is 11,826,087 tons, against 9,993,877 tons to same date last year, an increase of 1,832,210 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending May 28 was 164 230 tons, of which 114,231 tons were coal and 49,999 tons coke. The total tonnage for the year thus far has been 3,607,825 tons, of which 2,568,503 tons were coal and 1,039,322 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended May 28 were 44,490 tons, and for the year to that date 728,947 tons, a decrease of 73,272 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 24,225 tons; year, 553,302 tons; decrease as compared with 1880, 7,930 tons. Chesapeake and Ohio Canal—week, 13,820 tons; year, 105,713 tons; decrease as compared with 1880, 37,095 tons. Pennsylvania Railroad—week, 6,403 tons; year, 69 875 tons; decrease as compared with 1880, 28,269 tons. Shipments by new George's Creek and Cumberland Railroad are first reported this week. Coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 41,417 tons; year, 695,067 tons. Baltimore and Ohio Railroad—week, 17 tons; year, 28t971 tons. George's Creek and Cumberland Railroad—week, 2,805 tons; year, 3,004 tons. The Reading Railroad tonnage for last week, ending June 4, was 196,500 tons, of which 60,500 tons were sent to and 36,000 tons shipped from Port Richmond, and 9,800 tons sent to and 3,700 tons shipped from Elizabethport.—[Phila. Ledger, June 6.

The track of the International and Great Northern Railway is now extended 32 miles southwest of San Antonio, and about a mile from Chican, Medina County. The track-laying is proceeding at the rate of a mile a day. The track of the Galveston, Harrisburg and San Antonio road, running parallel with the International and Great Northern for ten miles, has reached Leon, nine miles west of San Antonio.

Railroad Law.

NEW YORK COURT OF APPEALS ABSTRACT.

Master and servant—fellow servant—fireman on locomotive and telegraph operator—time of running trains changed by telegraph—duty of master to servant—judicial notice.

The plaintiff's intestate, a locomotive fireman, in the employ of defendant upon his railroad, was killed by a collision upon such road caused by the negligence of the conductor on the colliding train, co-operating with that of a telegraph operator in defendant's employ at S., a station on such road. Defendant's trains were run by a general time-table, but the time of a train might, by the rules, be varied by a special order sent by telegraph from defendant's train-dispatcher to the conductor in charge of the train. The sending of such an order was a usual thing. The negligence in question had reference to a special order. Held, (1) that the courts may take judicial notice (Agawam Bank vs. Strever, 18 N. Y. 502), that railroads are managed in the practical running of them by overlooking officers at distant places who use the telegraph to keep informed as to, and to direct the movement of trains (2) That both the conductor and the operator were fellow servants of intestate. The conductor was engaged in the particular work intestate was, viz., the running of trains; and the operator in a work connected therewith—that of giving information of the trains, and communicating orders to those controlling them for stopping or going on. The duty of the operator was not that of the master for the negligent performance of which the master was bound. The fact that the operator sometimes did business not connected with the running of trains would not alter his character as a fellow servant, nor would the fact that he was appointed and discharged by one superior agent of defendant, and intestate by another. It cannot be claimed that the making of a variation from a time-table is an act of the master, in doing which, he must answer for the negligence of his subordinates. All that can be required from him by the public and by passengers is, that when he makes the variation he act under it with reasonable care and diligence. Sears vs. Eastern R Co., 14 Allen, 433; Gordon vs. M & L. R. Co., 52 N. H. 596. That is to say, due care and diligence in giving notices of the change, and in running the train upon the changed time. See Rose vs. Bost. & Alb. R. Co., 58 N. Y. 217. In the case at bar minute regulations and directions in reference to changes were made by rules known to the employees, the obedience of which by employees would insure safety. In such case it is not the duty of the master, as a part of his contract with the employee, to see to it as with a personal sight, and trust that notice of a temporary and special interference with a general time-table will come to the intelligence of all those whom it is to govern in the running of approaching trains. In such case the reasonable rule is, that the master must first choose his agents with due care for their possession of skill and competency, and that then he must use the best means of communication according to prescribed general rules and regulations, derived from the best experience in such business, and if among these means are the services of a fellow servant, competent for his place, his possible carelessness is a risk of the employment that his fellows take when entering the service. It is a misconception of this case to hold that the order of the train dispatcher was a change in the rules of the road, it was in accordance with those rules. In such a case as this it is not the duty of the master to give personal notice to every operative of a train of a special deviation from an established general time-table. His duty is done when he has beforehand provided rules minute, explicit and efficient, and made known to his servants, which, if observed and followed by all concerned, will bring such personal notice to every one entitled to it. Judgment reversed and new trial ordered. Slater vs. Jewett. Opinion by Folger, C. J. Danforth and Finch, J. J., dissented.

[Decided April 19, 1881.]

Contributory Negligence.

FERRY COMPANY VS. MONAGHAN.

It is not contributory negligence for a passenger to stand up on a ferry boat while in motion, so that she was thrown by an unusally violent landing of the boat, although if seated she would not have been injured.

Error to the Court of Common Pleas No. 4 of Philadelphia county.

Case by Bridget Monaghan against the Camden and Philadelphia Steamboat Ferry Company, to recover damages for injuries sustained by the alleged negligence of defendant.

The case was referred by agreement to Francis Rawle, Esq., as referee, under Act of May 14th, 1874, who reported in favor of plaintiff the sum of $3200. Exceptions to this report were filed and overruled and the report confirmed, which is assigned for error. The facts appear sufficiently in the opinion of the Supreme Court seq.

Opinion by GREEN, J. March 14, 1881.

The referee has found as a fact that the plaintiff in this action was not guilty of contributory negligence in the accident which caused her injury. The only escape from the effect of this finding would lie in the proposition that the undisputed facts of the case establish negligence in se on her part. To this point, therefore, the argument of the learned counsel for the plaintiff in error is directed. We find ourselves quite unable, however, to assent to his conclusions. The plaintiff below was a passenger by the defendant's ferry boat from Camden to Philadelphia. As the boat approached the wharf, she arose from her seat along with the other passengers, and at the moment of the collision she was standing at the forward part of the cabin just inside the door. The boat entered the slip without touching the piles on either side, but struck the bridge with such force as to throw the plaintiff down and produce the injury complained of. Of course it is true that if she had remained in her seat she would not have been injured, but it does not necessarily follow that her act of leaving her seat was contributory negligence. Had she occupied a manifest place of danger, as for instance a position very near to the end of the boat where there was no railing, and been precipitated into the

water by the shock of the collision, the contention of the defendant would be much more appropriate, and would perhaps be conclusive against her. But the position she was in at the moment of the accident was not one of apparent danger at all. She was inside the cabin near the door, in a place and in an attitude, apparently of perfect safety. It is the uniform habit of persons riding on steamboats to be upon their feet at will while the boat is in motion, and especially as it approaches the landing. It is one of the most comfortable and satisfactory features of steamboat travel that passengers are at liberty to move about from place to place on the vessel while it is motion. It was not shown by any testimony in this case that there was any liability to danger in the position of the plaintiff at the time of the accident. The referee found that she acted as prudent as people do in like circumstances, and his conclusion in this respect is so plainly in accordance with universal experience that it is impossible for us to find any error in it. We are clearly of opinion that the referee was correct in his finding that the plaintiff was not guilty of contributory negligence. This disposes of the case, because we do not consider it within our province to review either the finding of negligence of the defendant, or the assessment of damages. Those are exclusive matters of fact, as to which the referee's conclusions are to be treated as the verdict of a jury, and are not subject to review in this court, except where in a common law trial before a jury the assignment of error is such as can be heard and determined; Jamison vs. Collins, 2 Norris, 359; Lee vs. Keys, 7 Norris, 175. We see no error in this record.

Judgment affirmed.

Wayne MacVeagh, Esq., for plaintiff in error.
T. C. Patterson, Esq., for defendant in error.

The Executive government of Newfoundland has received a despatch from London through the Secretary of State for the Colonies, announcing that Her Majesty the Queen has been pleased to give her assent to the Allen bill which passed the Newfoundland Legislature during the past session. This bill, which has now become a law, admits the citizens of the United States to equal rights and privileges with British subjects in the tenure of lands in this island. It was a necessary sequence or rider to the act that incorporated the New York Railway Syndicate Company, and legalized the contract between them and the Newfoundland government for the construction of a railroad through this island.

The Chicago, Pekin and Southwestern Railroad was sold at Chicago on the 1st inst. under the second mortgage for $750,000 to F. E. Hinckley, to satisfy an indebtedness of $960,000. Hinckley represented the bondholders.

A decree has been signed granting M. De Lesseps a concession to cut a canal through the Isthmus of Corinth. The work will probably be commenced in 1882, and be completed in five years.

The Pittsburg, Erie and Newcastle and the Pittsburg and Western Narrow-Gauge Roads have been consolidated, and forms a connection between Pittsburg and Youngstown, Ohio. The New York, Pittsburg and Chicago Railroad Company has been organized for the purpose of extending this road further West. James S. Negley is president.

Canadian Canals.

The revenue of the Canadian canals for the year 1880 amounted to $336,296 74, an increase of $175,173 over the previous year, being as follows for the various canals:

	No. Vessels.	
Welland Canal	4,104	$147,584
St. Lawrence Canal....	11,340	99,563
Chambly Canal....	3,296	20,437
Rideau Canal	2,692	5 559
Ottawa Canals....	5,202	58 935
Burlington Bay Canal.....	989	3,813
St. Peter's Canal	153	185
Newcastle District Canals...	8	2,018
Total	25,774	$338,094

All the canals yielded an increased revenue with the exception of the Welland and Newcastle district. The St. Lawrence canal showed $16,-718 increase, while the decrease on the Welland Canal was $16,252. The reduction of tolls on the Erie canal is considered the cause of the latter. Of the craft using the canals 21,387 were Canadian, and 4,387 United States vessels.

A meeting of the stockholders of the Richmond and Alleghany Railroad Company, is to be held in Richmond, Va., on the 23d inst., at which a proposed plan of consolidation of said company with the Atlantic and Northwestern Railroad Company, a corporation of the State of West Virginia, and the Ohio Central Railroad Company, a corporation of the State of Ohio, will be submitted.

At an adjourned meeting of the Park Commissioners on the 7th inst., an opinion from Corporation Counsel Whitney was read in favor of the right of the Park Commissioners to build a bridge across the Harlem River at Madison avenue. It was resolved to review the whole matter of building the bridge and to determine whether it would not be better to build a stone structure instead of a trestle work bridge.

The survey for a new railroad from Duluth to Chicago, a distance of 400 miles, is now being prosecuted by a full corps of engineers, and another party are soon to commence work upon the survey of a line to run from Duluth in a northwesterly direction to Manitoba, while the Northern Pacific has already commenced the construction of a million-bushel grain elevator at that point.

Postmaster-General James filed on the 6th inst. and answer in the United States Circuit Court in the suit of the Yale Lock Company, charging him with using an infringement on their patents while he was Postmaster of New York. He claims that the income from the rent of the boxes was not placed to his credit and that the company were not the original inventors of the locks and therefore not the legal owners of the letters patent.

The completion of the Scioto Valley Railroad to Ironton, Ohio, the centre of the Hanging Rock Iron Region, and its junction with the Chesapeake and Ohio Railway, was formally celebrated at Ironton on the 2d inst. by appropriate exercises and a banquet at night. Governor Foster and prominent capitalists were present.

The plans for the proposed Northern Railroad of Long Island, from Astoria to Huntington, have been accepted. The railroad is to pass through Bowery Bay, Flushing, Little Neck, Lakeville, Manhassett, Barrow Beach, Sea Cliff, Glen Cove, Locust Valley, Millneck, Oyster Bay, Laurelton and Cold Spring.

It is understood that the Central Pacific Railroad Company will soon make the necessary survey for constructing a new line between Folsom and Placerville. From Folsom the new road will make its way up the side of the canyon to the table lands, and from thence to Placerville, taking the canyon again a portion of the way.

The road which is to connect New York City with the New York, Ontario and Western Railroad at Middletown runs up the west bank of the Hudson River, and cuts through the neck of land that extends into the river at West Point, the tunnel being directly under the parade grounds and emerging on the northwest shore of the bay.

Advices from Mexico state that the Palmer-Sullivan Company has purchased the Mexico, Toluca and Cuautillan Railroad and the property delivered. The Central Road is completed to Tula, a distance of 50 miles, and work commenced at San Juan del Rio. The Morelos Railroad has been completed to Cuautlay.

The contract for extending the Southern Minnesota Division of the Chicago, Milwaukee and St. Paul Railway to Sioux Falls, Dak., has been let, and the work will be rapidly pushed to completion.

Arrangements have been made to bridge the Ohio river at Wheeling, and extend the Wheeling and Lake Erie Railroad eastward to the Connellsville coke regions. The uncompleted portions of the road between Wheeling and the lake will also be finished.

The contract for the construction of the Columbus and Maysville Railroad has been let to the Columbus Construction Company, composed of General Samuel Thomas and others. The work is to be completed by July, 1882.

The Waxahatchie Tap Railroad was sold in Houston, Texas, on the 2d inst., to the Houston and Texas Central Railway Company. A transfer of the stock has been made on the company's books.

The Philadelphia and Long Branch Railroad Company commenced running trains through to Tom's River over the new road on the 1st inst., leaving Philadelphia at 8 a. m. and 5.10 p. m.

A party of surveyors have commenced the work of locating the line of the Southern California Railroad through the Cajon Pass.

Work on the Culican (Mexico) Railway was commenced on the 12th of May.

The Cairo and St. Louis Railroad is to be sold on the 14th of July.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "Italics." State-aid Railroads are distinguished by a "¶."

The transfer of the franchises and other property of the New York, Housatonic and Northern Railroad Company from J. H. Clapp, referee, and David S. Dunscombe and E. T. Mead, trustees of the bondholders, to John F. Whiting was recorded in the Register's office on the 7th inst. The road was sold under foreclosure for $110,000 in April, 1880. The transfer of the same property by John F. Whiting to William F. Van Pelt, for $150,253, was also recorded on the same day.

Statement of the Public Debt of the United States, June 1, 1881.

Interest paid by United States, $49,528,566 66; interest repaid by transportation of mails, &c., $14,256,338 85; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $34,617,028 94.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, May 31, 1881.

WILLIAM WINDOM,
Secretary of the Treasury.

Magnificent Debt-Paying.

It is small wonder if the prosperity of the United States excites envy in this country, and leads unthinking persons to suppose that to secure wealth no agency is so infallible as a ruthless Customs tariff. Mr. Secretary Windom has notified that no more 5 per cent bonds can be received for reduction at 3½ per cent. The remainder will be paid off out of surplus revenues, and between now and next August, in pursuance of this plan, £15,600,000 of the fives and £3,200,000 of the sixes will accordingly be paid off. What, with reductions of interest and repayments of principal, the expenditure of the United States will thus in a few months' time be lightened to the extent of at least £2,000,000 per annum. That is undeniably a magnificent result, and we trust that the progress will continue equally rapid in years to come. We may not like the way much of the money is obtained, but that can make no difference to the sincerity with which we can congratulate the United States on the rapidity of its debt reduction. Debt is as much a curse to nations as to individuals.—[Pall Mall Gazette.

The Grand Trunk Railway Company of Canada has taken possession of the Grand Junction Railway, which extends from Belleville to Peterboro. Nine hundred thousand dollars is said to have been the price paid.

Philadelphia Stock Exchange.

Closing Prices for the week ending June 7.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, June 9, 1881.

The rates for call loans are 2@3 per cent on United States bonds, and 3@4 per cent on stocks, the average rate being 3 per cent. Time loans are 2 to 4½ per cent. Prime mercantile paper is 3@4½ per cent.

The posted rates for prime bankers' sterling are 4.84½@4.86½; the actual rates are 4.83¾@4.84 and 4.85½@¾. Cable transfers are 4.86@½. Prime commercial bills are 4.82@¼. The actual rates for Continental exchange are as follows: France, 5.21⅞ for 60 day and 5.19⅜ for demand; marks, 94⅜ for 60 day and 94⅞ for demand, and guilders 40 for 60 day and 40¼ for demand.

The total amount of specie held by the National banks throughout the country on the 6th of May last was $122,628,562. This is $17,500,000 more than at the date of their last previous statement, March 11th, and $36,000,000 more than on the 23d of April, 1880. The banks also held on May 6th last $70,561,296 in legal tender notes.

A syndicate consisting of George W. Ballon, Boston; George S. Seney, Samuel Thomas, C. S. Brice, E. H. R. Lyman and John L. Martin, have purchased a controlling interest on the Kentucky Central Railroad Company. The price paid is sixty cents for common stock and par for preferred. The amount bought is nearly $3,800,000; the whole amount being $5,000,000.

An important question was argued on the 3d inst. at Newark, N. J., before Chancellor Runyon, as to whether the interest on the income bonds

of the Central Railroad of New Jersey accrues on the payment of the closing debt or not until the floating debt is paid and discharged. The argument, which was made for the railroad company by ex-Senator Frelinghuysen, and by Mr. Munn for the bondholders, left the impression that in any event interest on the bonds will soon be paid, and the importance of the question was whether the bonds will be entitled to arrears of interest.

The Supreme Court of Tennessee has rendered a decision, holding the present taxing district government of Memphis liable to a suit on the debts of the old city of Memphis.

The fund commissioners of Ohio have negotiated a loan for the State with Messrs. Kuhn, Loeb & Co., bankers, of New York, for $2,800,000, at four per cent interest, payable semi-annually, for which the firm pay a premium of 8¾ per cent. The principal falls due in annual installments, varying from $300,000 to $600,000, and the whole is payable in seven years.

The Quebec Chronicle says that the London agents of the amalgamated Quebec Central and Levis and Kennebec railway companies have succeeded in obtaining for the enterprise a loan of $3,000,000 on the guarantee of the Government at Quebec for five years at 5 per cent.

Governor Bell, of New Hampshire, in his inaugural address gives the State debt as $3,372,770, a reduction since last year of $139,696. The savings banks deposits amount to $32,097,734, an increase of nearly $4,000,000.

From June 11 to September 26, inclusive, the Philadelphia Stock Exchange will close Saturdays at 1 p. m., and open Mondays at 10.30 a. m.

The Erie and Western Transportation Company have decided to issue $1,000,000 of new stock, making the total capital $3,000,000. On the new stock a dividend of $20 per share will be credited out of the accumulated profits, arising chiefly from the advance in value of securities bought from the Empire Transportation Company at the time of its dissolution. The remaining $30 per share will be paid in cash, to be used in paying for and improving real estate at Buffalo and the enlargement of the company's fleet. The new shares will be alloted during the present month.

The Central Railroad Company of New Jersey is negotiating a $5,000,000 loan on its American Dock property, with which the bonds of the dock property are to be paid off. These amount to $4,000,000, with four and a half years' back interest. Six months' notice is to be given before payment.

Statesville, N. C., has voted to subscribe $50,000 to the proposed Virginia Midland Railroad extension, conditioned on the road going by Statesville.

The fifteen millions of dollars due the Boston shareholders on the stock of the Philadelphia, Wilmington and Baltimore Company purchased by the Pennsylvania Railroad Company was paid over in this city on the 7th inst. to the Boston Committee by President Roberts. The payment was anticipated, the money not being due till the 1st of July next.

The Master of the New Castle and Franklin Railroad is now engaged in paying off the claims against it out of the money realized from its recent sale. Five hundred dollars is to be paid on each bond, provided the bondholder indemnifies the Master. Under this order $400,000 has been paid off.

The San Francisco Bank offers for subscription £500,000 of six per cent first mortgage bonds of the Oregon and California Railroad at par—the remainder of the issue of £1,200,000—the rest of which has already been subscribed.

The closing quotations on Thursday were: Adams Express, 135@138; American Express, 86@87; American District Telegraph, 50@50⅛; Chicago, Burlington and Quincy, 167@167½; Canada Southern, 75⅛@75½; Chicago and Northwestern, 128¾@129; do. pref., 140@142; Central Pacific, 95⅝@95⅞; Chicago, Milwaukee and St. Paul, 126¾@126⅞; do. pref., 133½@134½; Chicago, Rock Island and Pacific, 144@145; Cleveland, Columbus, Cincinnati and Indianapolis, 97@97½; Columbus, Chicago and Indiana Central, 26⅝@26⅞; Delaware and Hudson Canal, 110⅛@110¼; Delaware, Lackawanna and Western, 126⅝@126¾; Hannibal and St. Joseph, 83@83¾; do. pref., 113⅛@114¼; Lake Erie and Western, 61⅛@62¼; Lake Shore and Michigan Southern, 131¼@131⅜; Metropolitan Elevated, 92@92⅛; Manhattan Elevated, 26¼@26⅜; Michigan Central, 110⅜@110⅝; New York Elevated, 110@110½; New York, Lake Erie and Western, 47¾@47⅞; do. pref., 88⅞@89; New York Central and Hudson River, 148½@148¾; Ohio and Mississippi 44@44⅛; Ohio Central, 34⅝@35; Pacific Mail, 53@53¼; Panama, 270@275; St. Louis, Alton and Terre Haute, —@68; do. pref, 96@98; Texas and Pacific, 72¾@73; Union Pacific, 127⅜@127½; United States Express, 74@74½; Wells Fargo Express, 127½@129; Western Union Telegraph, 128½@128⅝; do. ex. certif., 89½@89⅝; Wabash, St. Louis and Pacific, 54@54¾; do. pref., 93¾@94¼.

The following quotations of sales of Railwa and other securities, for the week, are in addition to those given elsewhere in our columns:

The President of the Master Car Builders' Association specially requests the attendance of an authorized representative of all roads at the meeting to be held in New York City on the 15th, for the purpose of revising the rules governing the condition of and repairs to freight cars for the interchange of traffic. It is earnestly desired that the rules shall be so revised and adopted at this meeting as to meet the necessities of all railroads offering cars for interchange. This invitation has been extended to all railroads in the United States and Canada.

Business Notices.

In addition to an extensive variety of carpets a full line of mattings, oil cloths, linoleums, lignums, etc., may be had for office or household furnishings at the Broadway Store (No. 701, near Fourth st.,) of Stephen A. Spencer, and at prices which invite attention. See his card elsewhere in this paper.

The Zero Refrigerator, manufactured by A. M. Lesley, 380 Sixth Ave., this city, is too well known to require new proof of its value. We need only reiterate what is often said of it, that "it is first class." Housekeepers and others can make no mistake in selecting the "Zero" as 38,000 households into which it has gone may testify.

The completion of the Southern Pacific Railroad to El Paso, Tex., was celebrated at that place on the 27th ult. in an enthusiastic manner by the citizens.

The entire new route of the proposed new railroad from Santa Rosa to Benicia, Cal., has been surveyed.

The track of the Utah and Northern Railroad is now laid to a point about twenty miles north of Dillon, Montana.

Paine, Webber & Co.,

BANKERS AND BROKERS,

(Members of the Boston Stock Exchange.)

53 Devonshire St., Boston.

Devote special attention to the purchase and sale of Stocks and Bonds in the Boston market, the careful selection of securities for investment, and the negotiations of commercial paper.

WM. A. PAINE. WALLACE G. WEBBER. C. H. PAINE.

John H. Davis & Co.,

Bankers and Brokers,

17 Wall St., New York.

Interest allowed on Temporary and Standing Deposits.

Stocks and Bonds bought and sold on Commission only, either on Margin or for Investment.

Sheldon & Wadsworth,

BANKERS,

10 WALL STREET, N. Y.

IN ADDITION TO A GENERAL BANKING BUSINESS, BUY AND SELL ON COMMISSION GOVERNMENT BONDS AND ALL SECURITIES CURRENT AT THE NEW YORK STOCK EXCHANGE, MAKING LIBERAL ADVANCES ON SAME. ALLOW INTEREST ON DEPOSITS.

500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

At the annual meeting of the Portland, Saco and Portsmouth Railroad Company, in Portsmouth, N. H., on the 6th inst. the President made a brief verbal report, stating that the affairs of the road were in a flourishing condition generally and dividends had been paid, that new depots and bridges had been built during the past year, and that within three weeks steel rails will have been laid the entire length of the line. The bridge across Lovell's River, above Centre Ossipee, on the Portsmouth, Great Falls and Conway Railroad, burned on Thursday, was replaced by a new structure on Friday, eighty feet long.

A dispatch dated Mexico, June 7, says Gen. Frisby has obtained a railway concession in the City of Mexico, which is considered the most valuable yet granted there. "It connects with the Southern Pacific and Rio Grande, and comes to Mexico City with branches to the Gulf and the Pacific."

The John P. King Manufacturing Company has been organized in Augusta, Georgia, with a capital of $1,000,000, and the privilege of increasing it to $3,000,000. The object is the manufacture of cotton goods. John P. King is President of the company.

The Philadelphia and Long Branch Railroad, which is completed to Tom's River, was opened for traffic on the 1st inst., both passenger and freight trains running through to Philadelphia.

LELAND HOTEL, CHICAGO, ILL., FINEST location in the city, corner Michigan avenue and Jackson street; fronting on the beautiful lake and park; two blocks from the Custom House and Post-office. Newly furnished and reconstructed. American plan. Popular prices, $3 and $3 50 per day. WARREN F. LELAND, Proprietor, late of Delavan House, Albany.

SPECIAL NOTICE.—The "Imhauser" referred to by Buerk is the late firm of Imhauser & Co., consisting of three persons, and has nothing whatever to do with this firm of E. Imhauser.

Send for circulars to E. IMHAUSER, 212 Broadway, New York. P. O. Box, 2875.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts.

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.

JNO. N. ABBOTT, General Passenger Agent.

SWIFT'S IRON AND STEEL WORKS,

26 West Third St., CINCINNATI, O.,

Manufacturers of all Weights of Standard and Narrow-Gauge Rails by most Approved Process. Also Rail Fastenings, Steel and Bloom Boiler Plate, Tank Sheet and Bar Iron.

SECOND QUARTO SERIES, VOL. XXXVII., No. 25.] NEW YORK, JUNE 18, 1881. [WHOLE No 2,356, VOL. LIV.

HEALTH OF RAILROAD MEN.

For the purpose of studying the effects of engine driving upon engineers and firemen Ludwig Hert made frequent trips on a locomotive, (his longest uninterrupted journey being 325 miles) and from his experience and tests noted the following causes effecting those continuously employed upon engines: First, the violent concussion; second, the uninterrupted straining of the eye and ear; third, the cutting air (less noticeable on the engines provided with a protecting roof); fourth, the continuous erect position; fifth, the frequent change of temperature. The occasional troublesome or noxious influences are dust and irrespirable and poisonous gases. Hirt observed on himself and young firemen an increased frequency of pulse and respiration, pain in the knees and the calves of the legs, exhaustion, weariness and excessive thirst, and nausea, which, however, soon disappear. Whenever he traveled thirty five to fifty miles without a stop, vertigo was perceived, associated with violent roaring in the ears, and he felt the urgent need of something to cling to. In addition to these symptoms, we have in the case of engineers and firemen the mental exertion of the most careful watchfulness and uninterrupted exertion of the higher organs of sense. Regarding the results of long years of traveling on the engine, Hirt says that, taking all in all, an engineer who averages seventy-five miles daily, or, in round numbers, 25,000 miles a year, may be as sound and robust after twenty years' service as he was in the beginning, providing he was then healthy and that he has met with no accidents. If we examine, says Hirt, a large number of engineers who have been long in the service we find that a majority of them are robust, sunburnt men, with well developed faculties, good digestion, and in an excellent state of health. The minority, however, in whom we see the disastrous results of their calling, must not be forgotten.

Dr. Lawrence Turnbull of Philadelphia recently read a paper before the Pennsylvania Medical Society, relating to deafness among railroad men, and his opinions are summarized by the Scientific American as follows: Locomotive engineers, firemen, and conductors, he said, are liable to affections of the ear, with decrease of hearing, such deafness appearing to be, in his estimation, more dangerous than color blindness as regards the signal code, because the latter is usually a congenital defect which can be defined precisely before the individuals are placed on active duty, while the deafness is an acquired disease, but slow in its approach and sometimes unknown to the person affected; and a cold or injury diminishing the hearing more and more, or destroys it completely, if it is not properly treated. Dr. Turnbull recommended that all candidates for railway service should be examined by a competent physician, who should test them with special reference to their hearing. He also advised that the company's physician should report to the superintendent of the road every case of deafness discovered in trainmen, provision being made for the transference of men of impaired hearing to other positions where perfect hearing is less vitally important.

THE RAILROAD BELL-ROPE.

In the early days of the railroad in this country the locomotive engineer was the master of the train. He ran it according to his judgment, and the conductor had very little voice in the matter. Collecting fares, superintending the loading and unloading of freight, and shouting "All aboard!" were all that the conductor was expected to do. The Erie Railway was then the New York and Erie Railroad. There was no rail connection with Jersey City in 1842. Boats carried passengers from New York to Piermont-on-the-Hudson, which was then the eastern terminus of the road. Turner's, 47 miles from New York, was as far west as the railroad was in operation. One of the pioneer conductors of this line was the late Capt. Ayres. He ran the only train then called for between the two terminal points. It was made up of freight and passenger cars. The idea of the engineer, without any knowledge of what was going on back of the locomotive, having his way as how the train was to be run, did not strike the Captain as being according to the propriety of things. He frequently encountered a fractious passengers who insisted on riding without paying his fare. As there was no way of signalling the engineer, and the passenger could not be thrown from the train while it was in motion, the conducter in such cases had no choice but to let him ride until a regular stop was made. Capt. Ayers finally determined to institute a new system in the running of trains. He procured a stout twine, sufficiently long to reach from the locomotive to the rear car. To the end of this string next the engineer he fastened a stick of wood. He ran this cord back over the cars to the last one. He informed the engineer, who was a German, named Abe Hammil, that if he desired to have the train stopped he would pull the string and raise the stick, and would expect the signal to be obeyed. Hammil looked upon this innovation as a direct blow at his authority, and when the train left Piermont he cut the stick loose. At Turner's he told Capt. Ayres that he proposed to run the train himself, without interference from any conducter. The next day the captain rigged up his string and stick of wood again.

"Abe," said he, "this thing's got to be settled one way or the other to-day. If that stick of wood is not on the end of this string when we get to Turner's you've got to lick me or I'll lick you.

The stick was not on the string when the train reached Turner's. The Captain pulled off his coat, and told Hammil to get off his engine. Hammil declined to got off. Capt. Ayres climbed to the engineer's place. Hammil started to jump off on the opposite side. The conductor hit up under the ear, and saved him the trouble of jumping. That settled forever the question of authority on railroad trains. Hammil abdicated as autocrat of the pioneer Erie train, and the twine and stick of wood, manipulated by the conductor, controled its management. That was the origin of the bell-rope, now one of the most important attachments of railroad trains. The idea was quickly adopted by the few roads then in op-

eration, and the bell or gong in time took the place of the stick of wood to signal the engineer. Capt. Ayres continued a conductor on this road under its different managers until he was superannuated and retired on a pension a year ago. He died a few months ago in Owego at the age of 78 years.—[New York Times.

New York and Brooklyn Bridge.

At the annual meeting of the Trustees of the New York and Brooklyn Bridge at their office in Brooklyn on the 14th inst.—all the Trustees being present, including Mayors Grace and Howell and Controllers Campbell and Semler—Henry C. Murphy was re-elected President and William C. Kingsland Vice-President, for the ensuing two years. President Murphy, upon taking the chair, gave a short sketch of what had been done on the bridge during the last year and what yet remained to bring it to completion. The iron foundation of the roadway has been laid for a considerable distance on both sides of the river, and the approaches to the bridge both in Brooklyn and New York are rapidly being put in condition for pedestrians. On the New York side there yet remains much work to be done in the bridging over of Franklin square, but he was happy to announce both to the trustees and the public that the money necessary for the full completion of all work on the bridge is at the disposal of the board. The bridge, therefore, would be soon in a fit condition for passenger traffic. Something more, however, remains to be done, in removing obstructions from the bridge and preparing the way for the approaches. For this purpose he had prepared a bill to bring before the present Legislature. It authorized the trustees to acquire land at both termini of the bridge, to develop it properly and give room to persons desirous of crossing; the land thus acquired to be held by both cities. For this purpose the bill asked for an appropriation of $1,000,000 one-half to be raised and expended in each of the two cities. The trustees are to expend it in acquiring land, both public and private, and streets needed for proper approaches, and to require all railroad tracks in the way to be removed and relaid in suitable places. As far as the elevated road is concerned, the matter is to be adjudicated in court, and if decided against the trustees they are to pay an equitable amount for the removal of the obstruction. The trustees are to be likewise authorized to complete the arches of the bridge and to lease them and such other property as they may deem proper, and take any other measures needful to promote the use of and travel on the bridge. After considerable discussion the whole matter was referred to the Mayors and Controllers of both cities, with full power.

Mr. A. P. Quintard, was then re-appointed Secretary of the Board, and Mr. John T. Agnew, was re-elected Temporary Secretary.

The President appointed the following gentlemen as members of the Executive Committee: John T. Agnew, John G. David, Robert B. Roosevelt, Erastus W. Smith, William Marshall, William C. Kingsley, Henry W. Slocum, J. S. T. Stranahan, Comptroller Semler, of Brooklyn, and Thomas C. Clark. The Finance Committee was appointed as follows; Comptroller Campbell, J. Adriance Bush, Henry Clausen, Alden S. Barnes, Charles McDonald, J. S. T. Stranahan and Otto Witte. A special committee was appointed for the purpose of considering the best mode of transit across the bridge, viz: Erastus W. Smith, J. S. T. Stranahan and Thomas C. Clark.

A resolution was then passed calling upon the comptrollers of both cities for the final $1,000,000 granted by the Legislature, according as the trustees might require the same for the work on the bridge. One-third of this amount is to be paid by New York and the remainder by Brooklyn.

From the report of the Secretary, which was read, it appears that the cash receipts since the beginning of the work were $13,009,315 20 and expenditures $12,884,437 23, leaving on June 11, 1881, a cash balance of $124,877 97, with liabilities amounting to $85,155 08.

Commerce of New York.

The foreign imports at New York for the month of May, 1881, are officially stated as follows:

	1880.	1881.
Entered for consumpt'n.	$17,796,044	$16,008,186
Do. for warehousing ...	14,278,907	8,471,679
Free goods	11,115,579	2,048,828
Specie and bullion	547,797	1,409,573
Total entered at port...	$43,738,327	$34,938,276
Withdrawn fr. wareh'use	5,825,501	9,070,526

The foreign imports at New York for five months from January 1, were:

	1880.	1881.
Entered for consumpt'n	$105,985,402	$88,595,499
Do. for warehouseing..	53,639,273	37,505,950
Free goods	54,878,852	51,079,878
Specie and bullion....	3,600,330	29,419,949
Total entered at port.	$218,103 857	$206,601,276
Withdrawn fr. wareh'se	32,879,645	39,368,737

The foreign imports at New York for eleven months ending with May, were:

	1880.	1881.
6 months ending Jan. 1.	$266,228,601	$280,770 515
January	40,897,154	36,085,859
February....	40,165,384	34,157.268
March	45,598,729	48,580,761
April	47 704,263	52,839,617
May	43,738.327	34,938,276
Total 11 mos.	$484,332,458	$487,371 791
Deduct specie....	82,343,501	100,014,485
Total mdse.....	$401,988,957	$387,357,306

The duties received at New York for eleven months ending with May, were:

	1880.	1881.
6 months ending Jan. 1....	$59,271,080 94	$69,593,542 80
January	11,960,677 78	10,572,559 15
February	12,254,602 24	11,217,766 87
March	14,469,557 65	13,122,964 08
April	11,901,071 43	11,678,760 98
May....	9,752,778 54	11,055,935 39
Total....	$119,609,763 58	$127,241,529 17

The exports from New York to foreign ports for the month of May, were:

	1880	1881.
Domestic produce.	$34,681,661	$29,164,091
Foreign free goods....	106,808	638,864
Do. dutiable....	522,044	784,110
Specie and bullion.	473,769	573,358
Total exports.	$35,783,772	$31,159,923
Do. exclusive of specie	35,310,003	30,586,565

The exports from New York to foreign ports for five months from January 1, were;

	1880.	1881.
Domestic produce.....	$149,954,069	$148,404,192
Foreign free goods..	1,060,133	4,569,613
Do. dutiable	1,899,522	2,668,082
Specie and bullion...	3,706,056	5,303,421
Total exports	$156,619,780	$160,945,308
Do. exclusive of specie.	152,913,724	155,641,887

The exports (exclusive of specie) from New York to foreign ports for eleven months of the fiscal year:

	1880.	1881.
Six months ending Jan. 1....	$197,760,586	$220,889,350
January	25,416,566	30,264,919
February	23,891.148	28,136,303
March....	33,626,459	36,290,685
April.	34,669.548	30,363 415
May	35 310,003	30,586,565
Total produce ..	$350,674,310	$376,481 237
Add specie	7,039,122	9,952,822
Total exports...	$357,713,432	$386,434,059

Boston and New York Air Line Railroad.

The report of the directors of the Boston and New York Air Line Railroad Company show the gross earnings of the company for the year ending April 30, 1881, to have been $281,569 40, the operating expenses $125,806 06, and the net earnings $155,763 34. Out of the net earnings the following expenditures were made: Construction and equipment, $19,648 27; interest on first mortgage bonds, $35,000; taxes for 1880, $14,727 82; cost of exchanging and printing bonds, $15,800. During the year 800 tons of new steel rails were laid, and 15,000 new cross ties. Contracts have been made whereby the company will have a continuous track of steel rail between its termini at New Haven and Willimantic during the present fiscal year. The general balance sheet to May 1, 1881, shows, on the debit side, the following items: Cost of company's property, $3,900,000; expended on construction and equipment, $560,000; material, &c., on hand, $57,000; cash, $41,000; uncollected earnings, $29,000. On the credit side the following appear: Bonds of former road convertible into stock, $252,000; capital stock, preferred, $2,800,000; do. common, $800,000; scrip, $28,000; first mortgage bonds, $500,000; current liabilities, $23,000; profit and loss, $184,000.

The Canton Company.

At the annual meeting of the Canton Company in Baltimore, Maryland, on the 8th inst., the report of the Treasurer was presented showing the financial condition of the company at the close of the fiscal year, May 31, 1881, to have been as follows: Balance on hand June 1, 1880, $37,202 40; rents, $89,126 79; sales of real estate, $196,049 96; Union Railroad on account of loans, $80,600—total, $402,979 05. Disbursements: Repairs to wharves, streets, salaries, taxes, &c., $38,949 76; trustees Canton Company proceeds sales of real estate, $184,174 86; rebates allowed Northern Central Railway Company, $16,766 21; interest on bonds, $99,407 27; settlement of contested claims, $10,000; purchase of real estate, $526 85; balance in bank May 31, 1881, $53,154 10—total, as above, $402,979 05.

A special meeting of the Canadian Pacific Railway Company will be held in Montreal on the 18th of July.

New York, Saturday, June 18, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

COMBINING midsummer pleasures with business the bankers are to meet in a convention to be held at Niagara Falls on the 10th of August, under the auspices of the American Bankers' Association.

HOLDERS of coupon five per cent Government bonds should remember that the time for their extension at three and a half per cent will expire July 1, and that while they have this week been quoted at 103½, after July 1 they will naturally be worth but par and accrued interest.

NEW YORK will have a direct connection with the Hoosac Tunnel by means of the extension of the New Haven and Northampton Railroad just being completed. The extended line has already been connected with the State road at Bardswells' Ferry, near the tunnel, and through trains over the new route will probably soon be announced.

AN idea of the vastness of the tide of immigration flowing westward is seen in the estimate that four railroads carried to Chicago in May, over 35,000 immigrants, and this in addition to the many thousands who sought the West, without passing through Chicago. Meanwhile the immigration from the other side of the country is increasing, the Chinese having come fifty per cent faster during the early months of this year than last season.

THERE is a probability that the Government of Nova Scotia may sell the entire railroad system of the Province to an English corporation, which is said to have made an offer for it, such a transfer to be made upon certain terms fixed in the charters of the different roads. The matter is soon to be considered by the Provincial Legislature.

THEY have it in mind to try a line of Brazilian steamers at Boston; and they will probably keep it in their mind for some time before much money or the required guarantees concerning outward cargoes will be forthcoming. There needs to be some enterprising work done at the Brazilian end of the line, in the interest of American commerce before shippers can have a view of the subject much different from that which New York's experience would naturally present.

ONE of the uses that the electric light may possibly be put to is that of lighting railroad tracks in such a manner as to do away with headlights. At least the feasibility of using the light for such a purpose has been suggested to railroad men, the idea being to utilize the existing telegraph poles as supports for electric lights which should make a continuous illumination along the entire road. Should it seem practicable after careful investigation and tests are made, the additional security from accidents and the convenience of the plan would doubtless bring it into prompt and careful consideration.

WITHIN a few weeks another cable will be completed between Europe and America, one-half of it having been already laid with its end now resting on a buoy about nine hundred miles from Nova Scotia. The Canadians are talking up a purely Canadian Trans-Atlantic cable and there seems to be much interest manifested in the matter. Initiatory steps have been taken looking toward getting the project under way, and it is said that one of the objects of Sir Hugh Allan's present visit to England, is to consult with capitalists about the desirability of laying a cable that should be in management and operation distinctively Canadian.

THERE is an increasing desire among the farmers of Scotland to immigrate to this country, doubtless growing out of the agitation over the land laws and general dissatisfaction with the agricultural prospects of their own land as compared with what America is offering in that direction. The Scottish element will prove of great value in the development of our agricultural resources, but it must be attracted and directed in the most sincere and the wisest manner to prevent a check upon its coming. The Scotch farmers want information of undoubted reliability concerning the different sections of our country and when this is furnished them and they have studied out the localities best adapted to their wants their is little doubt as to their coming over in large numbers. Alexander Sinclair, Editor of the Glasgow Herald, has been making a tour of the United States and doubtless the results of his studies of the different sections visited will be of interest and value to his countrymen, to whom he has just returned.

THERE is a difference of opinion between some of the officers of the Treasury Department and experts concerning color blindness. The former in examinations made of pilots last year came to the conclusion that color blindness was not an acquired disease but hereditary. To this theory certain experts are opposed, among others Dr. Jeffries of Boston, who is quoted as saying in a recent address, "Color blindness, beside being congenital and hereditary, may be acquired. It is a symptom of some disease of the brain and the optic nerve. Men, after any exhausting disease, like typhoid fever, should be tested before again resuming their duties. The necessity of periodic examinations, for instance with pilots, as often as they are relicensed, is thus readily understood; this quite aside from the necessity of testing their visual power, which may have decreased from many causes during the preceding year. Injuries about the head, such as sailors and railroad employees are particularly subject to, may cause diminished color perception. Alcohol and tobacco produce a deterioration of the vision and color sense."

The Parentage of the Railroad.

It was a singular procession that was witnessed by thousands at the centennary of the birth of George Stephenson, at his birthplace near Newcastle on the 9th; a long line of rail, road locomotives moving like things of life in stately dignity over their iron pathway and illustrating in their beautiful mechanism and display of almost human powers the creative skill of man and the progress of a century. Nearly every railroad company in the United Kingdom was represented in the line by its most powerful engine. Following this wonderful display came an equally significant and fitting one a procession of trade societies in which 100,000 persons are said to have participated. At Vienna the Society of Austrian Railway Officials celebrated the day by unveiling in their club house a portrait of Stephenson, whom they called "The Father of Railways."

There has been in these celebrations a strange overlooking of the important part performed by Oliver Evans in starting the idea of using steam on railroads. While Stephenson was absorbed in contemplating locomotion chiefly from his mother's arms, Oliver Evans, of Pennsylvania, in 1784, conceived the idea of

his high pressure steam engine and the employment of it for moving carriages on ordinary roads. During the following ten years he urged the adoption of railroads with steam engines as superior to canals. In the winter of 1803-4 he exhibited a steam carriage successfully in the streets of Philadelphia, an invention of his own over which he had expended about four years of work, in which he had to overcome almost insurmountable obstacles. This invention, which was really a locomotive, was intended for a trial on a railroad which it was understood should be built for it. But the railroad was not built and Evans' locomotive was designated a street carriage. Twelve years before Stephenson had demonstrated the feasibility of steam railroads, or about 1810, Evans was advocating in public addresses and other ways the building of a railroad between Philadelphia and New York without receiving much encouragement, though offering to apply the whole of his fortune to the enterprise. It is fitting that among these tributes to the inventor of the locomotive a fairer portion of recognition should be given to the labors and inventive achievements of Oliver Evans, of whom it may be said that the world witnessed in him the first enthusiastic champion of the utility of the locomotive. No time has been assigned as yet for the celebration of the birthday of the "iron horse"; the centennary of the birth of the idea may be placed perhaps in 1884, though the centennary of the trial of Evans' first locomotive would come twenty years later. It would not be unfitting that the land of the most marvelous railroad achievements should in some manner do public honor to the memory of the pioneer of her most important element of internal improvement and progress.

Manufacturing.

The Blair Iron and Steel Works at Glenwood, near Pittsburg, have been put in order by William McKinney & Sons, and will soon be operated.

The Southern Car Works Company was organized recently at Knoxville, Tennessee, with $100,000 capital and orders for a year's work. Within 60 days the buildings will be finished and 200 hands will be employed.

A system of lighting railroad cars with gas has been tried on the Baltic Railway. The gas is made on the cars by the action of sulphuric acid and zinc, the resulting hydrogen being carbureted by being passed through naptha vapor. It is said that this gas has very little odor, that its flame is bright, white, and constant, and that it is cheaper and gives better results than stearine candles;

Blast-furnace slag, that most hopeless of all waste substances, is now utilized to a great extent. It is converted into sand, mixed with a certain proportion of scienitic lime, and manufactured into bricks which possess many advantages over the ordinary bricks of commerce. By reducing the slag to a fibrous condition a material is produced which is usefully employed as a non-conductor of heat in clothing steam pipes and boilers. It is used in the manufacture of glass bottles and glass railway sleepers. But the most recent invention in slag utilization is in the production of a pure, white cement of greater strength than the best Portland cement.

The rule of best lubrication is to use an oil that has the greatest cohesiveness to metal surfaces, and the least adherence as to its own particles. Fine mineral oils stand first in this respect, sperm second, neatsfoot third, lard fourth. Cast iron holds better than any other metal or any alloy, and is the best metal to use for light bearings, perhaps for heavy. It has been proved by experiments that a highly polished bearing is more liable to friction than a surface finely lined by filing.

Mining.

The Starr-Grove Silver Mining Co. has declared its eighth regular monthly dividend of ten cents a share payable on the 30th at No. 2 Nassau St.
